**Reimagining Textuality** Elizabeth Bergmann Loizeaux, Neil Fraistat, 2002 What happens when in the wake of postmodernism the old enterprise of bibliography textual criticism or scholarly editing crosses paths and processes with visual and cultural studies In *Reimagining Textuality* major scholars map out in this volume a new discipline drawing on and redirecting a host of subfields concerned with the production distribution reproduction consumption reception archiving editing and sociology of texts *Supporting Digital Humanities for Knowledge Acquisition in Modern Libraries* Sacco, Kathleen L., 2015-06-25 Digital Humanities is a burgeoning field of research and education concerned with the intersection of technology and history philosophy linguistics literature music cultural studies and the arts *Supporting Digital Humanities for Knowledge Acquisition in Modern Libraries* aims to stand at the forefront of this emerging discipline targeting an audience of researchers and academicians with a special focus on the role of libraries and library staff In addition to a collection of chapters on crucial issues surrounding the digital humanities this volume also includes a fascinating account of the painstaking restoration efforts surrounding a 110 year old handwritten historical source document the results of which never before published on this scale culminate in a full color 70 page photographic reproduction of the 1904 Diary of Anna Clift Smith *The Cambridge Companion to Ulysses* Sean Latham, 2014-10-27 Few books in the English language seem to demand a companion more insistently than James Joyce's *Ulysses* a work that at once entices and terrifies readers with its interwoven promises of pleasure scandal difficulty and mastery This volume offers fourteen concise and accessible essays by accomplished scholars that explore this masterpiece of world literature Several essays examine specific aspects of *Ulysses* ranging from its plot and characters to the questions it raises about the strangeness of the world and the density of human cultures Others address how Joyce created this novel why it became famous and how it continues to shape both popular and literary culture Like any good companion this volume invites the reader to engage in an ongoing conversation about the novel and its lasting ability to entice rankle absorb and enthrall **Always Already New** Lisa Gitelman, 2008-08-29 In *Always Already New* Lisa Gitelman explores the newness of new media while she asks what it means to do media history Using the examples of early recorded sound and digital networks Gitelman challenges readers to think about the ways that media work as the simultaneous subjects and instruments of historical inquiry Presenting original case studies of Edison's first phonographs and the Pentagon's first distributed digital network the ARPANET Gitelman points suggestively toward similarities that underlie the cultural definition of records phonographic and not at the end of the nineteenth century and the definition of documents digital and not at the end of the twentieth As a result *Always Already New* speaks to present concerns about the humanities as much as to the emergent field of new media studies Records and documents are kernels of humanistic thought after all part of and party to the cultural impulse to preserve and interpret Gitelman's argument suggests inventive contexts for humanities computing while also offering a new perspective on such traditional humanities disciplines

as literary history Making extensive use of archival sources Gitelman describes the ways in which recorded sound and digitally networked text each emerged as local anomalies that were yet deeply embedded within the reigning logic of public life and public memory In the end Gitelman turns to the World Wide Web and asks how the history of the Web is already being told how the Web might also resist history and how using the Web might be producing the conditions of its own historicity

**Worlds Made Flesh** Lauryn Mayer, 2004-06-01 This book focuses on the use of the past in two senses First it looks at the way in which medieval texts from the eighth to the fifteenth centuries discussed the past how they presented history what kinds of historical narratives they employed and what anxieties gathered around the practice of historiography Second this study examines twentieth century interactions with this textual past and the problems that have arisen for critics trying to negotiate this radically different textual culture Lauryn Mayer examines chronicle histories that have been largely ignored by scholars bringing these neglected texts into dialogue with contemporaneous canonical works such as *Troilus and Criseyde* *The House of Fame* *The Morte Darthur* *Beowulf* and *The Battle of Maldon*

**Keywords in Writing Studies** Paul Heilker,Peter Vandenberg,2015-02-15 Keywords in Writing Studies is an exploration of the principal ideas and ideals of an emerging academic field as they are constituted by its specialized vocabulary A sequel to the 1996 work Keywords in Composition Studies this new volume traces the evolution of the field s lexicon taking into account the wide variety of theoretical educational professional and institutional developments that have redefined it over the past two decades Contributors address the development

transformation and interconnections among thirty six of the most critical terms that make up writing studies Looking beyond basic definitions or explanations they explore the multiple layers of meaning within the terms that writing scholars currently use exchange and question Each term featured is a part of the general disciplinary parlance and each is a highly contested focal point of significant debates about matters of power identity and values Each essay begins with the assumption that its central term is important precisely because its meaning is open and multiplex Keywords in Writing Studies reveals how the key concepts in the field are used and even challenged rather than advocating particular usages and the particular vision of the field that they imply The volume will be of great interest to both graduate students and established scholars The Book as Artefact ,2005-01-01 Books do not just contain texts books themselves are cultural artefacts which convey many meanings in their own right meanings which interact with the texts they contain Awareness of the many significances of books as cultural and textual objects reshapes the traditional disciplines of textual theory analytic bibliography codicology and palaeography while the advent of electronic books and digital methods for representing print books is introducing a new dimension to our understanding Seven essays in this volume ranging over medieval Portuguese and Swedish manuscripts eighteenth century Icelandic editions Australian playtexts Thackeray and Anita Brookner and Stefan George consider these questions from the broad perspective of textual scholarship Texts may exist on the borderland of word and not word or they may spring from borderlands of nation or culture or they may be considered from the margins of neighbouring disciplines So readers must set the texts within contexts to see the play of text against border Essays in this volume explore different texts against varying backgrounds Pound s Cantos Joyce s Ulysses Trollope s An Eye for an Eye Woolf s The Waves while essays by McGann and Lernout argue the dimensionality of text on the intersection of print and digital media Implicit in all these essays is the contention that textual scholarship must influence literary interpretation Two final essays focus directly on this in the cases of Melville s Moby Dick and Emily Dickinson s late fragments An extensive reviews section completes this volume **Shimmering in a Transformed Light** Rosemary Lloyd,2005 Although much has been written lately on the links between painting and writing little or no attention has been paid to those moments in literature when the narrative stops to allow for the description of those objects we associate with still life Rosemary Lloyd s book shows how fascinating this overlooked area is how rich in suggestions of class race and gender how much it indicates about human pleasures and about the experience of space and time Lloyd focuses on the last two centuries particularly at points marked by the irruption of images of contingency and rapid change into the fields of art for example the year of the Terror in French history the decade in which Haussman s politically driven transformation of Paris led Baudelaire to write his great modernist poem Le Cygne and on or about December 1910 the date to which Virginia Woolf attributes a revolution in the definition of literary character Lloyd s central concern lies with the ways in which the still life written or painted both evokes and attempts to deal with the sense of contingency While she makes frequent reference to paintings she focuses above all on written still lifes particularly

those moments when novels pause to address the subject matter of still life a bowl of fruit a hat rack a desk cluttered with pens and papers in ways that invite contemplation of other and broader cultural domains She draws on literary and art works from Australia England France Germany Ireland Italy and the United States

The Work of Revision Hannah Sullivan, 2013-01-01 Revision might seem to be an intrinsic part of good writing But Hannah Sullivan argues that we inherit our faith in the virtues of redrafting from early twentieth century modernism Closely examining changes made in manuscripts typescripts and proofs by T S Eliot Ezra Pound Ernest Hemingway James Joyce Virginia Woolf and others she shows how modernist approaches to rewriting shaped literary style and how the impulse to touch up alter and correct can sometimes go too far In the nineteenth century revision was thought to mar a composition s originality a prejudice cultivated especially by the Romantics who believed writing should be spontaneous and organic and that rewriting indicated a failure of inspiration Rejecting such views avant garde writers of the twentieth century devoted themselves to laborious acts of rewriting both before and after publishing their work The great pains undertaken in revision became a badge of honor for writers anxious to justify the value and difficulty of their work In turn many of the distinctive effects of modernist style ellipsis fragmentation parataxis were produced by zealous experimental acts of excision and addition The early twentieth century also saw the advent of the typewriter It proved the ideal tool for extensive multi stage revisions superior even to the word processor in fostering self scrutiny and rereading across multiple drafts Tracing how master stylists from Henry James to Allen Ginsberg have approached their craft The Work of Revision reveals how techniques developed in the service of avant garde experiment have become compositional orthodoxy

**Graphic Design in Urban Environments** Robert Harland, 2016-10-20 Graphic Design in Urban Environments introduces the idea of a category of designed graphic objects that significantly contribute to the functioning of urban systems These elements smaller than buildings are generally understood by urban designers to comprise such phenomena as sculpture clock towers banners signs large screens the portrayal of images on buildings through smart screens and other examples of what urban designers call urban objects The graphic object as it is defined here also refers to a range of familiar

things invariably named in the literature as maps street numbers route signs bus placards signs architectural communication commercial vernacular outdoor publicity lettering banners screens traffic and direction signs and street furniture One can also add markings of a sports pitch lighting bollards even red carpets or well dressings By looking at the environment and design and deconstructing form and context relationships the defining properties and configurational patterns that make up graphic objects are shown in this book to link the smallest graphic detail e g the number 16 to larger symbolic statements e g the Empire State Building From a professional design practice perspective a cross section through type typographic graphic and urban design will provide a framework for considering the design transition between alphabets writing systems images in the broadest sense and environments
