Johnson,1994 *Biochemical Pharmacology as an Approach to Gastrointestinal Disorders* Timothy S. Gaginella,K. D. Rainsford,Gyula Mózsik,2012-12-06 The Gastrointestinal Section of the International Union of Pharmacology IUPHAR was established in 1994 in Montreal Canada The establishment of the GI Section recognizes the international progress of gastrointestinal pharmacology including basic and human studies The Gastrointestinal Section of IUPHAR organized the first symposium *Biochemical Pharmacology as an Approach to Gastrointestinal Diseases from Basic Science to Clinical Perspectives* on 10-12 October 1995 in Pécs Hungary The main topics were Gastrointestinal secretory and excretory functions Gastrointestinal motility Biochemical pharmacological mechanisms in neural and hormonal actions involved in GI functions Main normal and pathological biochemical mechanisms in GI functions GI mucosal injury and protection Molecular mechanisms of premalignant and malignant diseases in GI tract Use of isolated cells and cell cultures in biochemical pharmacological studies to approach GI diseases The presented papers are published in this book **Current Catalog** National Library of Medicine (U.S.),1992 First multi year cumulation covers six years 1965-70 Side-Effects of Anti-Inflammatory Drugs 3 K. D. Rainsford,G.P. Velo,2012-12-06 The contents of this book represent papers which were presented at the Third International Meeting on Side Effects of Anti Inflammatory and Analgesic Drugs which was held under the auspices of the University of Verona Institute of Pharmacology in Verona on 8-11 May 1991 This meeting was held in conjunction with the 13th European Workshop on Inflammation and although publications from this part of the meeting are not published here they appear in *Agents and Actions* we were fortunate in having a group of people interested in inflammation from varying backgrounds The success of the third meeting followed previous meetings held in Cambridge and Verona respectively and continue a tradition which has now become well established The meeting brought together physicians scientists and those concerned with the production and use of anti inflammatory drugs to a very stimulating conference to discuss basic issues affecting all aspects of side effects of anti inflammatory and analgesic drugs as well as their detection and treatment The meeting was held in the Auditorium of Glaxo Italy and we are very grateful to that company for use of their facilities as well as to the University of Verona Institute of Pharmacology for valuable secretarial and administrative help The success of the conference would not have been possible without valuable financial assistance of the companies listed separately under Acknowledgements as well as to the organizers of the 13th European Workshop on Inflammation who collaborated with us Drug Development Timothy S. Gaginella,Antonio Guglietta,1999-09-01 The application of molecular techniques to gastroenterology continues to yield important advances in the development of drugs to treat gastrointestinal disorders Important new drugs have emerged through the collaborative and complementary efforts of basic scientists clinicians and clinical researchers in academia and the pharmaceutical industry The challenge has been exciting with a few surprises along the way Consider peptic ulcer disease as an example The discovery of H<sub>2</sub> receptors and the availability of potent and selective H<sub>2</sub> receptor antagonists signaled the beginning of a new era in the treatment of gastric

hypersecretory states and peptic ulcers Introduction of proton pump inhibitors offered another therapeutic option Though H<sub>2</sub> receptor antagonists and proton pump inhibitors are important and useful drugs the discovery of the link between H<sub>2</sub> pylori infection and peptic ulcer disease has led to even more effective pharmacotherapeutic regimens Our intent in Drug Development Molecular Targets for GI Diseases is to bring together hands on experts to review promising areas of gastrointestinal pharmacology The contemporary topics covered from a mechanistic viewpoint are relevant to gastrointestinal inflammation and motility disorders Authoritative opinions are offered on both future research directions and potential applications for new therapies

**Adverse Reactions to Non-Steroidal Anti-Inflammatory Drugs: Clinical Pharmacoepidemiology** M. Kurowski, 2013-11-21 Non steroidal anti inflammatory drugs NSAIDs are among the most frequently prescribed drugs in the Western world During the past decade a large number of new compounds were marketed some of which had to be withdrawn after a short while because of adverse drug reactions These experiences led to an understanding that a complete picture of the safety of these drugs can only be obtained after their introduction into the marketplace Different methods of post marketing surveillance PMS serve as important tools for monitoring the frequency of adverse reactions and for generating and corroborating hypotheses Experience with PMS has thus far been quite limited in Germany In 1987 a non profit organization Verein zur Langzeituntersuchung von Arzneimittelwirkungen auf dem Gebiet der Rheumatologie e V VLAR was founded by interested physicians and pharmacologists to raise funds and perform investigations on the safety of NSAIDs The first project by the VLAR SPALA Safety Profile of Antirheumatics in Long Term Administration was sponsored by F Hoffmann La Roche AG Basel Switzerland In July 1990 when the project was successfully terminated almost 30 000 patients had been completely documented and their medical records entered into a computer for subsequent review by a select panel of experts with experience in monitoring adverse reactions to NSAIDs The comments criticisms and ideas of these experts were brought together at a symposium organized by the VLAR at the Klinikum Steglitz Berlin Germany on 12 October 1990

*Mechanisms of Peptic Ulcer Healing* F. Halter, A. Garner, Guido Tytgat, 1991-07-31

**Ulcer Disease** Sandor Szabo, Carl J. Pfeiffer, 1989-07-31 The latest data on the pathogenesis of ulcer disease is presented in this text with the emphasis that an understanding of the pathogenesis and etiology of ulcer diseases represents the most rational approach to pharmacology the prevention and treatment of ulcer disease Early and late biochemical and functional changes morphologic stages of the injury and healing phases as well as vascular factors in ulceration are highlighted In addition new pathogenetic elements on neuroendocrine and other endogenous modulators and circadian rhythms in ulcerogenesis are covered The section on new pharmacology consists of several chapters presenting new animal models of gastric small intestinal and colonic ulcers because in vivo models represent the basis to test and accurately detect new antiulcer drugs A large series of chapters cover new drugs for ulcer prevention and treatment This book is indispensable to investigators in basic and applied research academic and industrial pharmacologists and clinicians in gastroenterology

**Immunopharmacology of Epithelial Barriers** Roy Goldie,1994-04-05 The realisation that epithelial tissues are not simply passive barriers to the adsorption of materials into internal environments has brought about an enormous growth of investigation of mucosal functions and their active and passive protective roles Epithelia are highly organized but complex structures subserving numerous functions including immunological defence The use of pharmacological tools in these systems is increasing which is improving our understanding of epithelial immunobiology This volume adopts a step by step approach whereby each chapter builds upon the previous one progressively adding important foundation information culminating in a series of chapters concerning particular epithelia including respiratory gastrointestinal renal and ocular The result is a comprehensive but integrated treatise of epithelial function and its immunopharmacology which aims to serve as an appropriate starting point at which the clinical pulmonologist and the research scientist can obtain an appreciation of some aspects of epithelial immunopharmacology as they are currently understood

**Growth of the Gastrointestinal Tract (1990)** Jean A. Morisset, Travis E. Solomon,2017-11-22 This book provides an up to date summary of the large body of data regarding gastrointestinal hormones and growth factors involved in the development and maintenance of the architecture and physiological functions of the different organs of the digestive tract The regulation of growth and differentiation in the stomach small intestine colon and pancreas is reviewed by experts in developmental and adult physiology as well as in pathophysiology of diseases involving each organ The book provides essential reference material for gastroenterologists medical and university libraries and investigators and graduate students of gastrointestinal physiology
