Overcoming the Addict/Alcoholic Within Dee Talks, 2016-07-27 Recovery from dependency on alcohol and drugs can be a formidable challenge Since chemical addiction reinforces toxic thinking that can

lead to relapse it is necessary for a person in early recovery as well as in later recovery to find a recovery plan that works. This book examines 10 ways a person can sabotage their recovery. Of primary importance will be an individual's willingness to seek and apply help from alcohol drug counseling and or sober support groups. Those who try to defeat their addiction alone usually relapse because they believe in the toxic thinking their addiction has taught them. Blind spots in one's thinking can be as dangerous as not identifying blind spots while driving.

Addiction Medicine Bankole A. Johnson, 2010-10-10

The spectrum of addiction disorders presents practitioners with numerous challenges among them the widening gap between a growing evidence base and the translation of this knowledge into treatment outcomes. Addiction Medicine addresses this disconnect clearly explaining the role of brain function in drug taking and other habit forming behaviors and applying this biobehavioral framework to the delivery of evidence based treatment. Its state of the art coverage provides clinically relevant details on not only traditional sources of addiction such as cocaine opiates and alcohol but also more recently recognized substances of abuse e.g. steroids inhalants as well as behavioral addictions e.g. binge eating compulsive gambling hoarding. Current behavioral and medical therapies are discussed in depth and the book's close attention to social context gives readers an added lens for personalizing treatment. An international panel of expert contributors offers the most up to date information on Diagnosis and classification Neurobiological and molecular theories of addiction Behavioral concepts of addiction Clinical aspects of addiction to a wide range of substances including opiates stimulants sedatives hallucinogens alcohol nicotine and caffeine Science based treatment options pharmacotherapy pharmacogenetics potential vaccines brief and compliance enhancing interventions cognitive behavioral treatment behavioral management and other psychosocial interventions Behavioral addictions including compulsive eating Internet messaging and hypersexuality and their treatment Addiction in specific populations including adolescents the elderly pregnant women and health care professionals Legal disability and rehabilitation issues.
