Ideas about education have consequences. This book, edited by Matthew Etherington, provides readers with ideas and insights drawn from fifteen international scholars in Christian thought within the fields of philosophy, theology and education. Each author responds to the philosophical, historical and sociological challenges that confront their particular line of educational inquiry. The authors offer a view of Christian education that promotes truth, human dignity, peace, love, diversity and justice. The book critically analyzes public discourse on education including the wisdom, actions, recommendations and controversies of Christian education in the twenty-first century. This timely book will appeal to those concerned with Christian perspectives on education, Aboriginality, gender, history, evangelism, secularism, constructivism, purpose, hope, school choice and community.

Wittgenstein, Education and the Problem of Rationality Michael A. Peters, 2021-01-21. This book develops an argument for a historicist and non-foundationalist notion of rationality based on an interpretation of Wittgenstein of the Philosophical Investigations and On Certainty. The book examines two notions of rationality: a universal versus a constitutive conception and their significance for educational theory. The former, advanced by analytic philosophy of education as a form of conceptual analysis, is based on a mistaken reading of Wittgenstein. Analytic philosophy of education used a reading of Wittgenstein's philosophy of language to set up and justify an absolute, universal and ahistorical notion of rationality. By contrast, the book examines the underlying influence of the later Wittgenstein on the historicist turn in philosophy of science as a basis for a non-foundationalist and constitutive notion of rationality which is both historical and cultural and remains consistent with wider developments in philosophy, hermeneutics and social theory. This book aims to understand the philosophical motivation behind this view, to examine its intellectual underpinnings and to substitute this universal conception of rationality by reference to a Hegelian interpretation of the later Wittgenstein that emphasizes his status as an

anti foundational thinker **Sociological and Philosophical Perspectives on Education in the Asia-Pacific Region**

Chi-Ming Lam, Jae PARK, 2015-12-12 This book demonstrates the value of approaching education from a sociological and philosophical perspective Specifically it addresses current and long standing educational issues in the Asia Pacific region integrating sociological and philosophical insights with practical applications in four key areas educational aims moral education educational policy and the East West dichotomy It discusses educational aims in terms of rationality philosophical thinking and sustainable development and presents the literary religious and analytical approaches to moral education Four educational policies are then considered Hong Kong s language policy Hong Kong s policy on the internationalization of education East Asia s policies on English education and Australia s policy on teacher education Different aspects of the East West dichotomy are analysed Confucian rationalism versus Western rationalism Confucian learning culture versus Western learning culture and Asian research methodology versus Western research methodology Taken as a whole the book shows that issues in education are rarely simple and looking at them from multiple perspectives allows for rich and informed debates It presents a rare philosophical and sociological analysis of the cultures and experiences of education in the Asia Pacific region and promotes research that leads to more culturally rooted educational policies and practice Education's Epistemology Harvey Siegel, 2017-09-08 Education s Epistemology extends and further defends Harvey Siegel s reasons conception of critical thinking It analyzes and emphasizes both the epistemic quality and the dispositions and character traits that constitute the critical spirit that are central to a proper account of critical thinking argues that that epistemic quality must be understood ultimately in terms of epistemic rationality defends a conception of rationality that involves both rules and judgment and argues that critical thinking has normative value over and above its instrumental tie to truth Siegel also argues contrary to currently popular multiculturalist thought for both transcultural and universal philosophical ideals including those of multiculturalism and critical thinking themselves Religious Education and the Public Sphere Patricia Hannam, 2018-08-06 Religious Education and the Public Sphere reveals through an analysis of theory and practice that religious education is resting on historic and persistent assumptions about both religion and education Drawing on work from Arendt and Weil new ideas emerge regarding religious education s constituent elements education and religion It offers a new and timely proposal for religious education and argues for a broader understanding of religion bringing a fresh contribution to current discussions regarding the relationship between religion and education in the public sphere Some practical considerations emerging from theory developing through the earlier parts of the book are presented in the final section including the teacher s role and what should guide religious education curriculum At a time when there is raised interest in the role of religion in the public sphere internationally this book aims to contribute something new both theoretically and practically to discussions regarding the role of religion in education is and relevant to educational contexts worldwide This book will be vital reading for academics and researchers in the fields of religion and religious studies
