**Nuclear Politics in America** Robert J. Duffy,1997 Duffy s work traces nuclear politics from the creation of a powerful subgovernment through the public lobby reforms of the late 1960s and early 1970s and the deregulatory backlash of the Reagan years He demonstrates that while policies did change in the 1970s they did not change as much as other accounts have suggested and that the industry continued to receive considerable federal support The book is particularly significant for extending the discussion of nuclear policy through the Bush and Clinton years including the controversy over waste disposal new licensing procedures enacted in the 1992 Amendments to the Atomic Energy Act and the effects of deregulation of electric utilities Amazon com viewed August 24 2020 **Nuclear Waste Management Reorganization Act of 1979** United States.  Gary Bryner, 2019-06-21 This book began several years ago as a project organized by members of the Science and Technology Studies section of the American Political Science Association It is part of an ongoing attempt by members of the section and others to focus scholarly attention on the political and social implications of technological change and scientific advances Part of the concern is to identify theories conceptual frameworks and concepts from political science that can usefully be applied to the study of science and technology Part of the concern is to explore how science and technology related concerns help illuminate and test some of the enduring theories of political science We hope to contribute to the development of a strong theoretical underpinning for science and technology studies We hope that such an enrichment of the theoretical bases for understanding science and technology related phenomena will also contribute to more effective and appropriate public policies for regulating and encouraging scientific and technological developments This book is an attempt to marry theoretical exposition and applied policy inquiry      *The Environmental Pendulum* R. Allan Freeze, 2023-04-28 The pendulum of environmental policy swings from one extreme to the other depending on which camp is in power and who has the ear of the media Underkill is followed by overkill Concern breeds action disillusion breeds reaction The Environmental Pendulum provides a thoughtful and evenhanded assessment of this conflict Tens of thousands of sites across the country are contaminated with toxic chemicals Environmentalists warn us that this legacy of carelessness is seriously affecting both human health and the ecological balance of nature They point out that even improved industrial practices will not eliminate future chemical releases to the environment Their demand for regulatory control has received wide public support and led to the passage of the Superfund legislation in 1980 Now after twenty years the value of the Superfund program is being challenged by corporate America which argues that excessive cleanup costs have the potential to bankrupt the nation R Allan Freeze outlines the difficulties associated with the management of hazardous waste and offers a balanced account of the controversy over the role of environmental contamination in human health Freeze clarifies what matters and what doesn't with respect to chemical contaminants in the environment arguing that environmental policies should be based on an accurate appraisal of the risks associated with these toxins He concludes the book with a brilliant summation of the good news and the bad news of environmental pollution describing what can and can't be done to bring the situation under control This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 2000 The pendulum of environmental policy swings from one extreme to the other depending on which camp is in power and who has the ear of the media Underkill is followed by overkill Concern breeds action disillusion breeds reaction The Environmental Pe      **Fuel Cycle to Nowhere** Richard B.
