Balk, 2014-02-18 For some life s introduction to death and grief comes early and when it does it can take many forms Not only does Dealing with Dying Death and Grief during Adolescence

tackle them all it does so with David Balk's remarkable sensitivity to and deep knowledge of the pressures and opportunities adolescents face in their transition from childhood to adulthood. In seamless jargon-free language, Balk brings readers up to date with what we know about adolescent development because over time such changes form the backstory we need to comprehend the impact of death and bereavement in an adolescent's life. The book's later chapters break down the recent findings in the study of life-threatening illness and bereavement during adolescence. And crucially, these chapters also examine interventions that assist adolescents coping with these difficulties. Clinicians will come away from this book with both a grounded understanding of adolescent development and the adolescent experience of death, and they'll also gain specific tools for helping adolescents cope with death and grief on their own terms. For any clinician committed to supporting adolescents facing some of life's most difficult experiences, this integrated up-to-date and deeply insightful text is simply the book to have. David E. Balk is professor in the department of health and nutrition sciences at Brooklyn College, CUNY, where he directs the graduate program in thanatology. He is the author of *Adolescent Development: Early Through Late Adolescence*, *Helping the Bereaved College Student*, and several other books on death and bereavement. He is also co-editor of the 2nd edition of the *Handbook of Thanatology* (Routledge, 2013).

[Invitation to the Life Span](#) Kathleen Stassen Berger, 2009-11-23

Check out a preview. KATHLEEN STASSEN BERGER's bestselling textbooks are unmatched for the engrossing, culturally inclusive way they communicate the essential science of human development. But that does not even begin to convey what the Berger experience is. What makes these bestselling textbooks so distinctive is the unmistakable presence of KATHLEEN STASSEN BERGER on every page, in writing that continually draws on the author's teaching and family life to demonstrate a remarkable understanding, not just of the field but of students' questions, their concerns, and their lives. The distinctive, definitive BERGER touch is evident throughout her new textbook *Invitation to the Life Span*. This brief, original 15-chapter textbook was created from page 1 to address the challenges teachers and students face when covering the entire life span in a semester or even a quarter. The hallmark Berger qualities are all here: the relatable presentation of research, the inclusive approach to world cultures, the study help that builds critical thinking and observational skills, the outstanding media and supplements, and all held together with Berger's skill in bringing students and the science together.

Handbook of Forensic Sociology and Psychology Stephen J. Morewitz, Mark L. Goldstein, 2013-08-20

The role of behavioral and social sciences in the courtroom setting has expanded exponentially in the past few decades. It is now widely recognized that scientists in these areas provide critical contextual information for legal decision making, and that there is a reliable knowledge base for doing so. While there are many handbooks of forensic psychology, this is the first such volume to incorporate sociological findings, broadening the conceptual basis for examining cases in both the civil and criminal realms, including immigration issues, personal injury, child custody, and sexual harassment. This volume will examine the responsibilities of expert witnesses and consultants and how they may utilize principles, theories, and methods from both

sociology and psychology It will show these disciplines together can improve the identification and apprehension of criminals as well as enhance the administration of justice by clarifying profiles of criminal behavior particularly in cases of serial killers death threat makers stalkers and kidnappers The volume is quite comprehensive covering a range of medical school environmental and business settings Throughout it links basic ideas to real applications and their impact on the justice system
