On behalf of the program committee it is our pleasure to present to you the proceedings of the fourth Recent Advances in Intrusion Detection Symposium. The RAID 2001 program committee received 55 paper submissions from 13 countries. All submissions were carefully reviewed by several members of the program committee on the criteria of scientific novelty, importance to the field and technical quality. Final selection took place at a meeting held on May 16-17 in Oakland, California. Twelve papers were selected for presentation and publication in the conference proceedings. In addition, nine papers presenting work in progress were selected for presentation. The program included both fundamental research and practical issues: logging and IDS integration, attack modeling, anomaly detection, specification based IDS, IDS assessment, IDS cooperation, intrusion tolerance and legal aspects. RAID 2001 also hosted two panels: one on The Present and Future of IDS Testing Methodologies, a subject of major concern for all IDS users and designers, and one on Intrusion Tolerance, an emerging research area of increasing importance. Dr. Bill Hancock, Senior Vice President and Chief Security Officer of Exodus Communications Inc., delivered a keynote speech: Real world intrusion detection or how not to become a deer in the headlights of an attacker's car on the information superhighway. The slides presented by the authors of the 9 papers which are not in the proceedings and the slides presented by the panelists are available on the website of the RAID symposium series: <http://www.raid-symposium.org>
