Homskaya, 2013-11-11 Alexander Romanovitch Luria is widely recognized as one of the most prominent neuropsychologists of the twentieth century This book written by his long standing colleague and published in Russian by Moscow University Press in 1992 fifteen years after his death is the first serious volume from outside the Luria family devoted to his life and work and includes the most comprehensive bibliography available anywhere of Luria's writings Advances in Computer Vision Christopher Brown, 2013-08-21 First Published in 1988 The series Advances in Computer Vision has the goal of presenting current approaches to basic problems that arise in the construction of a computer vision system written by leading researchers and

practitioners in the field In these volumes computer vision means computer programs analyzing visual input like a television image of a three dimensional scene and deriving from the image some description of the scene that is helpful to further reasoning or action concerning the scene Human Information Processing Peter H. Lindsay,Donald A. Norman,2013-10-22 Human Information Processing An Introduction to Psychology Second Edition was written to reflect recent developments as well as anticipate new directions in this flourishing field The ideas of human information processing are relevant to all human activities most especially those of human interactions The book discusses all the traditional areas and then goes beyond consciousness states of awareness multiple levels of processing and of awareness interpersonal communication emotion and stress The book begins with an introduction to some of the more interesting phenomena of perception and poses some of the puzzles faced by those who would attempt to unravel the structures Separate chapters cover the systems of most interest for human communication the visual system and the auditory system the structure of the nervous system and the systems of memory sensory information storage short term memory and long term memory Subsequent chapters deal with the different aspects of memory including show how memory is used in thought in language and in decision making Also examined are the neurological basis of memory and the representation of knowledge within memory **Advances in Vertebrate Neuroethology** Jorg-Peter Ewert,2012-12-06 This volume presents the proceedings of the NATO Advanced Study Institute on Advances in Vertebrate Neuroethology held at the University of Kassel Federal Republic of Germany in August 1981 During the last decade much progress has been made in understanding the neurophysiological bases of behavior in both vertebrates and invertebrates The reason for this is that a number of new physiological anatomical and histochemical techniques have recently been developed for brain research which can now be combined with ethological methods for the analysis of animal behavior to form a new field of research known as Neuroethology The term Neuroethology was originally introduced by S L Brown and R W Hunsperger 1963 in connection with studies on the activation of agonistic behaviors by electrical brain stimulation in cats Neuroethology was more closely defined by G Hoyle 1970 in the context of a review on cellular mechanisms underlying behavior of invertebrates Since the 6th annual meeting of the Society for Neuroscience held in Toronto in 1976 Neuroethology has become established as a session topic Semiotics of Drama and Theatre Herta Schmid,Aloysius Van Kesteren,1985-01-01 The volume presents perspectives in the theory of drama and theatre that are new for the following reasons 1 the contributions reflect the international cooperation in developing drama and theatre as well as its theories 2 this collection is the first attempt of presenting papers within the context of Analytical Theory of Science 3 it is the first consistent set of papers starting from semiotics as a meta theory The volume is divided into four sections I Fundamental of Theatre Research II Theory of Drama and Theatre III Descriptive Theatre Research IV Applied Theatre Research The fifth and final section offers a selective bibliography of analytical approaches to drama and theatre **Acta Neurologica** ,1978 **Readings in Computer Vision** Martin A. Fischler,Oscar Firschein,1987-06 The field of computer

vision combines techniques from physics mathematics psychology artificial intelligence and computer science to examine how machines might construct meaningful descriptions of their surrounding environment The editors of this volume prominent researchers and leaders of the SRI International AI Center Perception Group have selected sixty papers most published since 1980 with the viewpoint that computer vision is concerned with solving seven basic problems Reconstructing 3D scenes from 2D images Decomposing images into their component parts Recognizing and assigning labels to scene objects Deducing and describing relations among scene objects Determining the nature of computer architectures that can support the visual function Representing abstractions in the world of computer memory Matching stored descriptions to image representation Each chapter of this volume addresses one of these problems through an introductory discussion which identifies major ideas and summarizes approaches and through reprints of key research papers Two appendices on crucial assumptions in image interpretation and on parallel architectures for vision applications a glossary of technical terms and a comprehensive bibliography and index complete the volume
