Governing through Regulation Eric Windholz,2017-06-26 Over the past forty years numerous theoretical advances have been made From Ayres and Braithwaite s ground breaking work on responsive regulation we have seen models of smart regulation regulatory governance and regulatory capitalism emerge to capture the growing prevalence and importance of regulation in modern liberal Western capitalist societies Important advances also have been made in the practice of regulation with regulators evolving from traditional enforcement focussed command and control models to being modern regulators with a suite of diverse and innovative regulatory tools at their disposal The book presents and critically examines these theoretical and practical developments from the perspective of governments who design regulations and the regulators that deploy them In doing so the book examines the various forces and interests that influence and shape the regulatory endeavour and the practical challenges facing governments and regulators when deciding whether and how to regulate This volume is a study of regulation in context in the context of the public policy it is designed to deliver the law that enables shapes and holds it to account and the evolving societal and institutional frameworks within which it takes place Aimed to

provide innovative cross disciplinary conceptual frameworks that regulators regulatees those whom regulation is intended to benefit and academics might employ to better understand and undertake the regulatory endeavour This will be of great interest to researchers educators advanced students and practitioners working in the fields of political science public management and administration and public policy

Private Regulation and Enforcement in the EU Madeleine de Cock Buning,Linda Senden,2020-06-25 Globalisation and technological innovation have been fuelling the need for increasing levels of trust in private actors such as companies or special interest groups to regulate and enforce significant aspects of people s daily lives from environmental and social protection to the areas of food safety advertising and financial markets This book investigates the trust vested in private actors from the perspective of European citizens It answers the question of whether private actors live up to citizens expectations or whether more should be done as to the safeguarding of citizens interests Several cross cutting studies explore how private regulation and enforcement are embedded in EU law The book offers an innovative approach to private regulation and enforcement by focusing on the specific EU context which unlike the national and transnational ones has not yet been widely explored This context merits a stand alone analysis because of the unique normative framework of the EU as a particular polity itself but also in relation to its Member States With an overall analysis of the main aspects of private regulation and enforcement across different policy fields of the EU the book adds a missing tile to the mosaic of public private governance studies

Better Regulation Stephen Weatherill,2007-06-28 The discourse of Better Regulation is a hot topic intimately associated with the drive for cost savings and a more efficient economy In the UK and in the EU rule makers have lately endeavoured to achieve a more satisfactory balance between the demands of proper protection from market failure and inequity on the one hand and commercial freedom and the potential for innovation on the other But who is the regulator listening to and what effect does

this have on the regulatory pattern governing the integrating EU market What is best practice in the matter of regulatory assessment The essays in this collection explore these and other questions and will foster greater understanding of UK and EU regulation the accountability issues involved and problems of enforcement It is no coincidence that since efforts to construct a Constitution for Europe have stalled the attention of policy makers politicians and the business community has turned instead to the quest for Better Regulation or perhaps it might be said a Better European Union

Public Policy and Economic Institutions Melvin J. Dubnick, Alan R. Gitelson, 1991

Risk Analysis and Governance in EU Policy Making and Regulation Bernardo Delogu, 2016-05-02 This book provides an easy but comprehensive and rigorous access to the main concepts terminology methods and procedures of risk analysis intended for all those involved in the EU policy and regulatory decision making on risks It establishes a common ground of knowledge which enables a more informed dialogue on risks a closer collaboration between decision makers and scientists and a better appraisal of the potential and limits of risk science The book also brings together in an accessible way much multidisciplinary knowledge which had been dispersed over many technical documents and specialist books The EU is in the front line of health safety and environmental risk management GMOs food safety hazardous chemicals climate change radiation hazards are just a few of the popular risk issues addressed by the EU through policy and regulatory measures The risk analysis paradigm including risk assessment management and communication has been at the core of the EU decision making for a long time already EU Institutions strive for a science based approach to risk management Nevertheless the dialogue and collaboration on risk issues between policy makers stakeholders and scientists are still difficult and the potential and limits of science in support of decision making as well as the basic concepts of risk analysis are not fully understood outside the narrow specialist circles
