Our Children Can't Wait Joseph P. Bishop, 2022-11-25 Education policies have too often ignored how conditions outside of school can alter life chances for young people especially students of color before they even reach the classroom More recently COVID 19 has made it impossible to overlook the needs of the whole child both inside and outside of school The authors assert that responding to a number of factors like air quality housing public health community safety segregation and neighborhood conditions are essential to improving academic outcomes and student health Our Children Can't Wait urges readers to reconsider what education policy is what it could be who it is for and who should be directly shaping it at all levels of government Experts present a new equity roadmap by bridging scholarship ideas and original thinking on education policy as a vehicle for setting a redemptive path forward for reckoning with race in America Book Features Presents a new evidence based blueprint for addressing persistent gaps in education opportunity through a number of interrelated social policies Includes contributing authors from 17 organizations and universities representing a powerful national network of scholars Goes beyond diagnosing or identifying challenges to present solutions in the form of tools and promising models Offers strategies for preventing more students from experiencing homelessness or entering the criminal justice system through strategic investments Addresses timely issues that are in the hearts and minds of many key stakeholders in no small part due to the COVID 19 pandemic

Reinventing Public Education Paul Hill, Lawrence C. Pierce, James W. Guthrie, 2009-02-15 A heated debate is raging over our nation's public schools and how they should be reformed with proposals ranging from imposing national standards to replacing public education altogether with a voucher system for private schools Combining decades of experience in education the authors propose an innovative approach to solving the problems of our school system and find a middle ground between these extremes Reinventing Public Education shows how contracting would radically change the way we operate our schools while keeping them public and accessible to all and making them better able to meet standards of achievement and equity Using public funds local school boards would select private providers to operate individual schools under formal contracts specifying the type and quality of instruction In a hands on concrete fashion the authors provide a thorough explanation of the pros and cons of school contracting and how it would work in practice They show how contracting would free local school boards from operating schools so they can focus on improving educational policy how it would allow parents to choose the best school for their

children and finally how it would ensure that schools are held accountable and academic standards are met While retaining a strong public role in education contracting enables schools to be more imaginative adaptable and suited to the needs of children and families In presenting an alternative vision for America s schools Reinventing Public Education is too important to be ignored *Educational Entrepreneurship* Nicholas D. Young, Peter Bittel, 2015-04-14 School superintendents business managers central office leaders elected officials industry leaders educators and aspiring practitioners in the field of education will find this book a useful resource in understanding innovative ways to stretch limited school resources or to improve the scope and quality of services and programs offered to deserving students Approaching educational entrepreneurship by leveraging public and private partnerships is the primary focus throughout the book Where available real world examples from school districts across the country are presented to provide the reader with ideas to consider and potentially emulate Appreciating that there are innumerable ways for school leadership to pursue entrepreneurialism chapters that represent a wide cross section of common areas of educational practice were selected for inclusion It should not be surprising then that such topics as curriculum development educational technology cooperative purchasing higher education relationships grant writing foundation planning and special education service delivery were all examined as potential public private partnership opportunities Improving schools in the twenty first century will require new ways of approaching age old challenges not the least of which centers on increasingly scarce public funding In response the authors invite all readers to join the quest of applying the principles of entrepreneurship to schools to make them even stronger for the next generation

The Reinventing Education Initiative from an Evaluation Perspective Education Development Center, Inc., Cambridge, MA., 2004 During the past 20 years the skills required to succeed in the economy have changed radically but the skills taught in most schools have changed very little As a result of the growing mismatch between the skills of most graduates and the skills required by high wage employers a U S high school diploma is no longer a ticket to the U S middle class Murnane Levy 1996 p 3 How do public schools and informal education programs meet this growing demand to produce highly skilled individuals an expectation that ALL children will achieve at a level much higher than required in previous eras This question now reverberates nationally in conversations among and between educators employers and the general public because it poses a challenge not only to the future of our civic life but also to the future of our economic and global competitiveness IBM Corporation has stepped into this void partnering with states and districts in

the United States through its Reinventing Education initiative to meet the demands for sustained and fundamental reform called for by Grantmakers in Education and others Today nearly ten years later the Reinventing Education initiative is a sweeping 70 million education reform program that involves dozens of school districts and states throughout the US and many international sites It includes thousands of teachers and millions of students with documented success in both urban and rural areas In 1997 the EDC Center for Children and Technology CCT began a long term evaluation study of the sites where the program was launched Five years later CCT has found that IBM s Reinventing Education program produced successful solutions that are addressing long standing barriers to public school reform barriers such as how teachers can be developed over the life span of their careers how information is shared and used and how learning is measured Contains 3 tables

Race to the Bottom Michael V. McGill,2015-04-03 How did the country that invented the modern public school end up embracing policies that weaken it What alternatives are there to current corporate reform policies How can we give America s children an education that will truly prepare them and our nation for the challenges of tomorrow In *Race to the Bottom* McGill successfully traces the emergence of corporate reform and describes how its tenets run counter to what he believes are the key elements of a high quality education McGill draws from a wealth of experience as a school superintendent for over 40 years including his tenure in Scarsdale during the 2001 district wide boycott of New York State standardized tests Showing how strong leaders working with teachers and the community have been able to strengthen schools the author offers a model of school reform that will prepare students for the 21st Century
