Sports Law in the European Union Andrea Cattaneo, Richard Parrish, 2020-09-22 Derived from the renowned multi volume International Encyclopaedia of Laws this practical analysis of sports law in the European Union deals with the regulation of sports activity by both public authorities and private sports organizations The growing internationalization of sports inevitably increases the weight of global regulation yet each country maintains its own distinct regime of sports law and its own national and local sports organizations Sports law at a national or organizational level thus gains a growing relevance in comparative law The book describes and discusses both state created rules and autonomous self regulation regarding the variety of economic social commercial cultural and political aspects of sports activities Self regulation manifests itself in the form of by laws and encompasses organizational provisions disciplinary rules and rules of play However the trend towards more professionalism in sports and the growing economic social and cultural relevance of sports have prompted an increasing reliance on legal rules adopted by public authorities This form of regulation appears in a variety of legal areas including criminal law labour law commercial law tax law competition law and tort law and may vary following a particular type or sector of sport It is in this dual and overlapping context that such much publicized aspects as doping sponsoring and media and responsibility for injuries are legally measured This monograph fills a gap in the legal literature by giving academics practitioners sports organizations and policy makers access to sports law at this specific level Lawyers representing parties with interests in the European Union will welcome this very useful guide and academics and researchers will appreciate its value in the study of comparative sports law

Rose Army,2000 **Law for Sale** Johanna Stark,2019-02-21 Common markets open borders air traffic and the internet have made it faster and less expensive to change places and jurisdictions As a result legal forums are increasingly treated as a good that is subject to the market mechanism Individuals and corporations increasingly have free reign to choose which legal rules to apply to their company their contract their marriage or their insolvency proceedings States in turn grant these opportunities and respond to demand by competing with other suppliers of legal regimes Regulatory competition describes a dynamic in which states as producers of legal rules compete for the favour of mobile consumers of their legal products This book focuses on the philosophical underpinnings problems and consequences of such regulatory competition It argues that there is a mismatch between regulatory competition as a policy approach and the beliefs and commitments that shape our thinking about law and the state It concludes that law markets are potentially at odds with both our conception of the functions of legal rules and of key political ideals and principles such as democracy state autonomy and political authority
