**Together with the Regulations of the Boards of Studies and Boards of Faculties** University of Oxford,1910      **The Palgrave Companion to Cambridge Economics** Robert A. Cord,2017-02-20 Cambridge University has and continues to be one of the most important centres for economics With nine chapters on themes in Cambridge economics and over 40 chapters on the lives and work of Cambridge economists this volume shows how economics became established at the university how it produced some of the world s best known economists including John Maynard Keynes and Alfred Marshall plus Nobel Prize winners such as Richard Stone and James Mirrlees and how it remains a global force for the very best in teaching and research in economics With original contributions from a stellar cast this volume provides economists especially those interested in macroeconomics and the history of economic thought with the first in depth analysis of Cambridge economics      *The Encyclopedia of Public Choice* Charles Rowley,Friedrich Schneider,2008-01-25 The Encyclopedia provides a detailed and comprehensive account of the subject known as public choice However the title would not convey sufficiently the breadth of the Encyclopedia s contents which can be summarized better as the fruitful interchange of economics political science and moral philosophy on the basis of an image of man as a purposive and responsible actor who pursues his own objectives as efficiently as possible This fruitful interchange between the fields outlined above existed during the late eighteenth century during the brief period of the Scottish Enlightenment when such great scholars as David Hume Adam Ferguson and Adam Smith contributed to all these fields and more However as intellectual specialization gradually replaced broad based scholarship from the nineteenth century onwards it became increasingly rare to find a scholar making major

contributions to more than one. Once Alfred Marshall defined economics in neoclassical terms as a narrow positive discipline, the link between economics, political science, and moral philosophy was all but severed, and economists redefined their role into that of the humble dentist providing technical economic information as inputs to improve the performance of impartial, benevolent, and omniscient governments in their attempts to promote the public interest. This indeed was the dominant view within an economics profession that had become besotted by the economics of John Maynard Keynes and Paul Samuelson immediately following the end of the Second World War.

*Austrian Economics in America* Karen I. Vaughn, 1998-01-28 This book examines the development of the ideas of the new Austrian school from its beginnings in Vienna in the 1870s to the present. It focuses primarily on showing how the coherent theme that emerges from the thought of Carl Menger, Ludwig von Mises, Friedrich Hayek, Ludwig Lachmann, Israel Kirzner, and a variety of new younger Austrians is an examination of the implications of time and ignorance or processes and knowledge for economic theory.

*Humane Economics* Jack C. High, Don Lavoie, 2006-10-27 Don Lavoie's published work encompassed a wide range of subjects: socialism, hermeneutics, information technology, and culture. The subjects appear unrelated, but a close examination of his research reveals an underlying unity of thought and an economics at sharp variance with the post-World War II mainstream. By linking economics to other disciplines, Lavoie demonstrated that economics is closer to the humanities than to the physical sciences. The contributors to this volume explore Don Lavoie's legacy and its implications for economics.

**Institutions and Development in Africa** John Mukum Mbaku, 2004 A significant contribution to the debate on poverty alleviation in Africa. Professor Mbaku offers practical policies for economic growth. He argues that the most important contributor to poverty and deprivation in Africa is the absence of institutional structures that enhance indigenous entrepreneurship and wealth creation. He explains that these are so vital that living standards will continue to deteriorate unless these building blocks are put in place.
