Developmental and clinical researchers have only just discovered the phenomenon of adolescent romance as a topic of serious scientific inquiry. This discovery may be related to the overwhelming evidence that adult romantic relationships are failing at alarming rates. Dramatic increases in the rates of divorce, out of wedlock childbirth and relationship violence lead to questions about the developmental precursors of romantic love and commitment. What's wrong with love and can it be fixed? This book brings together a diverse group of experts from various disciplines to address a serious gap in the understanding of adolescent development. Part I focuses on romantic relations and sexual behavior from the perspective of normative adolescent development. Part II centers on high risk adolescents and Part III explores the practical implications of current theory and research for clinicians, educators and health administrators. Together the chapters in this integrative and clinically useful book lay a foundation for understanding how adolescents successfully navigate the tumultuous waters of young love.

Adams,Warren H. Jones,1999-09-30 A fundamental assumption underlying the formation of our most important relationships is that they will persist indefinitely into the future As an acquaintanceship turns into a friendship for example both members of this newly formed interpersonal bond are likely to expect that their interactions will become increasingly frequent diverse and intimate over time This expectation is perhaps most apparent in romantically

involved couples who through a variety of verbal and symbolic means make explicit pledges to a long lasting relationship In either case it is clear that these relationships represent something valuable to the individuals involved and are pursued with great enthusiasm Virtually all close relationships are formed within the context of mutually rewarding interactions and or strong physical attraction between partners Friends and romantically involved couples alike are drawn to one another because of similarity of attitudes interests and personality and quite simply because they enjoy one another's company This enjoyment coupled with the novelty that characterizes new relationships almost makes the continuation of the relationship a foregone conclusion As relationships progress however their novelty fades conflicts may arise between partners negative life events may occur and the satisfaction that previously characterized the relationships may diminish *Applying*

and they describe various preventive and psychotherapeutic applications for this expanded theory of family based personality development The authors further elaborate on the theories developed in Dr L Abate s previous books by introducing the core concepts of hurt the basic feeling underlying much of personality functioning and dysfunctioning and a continuum of likeness the fundamental determinant of interpersonal choices and behavior in friendships parent child relations and marital relations Offering an empirically rigorous developmentally based unified field theory of personality function criminality and psychopathology The Self in the Family is essential reading for developmental and clinical psychologists family therapists personality theorists and criminality and psychopathology researchers CHILD CENTERED FAMILY THERAPY Lucille L Andreozzi This book is the first complete introduction to the Child Centered Structural Dynamic Therapy Model a revolutionary short term treatment model which helps integrate child and family system development into a comprehensive framework for self guided family initiated change This guide with its numerous case illustrations works to build knowledge from within the family by engaging family members in structured activities that help them translate family system principles into practical everyday reality Child Centered Family Therapy is an important resource for couples and family therapists child psychologists counselors and social workers 1996 0 471 14858 X 374 pp TREATING THE CHANGING FAMILY Handling Normative and Unusual Events Edited by Michele Harway This inimitable book offers a broad ranging carefully integrated review of contemporary trends in family therapy research and practice It reexamines the family and the many challenges to its function and provides practical advice for therapists who treat troubled families It explores the impact that non normative events such as violence and abuse addiction long term and chronic illness divorce adoption trauma and many others can have on family function and provides proven intervention strategies and techniques for treating these families With the special attention given to the structure dynamics and unique problems of families that do not fit the traditional mold such as binuclear single parent and gay and lesbian families Treating the Changing Family is a valuable resource for all mental health professionals and families 1995 0 471 07905 7 374 pp Also in the Series HANDBOOK OF RELATIONAL DIAGNOSIS AND DYSFUNCTIONAL FAMILY PATTERNS Florence W Kaslow Editor 1996 0 471 08078 0 592 pp
