that will enable new information to be considered in a global perspective The book concludes with a historical account of human interaction with the rainforest from late Pleistocene times to the 1980s Biogeographers botanists and ecologists at all levels will find this to be a rich source of information and an inspiration for continuing efforts to conserve existing rainforests around the world *Phytochemistry of Australia's Tropical Rainforest* Cheryll J. Williams, 2021-12-01 Rare unique and irreplaceable precious native rainforests occupy a precariously small part of Australia while retaining a remarkable level of both biological and chemical diversity unrivalled by any other ecosystem Australia's ancient history and traditions are intimately intertwined with the rainforest plants that humans have utilised as both food and medicine *Phytochemistry of Australia's Tropical Rainforest* is a record of this history and details how our understanding of these plants has led to the discovery of anaesthetics analgesics steroids antimalarials and more It provides an insight into the habitat ecology and family associations of hundreds of species and explores their future therapeutic potential alongside phytochemical studies of the ancient plant lineages Toxicological evaluations of important poisonous plants are also included Rainforests provide shelter for unique flora and fauna that are counted among the rarest species on Earth many of which are illustrated in this book This comprehensive work is an essential reference for phytochemists ethnobotanists and those with an interest in rainforests and their medicinal and botanical potential *Journal of the Royal Society of New Zealand* ,1993-12 **Peopled Landscapes** Simon Haberle, Bruno David, 2012-01-01 This volume brings together a collection of papers from a diverse field of international scholars exploring the multiple ways that East Timorese communities are making and remaking their connections to land and places of ancestral significance The work is explicitly comparative and highlights the different ways Timorese language communities negotiate access and transactions in land disputes and inheritance especially in areas subject to historical displacement and resettlement Consideration is extended to the role of ritual performance and social alliance for inscribing connection and entitlement Emerging through analysis is an appreciation of how relations to land articulated in origin discourses are implicated in the construction of national culture and differential contributions to the struggle for independence Publisher's description *The Flowering of Australia's Rainforests* Geoff Williams, 2021-05-03 *The Flowering of Australia's Rainforests* provides a comprehensive introduction to the pollination ecology evolution and conservation of Australian rainforest plants with particular emphasis on subtropical rainforests and their associated pollinators This significantly expanded second edition includes new information on the impact of climate change fire fragmentation and invasive species Rainforests continue to be a focus of global conservation concern not only from threats to biodiversity in general but to pollinators specifically Within Australia this has been emphasised by recent cataclysmic fire impacts ongoing extreme drought events and the wider consideration of climate change This second edition strengthens coverage of these issues beyond that of the first edition *The Flowering of Australia's Rainforests* makes timely contributions to our understanding of the nature and function of the world's pollinator fauna plant reproduction dependencies and the

evolutionary pathway that has brought them to their current state and function Illustrated with 150 colour plates of major species and rainforest formations this reference work will be of value to ecologists and field naturalists botanists conservation biologists ecosystem managers and community groups involved in habitat restoration *The Rainforest Legacy* Australian Heritage Commission,1991 **Flammable Australia** Ross A. Bradstock,Jann E. Williams,Malcolm A. Gill,2002 Fire is pivotal to the functioning of ecosystems in Australia affecting the distribution and abundance of the continent s unique and highly diverse range of plants and animals Conservation of this natural biodiversity therefore requires a good understanding of scientific processes involved in the action of fire on the landscape This book provides an up to date synthesis of current knowledge in this area and its application in contemporary land management Central to the discussion is an exploration of the concept of the fire regime and its interactions with biodiversity *Conservation Biology* Peggy L. Fiedler,Peter M. Kareiva,2012-12-06 Refecting what a new generation of conservation biologists is doing and thinking this vital and far ranging second edition explores where conservation biology is heading It challenges many conventions of conservation biology by exposing certain weaknesses of widely accepted principles Combining contributions from both the school and the new breed of conservation biologists this insightful text focuses primarily on topics the are integral to the daily activities of conservation biologists Several chapters address ecosystem restoration and biotic invasions as well as the the mechanics of population viability analyses which are now a routine facet of conservation efforts A case history approach is implemented throughout the book with the use of practical real world examples Furthermore an in depth look at quantitative analyses is presented allowing for models and mathematical analyses to pinpoint limitations in existing data and guide research toward those aspects of biology that are most likely to be critical to the dynamics of a species or an ecosystem

Dowe,2010 An updated and thorough systematic and taxonomic treatment of the Australian palm flora covering 60 species in 21 genera Author from James Cook University Australia Nature-based Tourism in Peripheral Areas Colin Michael Hall,Stephen W. Boyd,2005-01-01 Nature based Tourism in Peripheral Areas provides a

comprehensive examination of this form of tourism development as it occurs within alpine forest sub polar island coastal and marine environments This book goes beyond much of the debate surrounding ecotourism and the impacts of tourism in vulnerable environments to place nature based tourism in a wider regional context particularly when for many peripheral regions tourism remains one of the key opportunities for economic development Therefore a central theme that is present throughout many of the chapters is the role that nature based tourism can play as the catalyst for larger regional development of regions The book will serve as essential reading to senior undergraduate and postgraduate students taking courses in tourism and related degrees where the major focus is on tourism that occurs within peripheral regions It will also serve as a key reference to researchers and professionals interested in the role of tourism as a regional development tool
