Regulation Of The Contractile Cycle In Smooth Muscle:

Regulation of the Contractile Cycle in Smooth Muscle Takeshi Nakano, David J. Hartshorne, 2012-12-06 At the Mie International Symposium held in Japan in April 1994 leading scientists reviewed recent advances in the understanding of the contractile mechanism in smooth muscle The present volume collects the papers presented at the symposium summarizing the latest advances in smooth muscle function and emphasizing important components of the contraction relaxation cycle Topics include a discussion of the smooth muscle cell membrane with emphasis on its ion channels the regulation of cytosolic Ca^{2+} levels and the relationship to force in smooth muscle aspects of the two key regulatory enzymes involved with myosin phosphorylation dephosphorylation the molecular basis for pharmacomechanical coupling in smooth muscle developments in the basic contractile mechanisms involving the crossbridge cycle of tonic and phasic muscle the role of myosin light chains and many others The approach is broad and presents contemporary opinions in pharmacology physiology and biochemistry as they relate to smooth muscle function The book will appeal not only to those working in these disciplines but to vascular clinicians obstetric gynecological physicians and gastroenterologists as well Airways Smooth Muscle: Biochemical Control of Contraction and Relaxation David Raeburn, Mark A. Giembycz, 2013-11-11 Calcium Regulation of Cellular Function , 2000-04-01 Volume 30 examines the prominent role of calcium as an intracellular second messenger Leading investigators review a wide variety of studies on how calcium enters and moves through cells how it interacts with its many binding proteins and how calcium and its intracellular receptor calmodulin control vital cellular processes Coverage includes a detailed analysis of the mechanisms by which calcium bound to calmodulin regulates contractile proteins in smooth muscle cells Close attention is given to the roles of calcium and calmodulin dependent protein kinases and phosphatases in synaptic signal transduction protein synthesis gene expression programmed cell death activation of T lymphocytes and control of cell division cycles Other chapters discuss studies using genetically manipulable nonmammalian organisms to further probe the functions of calcium and calmodulin Molecular and Cellular Aspects of Muscle Contraction Haruo Sugi, 2012-12-06 This volume presents the proceedings of a muscle symposium which was supported by the grant from the Fujihara Foundation of Science to be held as the Fourth Fujihara Seminar on October 28 November 1 2002 at Hakone Japan The Fujihara Seminar covers all fields of natural science while only one proposal is granted every year It is therefore a great honor for me to be able to organize this meeting Before this symposium I have organized muscle symposia five times and published the proceedings Cross bridge Mechanism in Muscle Contraction University of Tokyo Press 1978 Contractile Mechanisms in Muscle plenum 1984 Molecular Mechanisms of Muscle Contraction plenum 1988 Mechanism of Myofibril Sliding in Muscle contraction plenum 1993 Mechanisms of Work Production and Work Absorption in Muscle plenum 1998 As with these proceedings this volume contains records of discussions made not only after each presentation but also during the periods of General Discussion in order that general readers may properly evaluate each presentation and the up to date situation of this

research field It was my great pleasure to have Dr Hugh Huxley a principal discoverer of the sliding filament mechanism in muscle contraction in this meeting On my request Dr Huxley kindly gave a special lecture on his monumental discovery of myofibrillar lattice structure by X ray diffraction of living skeletal muscle I hope general readers to learn how a breakthrough in a specific research field can be achieved

Vascular Smooth Muscle: Metabolic, Ionic, and Contractile Mechanisms M.F. III Crass, 2012-12-02 Vascular Smooth Muscle Metabolic Ionic and Contractile Mechanisms addresses the vascular smooth muscle function by describing plasma lipoprotein structure synthesis and transport in relation to the concepts of altered vascular smooth muscle lipid metabolism leading to the genesis of atherosclerotic disease This book is organized into six chapters and begins with an introduction to the complexities of energy metabolism and how metabolic events can be correlated with a simultaneous quantitative assessment of smooth muscle mechanics and the contractile machinery at the molecular level The next two chapters offer the reader a view of smooth muscle membrane properties in terms of the distribution transport and metabolic control of electrolytes and specific aspects of ion conductance and electrical activity This text also explains how smooth muscle cells regulate their contractile activity through regulation of calcium ion fluxes and the interaction at the molecular level of calcium ions with regulatory proteins associated with the contractile apparatus Reference is made to the relation of possible anomalies in cellular or subcellular smooth muscle metabolic and or ionic events to the bases of certain types of vascular disease A chapter that examines the events leading to vascular pathology in the form of atherogenesis concludes the book This book is intended for researchers and clinicians engaged in the study of smooth muscle and related areas

Biochemistry of Smooth Muscle Contraction Michael Barany, 1996-01-04 This valuable resource provides a systematic account of the biochemistry of smooth muscle contraction As a comprehensive guide to this rapidly growing area of research it covers the structure and characteristic properties of contractile and regulatory proteins with special emphasis on their predicted function in the live muscle Also included in this book are intermediate filament proteins and desmin and vimentin whose function in smooth muscle is unknown and several enzymes involved in the phosphorylation dephosphorylation of contractile and other proteins

Regulation of Smooth Muscle Contraction Robert S. Moreland, 2012-12-06 Sixth Annual Graduate Hospital Research Symposium REGULATION OF SMOOTH MUSCLE PROGRESS IN SOLVING THE PUZZLE Every so often a scientific conference comes at a time when everyone has new and exciting information when old dogmas do not seem to be as well established and when speakers and participants alike are ready to challenge interpretations of old and new experimental data This was such a conference What turns on a smooth muscle cell The precise answer to this question has eluded scientists for much longer than I have been involved in the field We know that an increase in cytosolic calcium is necessary and we know that phosphorylation of the 20 kDa myosin light chain is an important step in the process We do not know if other processes are necessary for the initiation and for maintenance of a smooth muscle contraction nor do we know if other processes modulate the regulation of

contraction The goal of the symposium on which this volume is based was to explore the most current hypotheses for the answers to these questions I believe that after reading the chapters included in this volume you will agree that this goal was achieved The importance of calcium and calmodulin dependent myosin light chain phosphorylation in the regulation of smooth muscle contraction was reinforced by many presentations However the status of myosin light chain phosphorylation as a simple calcium dependent switch came under serious suspicion

Molecular Mechanisms of Smooth Muscle Contraction Kazuhiro Kohama, Yasuharu Sasaki, 1999 **Muscle Contraction** Clive R. Bagshaw, 1993 Movement in living organisms is achieved by many different mechanisms of which muscle contraction is one of the most studied and best understood Nevertheless the precise details of muscle action at the molecular level are still being evaluated This book provides a concise account of our understanding to date

The Smooth Muscle of the Artery Stewart Wolf, 2013-03-09 This volume contains the edited proceedings of a workshop conference THE SMOOTH MUSCLE OF THE ARTERIAL WALL held at Max Planck Haus Heidelberg West Germany on the occasion of the dedication of the new Myocardial Infarct Institute of the University of Heidelberg The conference was a sequel to one held three years earlier at Lindau West Germany on THE ARTERY AND THE PROCESS OF ARTERIO SCLEROSIS The earlier conference examined available data and conflicting theories on the pathogenesis of arteriosclerosis A major yield of this gathering was a consensus that smooth muscle cell proliferation in the sub endothelial space is a fundamental feature of atherogenesis It was therefore decided in a second conference to bring together existing knowledge of arterial smooth muscle and of the structure and function of smooth muscle in general Accordingly an international and interdisciplinary group of experts were gathered together to assess current knowledge to attempt reconciliation of disparate data and synthesis of widely scattered information and to identify critical areas of ignorance As before the conference was conducted in the form of a dialogue with only a minimal number of formal presentations Grateful acknowledgement for financial support of the conference is extended to The Government of Baden Wurttemberg West Germany The Marine Biomedical Institute of the University of Texas Medical Branch Galveston Texas The Office of Naval Research Washington D C
