Radical Dissonance Theory:

A Radical Dissonance Theory Jean-Léon Beauvois, Robert Joule, 1996 This analysis of dissonance theory and reduction studies the evolution of cognitive dissonance theory It provides a review and a new interpretation of Festinger's original theory adding to the theory by emphasizing the importance of the status of behaviour The Handbook of Attitudes, Volume 1: Basic Principles Dolores Albarracín, Blair T. Johnson, 2018-10-10 Attitudes are evaluations of people places things and ideas They help us to navigate through a complex world They provide guidance for decisions about which products to buy how to travel to work or where to go on vacation They color our perceptions of others Carefully crafted interventions can change attitudes and behavior Yet attitudes beliefs and behavior are often formed and changed in casual social exchanges The mere perception that other people favor something say rich people may be sufficient to make another person favor it People's own actions also influence their attitudes such that they adjust to be more supportive of the actions People's belief systems even change to align with and support their preferences which at its extreme is a form of denial for which people lack awareness These two volumes provide authoritative critical surveys of theory and research about attitudes beliefs persuasion and behavior from key authors in these areas The first volume covers theoretical notions about attitudes the beliefs and behaviors to which they are linked and the degree to which they are held outside of awareness It also discusses motivational and cultural determinants of attitudes influences of attitudes on behavior and communication and persuasion The second volume covers applications to measurement behavior prediction and interventions in the areas of cancer HIV substance use diet and exercise as well as in politics intergroup relations aggression migrations advertising accounting education and the environment **Jesus, Gospel Tradition and Paul in the Context of Jewish and Greco-Roman Antiquity** David Edward Aune, 2013 Collection of texts published previously *Cognitive Motivation* David Beswick, 2017-08-10 Motivation and cognition were treated as separate concepts throughout most of twentieth century psychology However in recent years researchers have begun viewing the two as inextricably intertwined not only does what we want affect how we think but how we think affects what we want In this innovative study Beswick presents a new general theory of cognitive motivation synthesizing decades of existing research in social cognitive and personality psychology New basic concepts are applied to a wide range of purposive behaviour Part I of the volume reviews different forms of cognitive motivation such as curiosity cognitive dissonance achievement motivation and the search for purpose and meaning while Part II examines the basic processes that underlie it such as working memory attention and emotion The central concept is the incomplete gestalt in which motivation is generated by a universal striving to integrate information and make sense at all levels of cognitive organization **Stevens' Handbook of Experimental Psychology and Cognitive Neuroscience, Developmental and Social Psychology**, 2018-03-13 IV Developmental self evaluation moral development emotion cognition interactions person perception memory implicit social cognition motivation group processes development of scientific thinking language

acquisition development of mathematical reasoning emotion regulation emotional development development of theory of mind category and conceptual development attitudes executive function The Psychology of Attitudes and Attitude Change Joseph P. Forgas, Joel Cooper, William D. Crano, 2011-01-07 Human beings have a unique ability to create elaborate predispositions and evaluations based on their social experiences The concept of attitudes is central to understanding how experience gives rise to these predispositions and psychologists have spent the best part of the past 100 years trying to understand the intricacies of this process Yet despite decades of research we still do not fully understand how attitudes are created maintained and changed The main objective of this book is to review and integrate some of the most recent cutting edge developments in research on attitudes and attitude change presenting the work of eminent scholars in this field Chapters in this book deal with such intriguing questions as What role do associative processes play in the formation of attitudes How do attitudes function as global and local action guides What is the function of implicit evaluations and vicarious experiences in producing attitude change Are implicit associations a useful way to measure attitudes What role does affect play in attitude formation and change What role do social interaction processes play in persuasion and how does persuasion work in real life settings The book is essential reading for students and researchers in social psychology as well as practitioners in every field where understanding and changing attitudes is important such as clinical counseling organizational marketing forensic and developmental psychology **Leadership, Organizational Change and Sensemaking** Ronald Skea, 2021-06-03 Organizational change literature often focuses on the leaders role in giving sense to others of the need for change and there is a plethora of models and recipes on how to influence employees thinking about change organizational design and performance Notwithstanding this ready supply of advice research has shown that up to 90% of change programs fail to deliver their expected outcomes One of the reasons for this which has been neglected in the literature is that successful change in thinking starts with how leaders first make sense of the need for change and the challenges this poses to their own thinking This book surfaces the elements behind leader sensemaking that add to or detract from their ability to critically question their current thinking Leaders and interventionists have lacked practical and pragmatic advice on how to influence the process This book is the culmination of 10 years of research spent working with leaders in organizations as they interpreted the need for change and made choices about engaging or not with transformational change methodologies It reveals nine elements of sensemaking displayed by organizational leaders as they grapple with challenges to their current orthodoxies about how to lead and organize in times of change The book shows the latest state of knowledge on the topic and will be of interest to researchers academics practitioners and students in the fields of leadership change and organisational development Motivational Analyses of Social Behavior Rex A. Wright, Jeff Greenberg, Sharon S. Brehm, 2004-04-12 This book honors Jack W Brehm s contributions to psychology all of which revolve around a central theme of motivation and social behavior It begins with two personal chapters and then presents a collection

of cutting edge substantive chapters authored by researchers whose work Brehm has strongly influenced It concludes with a chapter by Jack Brehm that reflects on the field of psychology discusses a new theory of social influence and offers ideas about the direction in which our understanding of human behavior could move Motivational Analyses of Social Behavior will be of value to research scientists educators and practitioners interested in social motivational processes and those who developed major theories in this area Interested readers include individuals specializing in social clinical organizational personality health and motivational psychology and psychophysiology The book would also be ideal for advanced courses on social motivation and the history of psychology
