Models Of Narrative:

Models of Narrative David K. Danow, 1997-01 When one reads Danow's work one grows eager to re-read the works he examines. Not only is his scholarship vast, his management of it is brilliant. Developing a theory of modeling, he develops a theory of knowing, an epistemology that has implications for any intellectual endeavor. His investigation of this important area of the humanities, moreover, is not removed from the life of humanity as is often the case with scholarly works. The linkage between the interest in literature and the interest in life is implicit throughout his book and at times is quite explicit. Danow teaches us not only how to better understand literature but how to better understand what is at stake in the study of it. David Patterson, Distinguished Professor of Russian Literature, University of Memphis. **Culture, Cognition, Narrative** Vera Nünning, 2025-11-14 Although it is well known that narrative impacts our modes of assessing and interpreting the world as well as the creation of cultural identities and cultural communities, there is little research on the way in which cognition, culture, and narratives intersect. Cultural narratology usually focuses on the relation between culture and narrative, while cognitive narratology explores the relation between cognition and narrative. However, the three concepts reciprocally influence each other: narratives shape cognition just as cognitive frames and processes shape narratives. Similarly, the culture we belong to informs our cognitive processes and the way we perceive, interpret, and react to our environment. Culture and narrative also impact each other in myriad ways. Narratives are therefore at the centre of this volume, and each chapter deals with narrative either as a cognitive or performative tool relating it to either cognition or culture or to both. The volume also explores social practices of real-world storytelling, for instance in discourses on migration and the cognitive dimension of cultures that narratives provide access to. The latter includes shared self-concepts, schemata, and cultural models. This interdisciplinary volume builds conceptual bridges between cultural studies, cognitive theory, and narrative theory. *Models of Narrative* David K. Danow, 1996-12-15 The role of models in works of literature has been largely overlooked by literary scholars. *Models of Narrative* undertakes to focus on this often central role. In analyzing the concept and practice of literary modeling, Danow leads the reader on a search for order, patterns, and familiar concepts in literary works. Addressing a wide array of literary works by such luminaries as Dostoevsky, Tolstoy, García Márquez, and Hawthorne, Danow examines these works in terms of narrative universals such as time, space, and speech. In addition, he distinguishes between theory and practice, treating the notion of literal and figural relations and offering concrete literary criticism. *Narrative Means to Journalistic Ends* Nora Berning, 2010-11-01 Nora Berning grasps the narrative potential of journalistic reportages via a set of narratological categories. Spurred by an interdisciplinary framework, she builds on transgeneric narratological research and shows that journalistic reportages can be described, analyzed, and charted with categories that originate in structuralist narratology. The author spells out minimal criteria for particular types of reportages and challenges the argument that journalism and literature have distinct, non-overlapping communicative goals. By showing

that the reportage is a hybrid text type that seeks to inform educate and entertain this study advances a re conceptualization of journalism and literature as two fields with permeable borders
