Recent Advances In Scientific Computing And Partial Differential Equations:

Recent Advances in Scientific Computing and Partial Differential Equations S.-Y. Cheng, Chi-Wang Shu, Tao Tang, 2003

The volume is from the proceedings of the international conference held in celebration of Stanley Osher's sixtieth birthday. It presents recent developments and exciting new directions in scientific computing and partial differential equations for time dependent problems and its interplay with other fields such as image processing, computer vision and graphics. Over the past decade there have been very rapid developments in the field. This volume emphasizes the strong interaction of advanced mathematics with real world applications and algorithms. The book is suitable for graduate students and research mathematicians interested in scientific computing and partial differential equations.

Recent Advances in Scientific Computing and Applications Jichun Li, Hongtao Yang, Eric Alexander Machorro, 2013-04-24

This volume contains the proceedings of the Eighth International Conference on Scientific Computing and Applications held April 1-4, 2012 at the University of Nevada Las Vegas. The papers in this volume cover topics such as finite element methods, multiscale methods, finite difference methods, spectral methods, collocation methods, adaptive methods, parallel computing, linear solvers, applications to fluid flow, nano optics, biofilms, finance, magnetohydrodynamics, flow, electromagnetic waves, the fluid structure interaction problem, and stochastic PDEs.
