The Politics of Recall Elections Yanina Welp, Laurence Whitehead, 2020-02-27 This edited volume presents the first comprehensive analysis of recall processes which have spread globally since the end of the Cold War and which are now re configuring the political dynamics of electoral democracy Drawing on the expertise of country experts the book provides a coherent and theoretically informed framework for mapping and evaluating this fast evolving phenomenon While the existing literature on the subject has so far focused on isolated single country studies the collection brings recall experiments to centre stage as it relates them to current crises in the traditional variants of representative democracy It explains why the spread of recall innovations is set to continue and to pass

a threshold from inattention to urgent engagement The authors further provide original insights into the rationale for recall as well as guidance on minimising the accompanying risks The Cry for Peace Andrea Riccardi,2024-09-20 In these pages Andrea Riccardi reflects on the need to create a culture of peace a spiritual and social movement that puts peace at the center of public concerns and politics It is up to each of us to become an artisan of peace our choice lies at the beginning of peace building Not turning away means knowing becoming informed following events standing in solidarity with those suffering from war remembering them in prayer A living public opinion can influence and change national events and international policies It can hold back or prevent war and open avenues for peace **Remembering Transitions** Ksenia Robbe,2023-10-04 This volume offers critical perspectives on memories of political and socioeconomic transitions that took place between the 1970s and 1990s across the globe and that inaugurated the end of the Cold War The essays respond to a wealth of recent works of literature film theatre and other media in different languages that rethink the transformations of those decades in light of present day crises The authors scrutinize the enduring silences produced by established frameworks of memory and time and explore the mnemonic practices that challenge these frameworks by positing radical ambivalence or by articulating new perspectives and subjectivities As a whole the volume contributes to current debates and theory making in critical memory studies by reflecting on how the changing recollection of transitions constitutes a response to the crisis of memory and time regimes and how remembering these times as crises renders visible continuities between this past and the present It is a valuable resource for academics students practitioners and general readers interested in exploring the dynamics of memory in post authoritarian societies *Making Standards Useful in the Classroom* Robert J. Marzano,Mark W. Haystead,2008-03-15 Has the standards movement in the United States led to improved classroom instruction and effective assessment In too many cases the answer is no As authors Robert J Marzano and Mark W Haystead explain two major reasons account for this situation state and national standards documents typically identify far more content than teachers can actually teach during a school year and the standards are not written in a manner that supports effective instruction and assessment In *Making Standards Useful in the Classroom* Marzano and Haystead present a way to convert standards documents into a format that teachers can actually use to guide instruction and to create meaningful formative assessments In Part I of this practical guide teachers administrators and curriculum specialists will find answers to questions such as these What are the steps to follow in unpacking and rewriting standards so they are useful for classroom teachers What is a measurement topic and what kind of content should it include How can measurement topics be organized into a coherent system for learning and assessment Why is averaging a flawed method for calculating grades What is the best way to assess learning and determine a grade that accurately represents students growth in knowledge and skill Part II of the book consists of scoring scales with sample measurement topics for language arts math science and social studies for kindergarten through 8th grade and sample measurement topics for life skills for kindergarten through 12th grade Using the

samples as a guide districts and schools can create their own systems for translating standards into useful components of effective instruction and formative assessment that truly drive student learning Note This product listing is for the Adobe Acrobat PDF version of the book *The Oxford Handbook of Human Memory, Two Volume Pack* Michael J. The Crash of Ruin Peter Schrijvers, 2001-02 In the ruined Europe of World War II American soldiers on the frontline had no eye for breathtaking vistas or romantic settings The brutality of battle profoundly darkened the soldiers perceptions of the Old World Drawing on soldiers diaries letters poems and songs Peter Schrijvers offers a compelling account of the experiences of U S combat ground forces their struggles with the European terrain and seasons their confrontations with soldiers and their often startling encounters with civilians Schrijvers relays how the GIs became so desensitized and dehumanized that the sight of dead animals often evoked more compassion in them than enemy dead The Crash of Ruin concludes with a dramatic and moving account of the final Allied offensive into German held territory and the soldiers bearing witness to the ultimate symbol of Europe s descent into ruin the death camps of the Holocaust

American Soldiers Peter S. Kindsvatter, 2003 Some warriors are drawn to the thrill of combat and find it the defining moment of their lives Others fall victim to fear exhaustion impaired reasoning and despair This book synthesizes the wartime experiences of American soldiers from the doughboys of World War I to the grunts of Vietnam Focusing on both soldiers and marines it draws on histories and memoirs oral histories psychological and sociological studies and even fiction to show that their experiences remain fundamentally the same regardless of the enemy terrain training or weaponry

Autobiographical Memory Charles P. Thompson, Douglas J. Herrmann, Darryl Bruce, J. Don Read, David G. Payne, 2014-10-10 The organization of the first Society for Applied Research in Memory and Cognition SARMAC conference centered around two specifically identifiable research topics autobiographical memory and eyewitness memory These two areas long time staples on the menu of investigators of memory in more natural settings differ on a variety of dimensions perhaps most notably in their specific goals for scientific inquiry and application For many questions about memory and cognition that are of interest to scientific psychology there have been historical as well as rather arbitrary

reasons for their assignment to the autobiographical or eyewitness memory fields Perhaps as a result of differing historical orientations the first volume's seven autobiographical memory chapters focus upon the qualities or types of recall from research participants whereas the seven chapters in the eyewitness memory volume generally focus upon the quantity a concern for completeness and accuracy of recall This interest in the ultimate end product and its application within the legal process in general encourages eyewitness memory investigators to modify their testing procedures continually in an attempt to gain even more information from participants about an event Indeed several of the eyewitness memory chapters reflect such attempts Beyond the specific contributions of each chapter to the literature on autobiographical and eyewitness memory the editors hope that the reader will come away with some general observations the autobiographical and eyewitness memory fields are thriving these two fields are likely to remain center stage in the further investigation of memory in natural contexts although the autobiographical and eyewitness memory chapters have been segregated in these two volumes the separation is often more arbitrary than real and connections between the two areas about the two research traditions are entirely mindful of fundamental laboratory methods research and theory sometimes drawing their research inspirations from that quarter and the two fields though driven largely by everyday memory concerns can contribute to a more basic understanding of memory at both an empirical and a theoretical level **Mercy Cathal J.**

Nolan, 2023 In *The Merciful Warrior* author Cathal J Nolan compiles and analyzes acts of mercy and decency in war drawing upon centuries of military history and dozens of wars to challenge nationalist myths the usual heroic fabrications and all claims to exclusive or unilateral moral virtue **Hawaii Recalls** Brown, 2017-09-08 First Published in 1986 Routledge is an imprint of Taylor Francis an informa company **Untold Valor: The Second World War in the Pacific** Rob

Morris, 2014-03-24 Military author Rob Morris spent three years tracking down and interviewing veterans of the war in the Pacific focusing on men who had undergone extreme combat imprisonment and or or sinking Each stand alone chapter tells the reader through the eyes of one to three survivors what it was like to live through some of the greatest challenges of the Pacific War From Pearl Harbor to Hiroshima from Bataan to the sinking of the USS Indianapolis each chapter of untold valour and against the odds survival tells an intensely personal tale of young Americans fighting for survival The book is certain to interest anyone with interest in the Second World War told with the intensely personal style and attention to background research that has become Morris's trademark **The Middle East, Oil, and the U.S. National Security**

Policy Donald M. Snow, 2016-03-17 Three interrelated subject areas are at the heart of the current foreign and national security dilemma One is the Middle East which has been the epicenter of most U S policy activity for over a third of a century The second is energy policy particularly as it is affected by the development and exploitation of shale oil and gas reserves in the United States This is linked to the Middle East because it has been American dependence on Middle East petroleum that has created the interest the U S has in this region The third area is military manpower policy and two simultaneous wars in

the new century have raised questions about the all volunteer force policy in place since 1972 It is increasingly evident that foreign and defense policy are strained and in need of fresh conceptualization The three areas identified are the most obvious examples of policy dysfunction The key area is the Middle East region As long as the United States remains heavily committed to this part of the world especially with military force and essentially because of its energy needs there will be strains on manpower resources that could force a reexamination of the all volunteer concept At the same time the reduction of U S dependence on Middle Eastern oil loosens the bonds that seem to impel American activism in the region The result could be true opportunities for a less confrontational adversary driven foreign and defense posture **Collaborative**

Remembering Michelle L. Meade,Celia B. Harris,Penny Van Bergen,John Sutton,Amanda J. Barnier,2018 We remember in social contexts We reminisce about the past together collaborate to remember shared experiences and remember in the context of our communities and cultures This book explores the topic of collaborative remembering across a wide range of fields including developmental cognitive and social psychology *French North America in the Shadows of Conquest* Ryan André Brasseaux,2020-12-29 French North America in the Shadows of Conquest is an interdisciplinary postcolonial and continental history of Francophone North America across the long twentieth century revealing hidden histories that so deeply shaped the course of North America Modern French North America was born from the process of coming to terms with the idea of conquest after the fall of New France The memory of conquest still haunts those 20 million Francophones who call North America home The book re examines the contours of North American history by emphasizing alliances between Acadians Cajuns and Qu b cois and French Canadians in their attempt to present a unified challenge against the threat of assimilation linguistic extinction and Anglophone hegemony It explores cultural trauma narratives and the social networks Francophones constructed and shows how North American history looks radically different from their perspective This book presents a missing chapter in the annals of linguistic and ethnic differences on a continent defined in part by its histories of dispossession It will be of interest to scholars and students of American and Canadian history particularly those interested in French North America as well as ethnic and cultural studies comparative history the American South and migration **Aging** ,1990
