Relationship Code

Swami Ram Charran

Relationship Code:

The Relationship Code Margaret McCraw, 2010-01-01 Did you know that stress causes more than 54% of Americans to fight with people close to them That people with positive social relationships recover from illness faster And that people who have a best friend at work are 7 times more likely to be engaged in their jobs The Relationship Code teaches us to empower ourselves in all types of relationships with the new techniques and insights of the four step Harmonic System Based on cognitive behavioral approaches and developed by Dr McCraw the Harmonic System integrates psychology with universal principles to help people achieve their desires In The Relationship Code you ll learn to Create positive self fulfilling prophecies Communicate effectively Enhance relationships on the job Overcome everyday and long term challenges Develop extraordinary outcomes

The Relationship Code David Reiss, Research Professor in Behavioural Genetics Robert Plomin, University of Minnesota, 2009-06-01 The Relationship Code is the report of a longitudinal study conducted over a ten year period of the influence of family relationships and genetic factors on competence and psychopathology in adolescent development The sample for this landmark study included 720 pairs of same sex adolescent siblings including twins half siblings and genetically unrelated siblings and their parents Using a clear expressive style David Reiss and his coinvestigators identify specific mechanisms that link genetic factors and the social environment in psychological development They propose a striking hypothesis family relationships are crucial to the expression of genetic influences on a broad array of complex behaviors in adolescents Moreover this role of family relationships may be very specific some genetic factors are linked to mother child relationships others to father child relations some to relationship warmth while others are linked to relationship conflict or control The specificity of these links suggests that family relationships may constitute a code for translating genetic influences into the ontogeny of behaviors a code every bit as important for behavior as DNA RNA
