Payne,2018-08-09 Language in the Buddhist Tantra of Japan dismantles the

preconception that Buddhism is a religion of mystical silence arguing that language is in fact central to the Buddhist tradition By examining the use of extraordinary language evocations calling on the power of the Buddha in Japanese Buddhist Tantra Richard K Payne shows that such language was not simply cultural baggage carried by Buddhist practitioners from South to East Asia Rather such language was a key element in the propagation of new forms of belief and practice In contrast to Western approaches to the philosophy of language which are grounded in viewing language as a form of communication this book argues that it is the Indian and East Asian philosophies of language that shed light on the use of language in meditative and ritual practices in Japan It also illuminates why language was conceived as an effective means of progress on the path from delusion to awakening

Journeys East Harry Oldmeadow, 2004-04-28 This is the first book to treat the impact of religious philosophical and psychological traditions of the East on Western intellectuals artists travellers and spiritual seekers in the twentieth century Addressed to both general readers and scholars of religion it is especially valuable for its penetrating and inter religious analysis of two of the most compelling themes now facing the world the emergence of cross cultural religious understanding of the natural order and ecological crisis and the metaphysical basis for both the formal diversity and essential unity of religious traditions of both East and West The West has long romanticized the mysterious East but it has also judged its traditions as uncivilized Our notions about Eastern spirituality have been formed by a succession of travellers scientists artists intellectuals poets philosophers and missionaries as well as by Eastern travellers who have spent time in the West This book helps us to recognize the influence of Eastern ideas upon modern Western thought by tracing the history of engagements between East and West up until the present day It concludes with a section that helps us to perceive the timeless value of the many Eastern contributions to the West's current intellectual and spiritual state

Allegories of Desire Susan Blakely Klein, 2020-10-26 One of the more intriguing developments within medieval Japanese literature is the incorporation into the teaching of waka poetry of the practices of initiation ceremonies and secret transmissions found in esoteric Buddhism The main figure in this development was the obscure thirteenth century poet Fujiwara Tameaki grandson of the famous poet Fujiwara Teika and a priest in a tantric Buddhist sect Tameaki's commentaries and teachings transformed secular texts such as the Tales of Ise and poetry anthologies such as the Kokin waka shu into complex allegories of Buddhist enlightenment These commentaries were transmitted to his students during elaborate initiation ceremonies In later periods Tameaki's specific ideas fell out of vogue but the habit of interpreting poetry allegorically continued This book examines the contents of these commentaries as well as the qualities of the texts they addressed that lent themselves to an allegorical interpretation the political economic and religious developments of the Kamakura period that encouraged the development of this method of interpretation and the possible motives of the participants in this school of interpretation Through analyses of six esoteric commentaries Susan Blakeley Klein presents examples of this interpretive method and discusses its influence on subsequent texts both elite and popular

The Symbolism of the Stupa Adrian Snodgrass, 1992-01-01 In his preface to The

Symbolism of the Stupa Prof Craig Reynolds writes The stupa is a symbolic form that pullulates throughout South Southeast and East Asia In its Indian manifestations it is an extreme case in terms of architectural function it has no usable has a basic simplicity In this state of the art study Adrian Snodgrass reads the stupa as a cultural artifact The monument concretizes metaphysical principles and generates multivalent meanings in ways that can be articulated with literary texts and other architectural forms This study analyses a pattern of interrelated meanings generated by the form of the stupa It does so by reference to myth to ritual and to doctrine viewing the architectural form from within the conceptual framework of the tradition to which it belongs This approach involves questions of aim and methodology A deeper understanding of a symbol is gained by studying the grid or net formed by its symbolic homologues The pattern of meaning that emerges from the juxtaposition of cognate symbols does not exhaust the significance of the symbol which is ultimately beyond worlds but it reinforces its intimations indicating a logical cohesion and integrity which in itself is an intimation of the all pervasiveness of Principle It is precisely this pattern of inter reflection or symbols that this study attempts to delineate By bringing together cognate symbols in apposition it attempts to mark out the field of symbolic interactions which the stupa generates
