Enzyme Synthesis and Degradation in Mammalian Systems M. Rechcigl Jr., 1971-03-23 *Drugs for the Control of Epilepsy* Carl L. Faingold, Gerhard H. Fromm, 2019-06-04 Originally published in 1991 This book brings together the ideas of an international group of experts on clinical and experimental epilepsy These authors consider how antiepileptic drugs may act on elements of neuronal networks to reduce seizure incidence and severity The book addresses such topics as the four general classes of anticonvulsant drug mechanisms major epilepsy models the proposed mechanisms of action of major antiepileptic drugs and the clinical use of antiepileptic drugs in the treatment of various forms of human epilepsy This volume is special for its focus on the neuronal network approach to epilepsy as well as for its comprehensive review and integration of human and animal data Neurologists pharmacologists psychiatrists and other investigators actively working on epilepsy research will find this book to be a useful thought provoking reference volume **CSIR NET Life Science - Unit 4 -**

consumption of greenhouse gases can be achieved In this Research Topic supported by the Swedish research councils programme Biodiversity and Ecosystem Services in a Changing Landscape BECC we intend to promote this alternative framework to address how cycling of carbon and nutrients will be altered in a changing environment from the first principle mechanisms that drive them namely the ecology physiology and biogeography of microorganisms and on up to emerging global biogeochemical patterns This novel and unconventional approach has the potential to generate fresh insights that can open up new horizons and stimulate rapid conceptual development in our basic understanding of the regulating factors for global biogeochemical cycles The vision for the research topic is to facilitate such progress by bringing together leading scientists as proponents of several disciplines By bridging Microbial Ecology and Biogeochemistry connecting microbial activities at the micro scale to carbon fluxes at the ecosystem scale and linking above and belowground ecosystem functioning we can leap forward from the current understanding of the global biogeochemical cycles **Metabolome**

Laboratory Guide to Enzymology Geoffrey A. Holdgate, Antonia Turberville, Alice Lanne, 2024-03-05 LABORATORY GUIDE TO ENZYMOLOGY An accessible guide to understanding the foundations of enzymology at its application in drug discovery Enzymes are highly specialized proteins necessary for performing specific biochemical reactions essential for life in all organisms In disease the functioning of these enzymes can become altered and therefore enzymes represent a large class of key targets for drug discovery In order to successfully target dysfunctional enzymes pharmaceutically the unique mechanism of each enzyme must be understood through thorough and in depth kinetic analysis The topic of enzymology can appear challenging due its interdisciplinary nature combining concepts from biology chemistry and mathematics Laboratory Guide to Enzymology brings together the theory of enzymology and associated lab based work to offer a practical accessible guide encompassing all three scientific disciplines Beginning with a brief introduction to proteins and enzymes the book slowly immerses the reader into the foundations of enzymology and how it can be used in drug discovery using modern methods of experimentation The result is a detailed but highly readable volume detailing the basis of drug discovery research Laboratory Guide to Enzymology readers

will also find Descriptions of key concepts in enzymology Examples of drugs targeting different enzymes via different mechanisms Detailed discussion about many areas of enzymology such as binding and steady state kinetics assay development and enzyme inhibition and activation Laboratory Guide to Enzymology is ideal for all pharmaceutical and biomedical researchers working in enzymology and assay development as well as advanced students in the biochemical or biomedical sciences looking to develop a working knowledge of this field of research
