Regule The Rule And Summa The Summa:

Regule Robertus de Handlo,1991-01-01 The Regule of Robertus de Handlo and the Summa of Johannes Hanboys are among the few major texts of medieval English music theory The first directly influenced the latter and both deal with unique notational practices found in English music of the fourteenth century These two texts were edited by Edmon de Coussemaker in the nineteenth century in editions that have come to be recognized as seriously deficient Now Peter M Lefferts has paired them in a new critical edition that is far superior in its accuracy and scholarly underpinnings The Regule of 1326 provides one of the two most comprehensive views of late ars antiqua notational developments Handlo takes as his point of departure the first part on notation of one of those widely circulated abbreviated versions of the teachings of Franco of Cologne that begin in most sources with the motto *Gaudent brevitare moderni* The Summa of Hanboys written around 1375 takes Handlo as a point of departure and incorporates an abbreviated redaction of the Regule along with citations of other later English authorities into an exhaustively systematic survey of ars nova forms and rests Building on a line of development in English theory Hanboys expanded the mensural system to a total of eight figures For this edition Lefferts has thoroughly reexamined edited and appraised the single extant source of each treatise Full descriptions of these sources are provided and the documents are illustrated with a plate from each Each treatise is presented in its original Latin with a fully annotated translation on facing pages Leffert s introduction discusses the authors places the treatise in the context of the theoretical traditions of fourteenth century France and England and reviews their contents in detail Indexes of terms names and subjects are included Appendixes provide a concordance to the music examples from the Regule that recur in the Summa and transcriptions of two English motet fragments that exhibit insular notational practices discussed in the treatises Leffert s work will be seen as a major contribution to our understanding of medieval English music *French Motets in the Thirteenth Century* Mark Everist,2004-11-11 This is the first full length study of the vernacular motet in thirteenth century France The motet was the most prestigious type of music of that period filling a gap between the music of the so called Notre Dame School and the Ars Nova of the early fourteenth century This book takes the music and the poetry of the motet as its starting point and attempts to come to grips with the ways in which musicians and poets treated pre existing material creating new artefacts The book reviews the processes of texting and retexting and the procedures for imparting structure to the works it considers the way we conceive genre in the thirteenth century motet and supplements these with principles derived from twentieth century genre theory The motet is viewed as the interaction of literary and musical modes whose relationships give meaning to individual musical compositions **Rules of the Committee on Government Reform and Oversight, House of Representatives, Together with Selected Rules of the House of Representatives (including Clause 2 of House Rule XI) and Selected Statutes of Interest** United States. Luther and the Reformation of the Later Middle Ages Eric Leland Saak, 2017-04-19 In 1517 Martin Luther posted his 95 Theses an act often linked with the start of the Reformation In this work Eric Leland Saak argues that the 95 Theses do not signal Luther's break from Roman Catholicism An obedient Observant Augustinian Hermit Luther's self understanding from 1505 until at least 1520 was as Brother Martin Luther Augustinian not Reformer and he continued to wear his habit until October 1524 Saak demonstrates that Luther's provocative act represented the culmination of the late medieval Reformation It was only the failure of this earlier Reformation that served as a catalyst for the onset of the sixteenth century Protestant Reformation Luther's true Reformation discovery had little to do with justification by faith or with his 95 Theses Yet his discoveries in February of 1520 were to change everything
