Narrative Comprehension A Discourse Perspective:

Narrative Comprehension Catherine Emmott, 1997 Despite the current explosion of interest in cognitive linguistics there has so far been relatively little research by cognitive linguists on narrative comprehension Emmott draws on insights from discourse analysis and artificial intelligence to present a detailed model of how readers build maintain and use mental representations of fictional contexts and how they keep track of characters and contexts within a complex changing fictional world The work has implications for linguistic theory since it questions several long held assumptions about anaphora arguing for a levels of consciousness model for the processing of referring expressions The book begins with a summary of current issues in text processing theory and a discussion of the methodological importance of recognizing the hierarchical structure of discourse The core of the book explores the significance of contextual monitoring in narrative comprehension and looks particularly at the cognitive demands placed on readers by flashbacks Later chapters examine the implications of contextual monitoring for reference theory and for a literary linguistic model of narrative text types The study focuses on anaphoric pronouns in narratives assessing the accumulated knowledge required for readers to interpret these key grammatical items

Narrative Progression in the Short Story Michael J. Toolan, 2009 One of our most valuable capacities is our ability partly to predict what will come next in a text But linguistic understanding of this remains very limited especially in genres such as the short story where there is a staging of the clash between predictability and unpredictability This book proposes that a matrix of narrativity furthering textual features is crucial to the reader's forming of expectations about how a literary story will continue to its close Toolan uses corpus linguistic software and methods and stylistic and narratological theory in the course of delineating the matrix of eight parameters that he sees as crucial to creating narrative progression and expectation The book will be of interest to stylisticians narratologists corpus linguists and short story scholars

Corpus Stylistics in Principles and Practice Yufang Ho, 2011-03-17 In this book Yufang Ho compares the text style difference between the two versions of John Fowles *The Magus* exemplifying the methodological principles and analytic practices of the corpus stylistic approach *The Magus* was first published in 1966 and was revised and republished by Fowles in 1977 Fowles own comment on the second edition was that it was rather more than a stylistic revision The book explores how the revised version is linguistically different from the original especially in terms of point of view re representation The corpus stylistic approach adopted combines qualitative and quantitative comparison to confirm the overall text style difference The analysis demonstrates that computer assisted methods can identify significant linguistic features which literary critics have not noticed and provide a more detailed descriptive basis for literary interpretation of either edition of the novel This analysis of *The Magus* serves as a case study and exemplar of how corpus techniques may be used generally in the study of linguistics Routledge Encyclopedia of Narrative Theory David Herman, Manfred Jahn, Marie-Laure Ryan, 2010-06-10 The past several decades have seen an explosion of interest in narrative with this multifaceted object of inquiry becoming a central concern in a wide range of disciplinary fields and research contexts As accounts of what happened to particular people in particular circumstances and with specific consequences stories have come to be viewed as a basic human strategy for coming to terms with time process and change However the very predominance of narrative as a focus of interest across multiple disciplines makes it imperative for scholars teachers and students to have access to a comprehensive reference resource **English Historical Pragmatics** Andreas H Jucker, 2013-08-12 Providing an ideal introduction to historical pragmatics this guide gives students a solid grounding in historical pragmatics and teaches the methodology needed to analyse language in social cultural and historical contexts Using a number of case studies including

The Storyworld Accord Erin James, 2015-07-01 Storyworlds mental models of context and environment within which characters function is a concept used to describe what happens in narrative Narratologists agree that the concept of storyworlds best captures the ecology of narrative interpretation by allowing a fuller appreciation of the organization of both space and time by recognizing reading as a process that encourages readers to compare the world of a text to other possible worlds and by highlighting the power of narrative to immerse readers in new and unfamiliar environments Focusing on the work of writers from Trinidad and Nigeria such as Sam Selvon and Ben Okri *The Storyworld Accord* investigates and compares the storyworlds of nonrealist and postmodern postcolonial texts to show how such narratives grapple with the often collapsed concerns of subjectivity representation and environment bringing together these narratological and ecocritical concerns via a mode that Erin James calls econarratology Arguing that postcolonial ecocriticism like ecocritical studies has tended to neglect imaginative representations of the environment in postcolonial literatures James suggests that readings of storyworlds in postcolonial texts helps narrative theorists and ecocritics better consider the ways in which culture ideologies and social and environmental issues are articulated in narrative forms and structures while also helping postcolonial scholars more fully consider the environment alongside issues of political subjectivity and sovereignty
