Carl Page

Relativism Refuted:

Relativism Refuted H. Siegel, 2013-06-29 **A Refutation of Moral Relativism** Peter Kreeft, 2009-12-04 No issue is more fateful for civilization than moral relativism History knows not one example of a successful society which repudiated moral absolutes Yet most attacks on relativism have been either pragmatic looking at its social consequences or exhorting preaching rather than proving and philosophers arguments against it have been specialized technical and scholarly In his typical unique writing style Peter Kreeft lets an attractive honest and funny relativist interview a Muslim fundamentalist absolutist so as not to stack the dice personally for absolutism In an engaging series of personal interviews every conceivable argument the sassy Black feminist reporter Libby gives against absolutism is simply and clearly refuted and none of the many arguments for moral absolutism is refuted **Relativism: A Guide for the Perplexed** Timothy M. Mosteller, 2008-05-23 Relativism is a philosophical topic that has many dimensions and can mean many things It is the view that one thing owes existence truth goodness or beauty to something else and is central to an understanding of any of the four traditional divisions of philosophy ontology epistemology ethics and aesthetics Relativism A Guide for the Perplexed offers a concise introduction to relativism and how it applies to the different parts of the basic foundational areas of philosophy and indeed to every area of human enquiry Timothy Mosteller provides an overview of the topic across the discipline of philosophy examining it in detail in its primary forms ontological relativism epistemological relativism moral relativism and aesthetic relativism The book concludes with a summary of the role of relativism in three other key academic disciplines science politics and religion **The Logic of Relativism** Mark Ressler, 2013-08-03 This in depth study aims to develop a rigorous analysis of the nature and the logic of relativism in general as a basis for evaluating the charge of self refutation against relativism It develops a general definition of relativism that distinguishes relativism from structurally similar notions such as conventionalism and contextualism On the basis of this definition it formulates a series of logical systems that each might be presented as candidates for the logic of relativism Each system is evaluated to see whether it can sustain the charge of self refutation The result is that one of these systems can be proven not to be self refuting even under increasingly stronger challenges Consequently this study argues that even global relativism can be demonstrated not to refute itself despite the long history of arguments to the contrary **The Heresy of Heresies** Timothy M. Mosteller, 2021-10-14 The heresy of heresies was common sense George Orwell 1984 This book is a defense of common sense realism which is the greatest heresy of our time Following common sense philosophers like Thomas Aquinas G K Chesterton C S Lewis Dallas Willard and J P Moreland this book defends a common sense vision of reality within the Christian tradition Mosteller shows how common sense realism is more reasonable than the materialist idealist pragmatist existentialist and relativist spirits of our age It maintains that we can know the nature of reality through common sense experience and that this knowledge has profound implication for living the good life and being a good person Philosophical Historicism and the Betrayal of First Philosophy

Carl Page,2010-11-01 *Foucault's Strata and Fields* Maren Kusch,2012-12-06 In recent years a large number of books and articles on Foucault has been published Almost all of the book size studies are expository and introductory Indeed there seems to be no other modern philosopher with reference to whom a comparable number of introductions have been produced in such a short period Most of the articles too provide over views rather than critical assessments or rational reconstructions even though there exists by now a small number of fine papers also in the two latter genres Moreover more often than not writers on Foucault approach his work as part and parcel of so called postmodern philosophy They concentrate on topics like the death of the subject the relation of Foucault's work to Derrida or Habermas or its significance for postmodern art and culture Without wanting to deny the merits either of introductory expositions or of studies that read Foucault as a postmodern thinker it seems to me that these received perspectives have tended to leave central areas and aspects of Foucault's work somewhat underexposed As I see it the most important of these areas are such as would suggest reading Foucault from the vantage point of recent developments in the philosophy sociology and history of science *Truth Without Objectivity* Max Kölbel,2002 Truth without Objectivity provides a critique of the mainstream view of meaning Kölbel examines the standard solutions to the conflict implicit in this view demonstrating their inadequacy and developing instead his own relativist theory of truth The mainstream view of meaning assumes that understanding a sentence's meaning implies knowledge of the conditions required for it to be true This view is challenged by taste judgements which have meaning but seem to be neither true nor false

Philosophy of Education J.J. Chambliss,2013-07-04 First Published in 1996 This first of its kind Encyclopaedia charts the influence of philosophic ideas that have had the greatest influence on education from Ancient Greece to the present It covers classical thinkers as Plato Augustine Hypatia Locke and Rousseau as well as recent figures such as Montessori Heldegger Du Bois and Dewey It illuminates time hounded ideas and concepts such as idealism practical wisdom scholasticism tragedy and truth as well as modern constructs as critical theory existentialism phenomenology Marxism and post Colonialism The coverage consists of 228 articles by 184 contributors who survey the full spectrum of the philosophy of education

Classical Philosophy: Socrates and his contemporaries Terence Irwin,1995

A Companion to Epistemology Jonathan Dancy,Ernest Sosa,Matthias Steup,2010-02-15 With nearly 300 entries on key concepts review essays on central issues and self profiles by leading scholars this companion is the most comprehensive and up to date single volume reference guide to epistemology Epistemology from A Z is comprised of 296 articles on important epistemological concepts that have been extensively revised to bring the volume up to date with many new and re written entries reflecting developments in the field Includes 20 new self profiles by leading epistemologists Contains 10 new review essays on central issues of epistemology

Civility, Religious Pluralism and Education Vincent Biondo,Andrew Fiala,2013-12-17 This book focuses on the problem of religious diversity civil dialogue and religion education in public schools exploring the ways in which atheists secularists fundamentalists and mainstream religionists come together in the

public sphere examining how civil discourse about religion fit within the ideals of the American political and pedagogical systems and how religious studies education can help to foster civility and toleration *AIDS, Philosophy and Beyond* Joseph Wayne Smith,1991 This book attempts to give a comprehensive examination of the principal philosophical issues associated with the AIDS pandemic and in particular with the radical challenges that global diseases raise for modern society and political systems The thesis of the book is that AIDS is but a part of a wider environmental and social crisis that not only challenges received opinion about the relationships between humanity technology and the environment but challenges the ecological adaptability of modern social and political system The challenge posed by AIDS and other diseases likely to appear in the next century are explored in detail **Pushing the Antithesis** ,2007 **Schoenberg, Wittgenstein and the Vienna Circle** James Kenneth Wright,2007 In 2006 Schoenberg Wittgenstein and the Vienna Circle received a Lewis Lockwood Award Finalist from the American Musicological Society for outstanding new books on musicological topics This study examines relativistic aspects of Arnold Schoenberg s harmonic and aesthetic theories in the light of a framework of ideas presented in the early writings of Ludwig Wittgenstein the logician philosopher of language and Schoenberg s contemporary and Austrian compatriot The author has identified correspondences between the writings of Schoenberg the early Wittgenstein the *Tractatus Logico Philosophicus* in particular and the Vienna Circle of philosophers on a wide range of topics and themes Issues discussed include the nature and limits of language musical universals theoretical conventionalism word to world correspondence in language the need for a fact and comparison based approach to art criticism and the nature of music theoretical formalism and mathematical modeling Schoenberg and Wittgenstein are shown to have shared a vision that is remarkable for its uniformity and balance one that points toward the reconciliation of the positivist relativist dualism that has dominated recent discourse in music theory Contrary to earlier accounts of Schoenberg s harmonic and aesthetic relativism this study identifies a solid epistemological core underlying his thought a view that was very much in step with Wittgenstein and the Vienna Circle and thereby with the most vigorous and pivotal developments in early twentieth century intellectual history *Rethinking Objectivity* Allan Megill,1994 Although objectivity is a term used widely in many areas of public discourse from discussions concerning the media and politics to debates over political correctness and cultural literacy the question What is objectivity is often ignored as if the answer were obvious In this volume Allan Megill has gathered essays from fourteen leading scholars in a variety of fields history anthropology philosophy psychology history of science sociology of science feminist studies literary studies and accounting to gain critical understanding of the idea of objectivity as it functions in today s world In diverse essays the authors provide fascinating studies of objectivity in such areas as anthropological research corporate and governmental bureaucracies legal discourse photography and the study and practice of the natural sciences Taken together Megill argues this volume calls for developing a notion of objectivities The absolute sense of objectivity that is objectivity as a God s eye view must be supplemented and in part supplanted by disciplinary

procedural and dialectical senses of objectivity This book will be of great interest to a broad range of scholars as it presents current thinking on a topic of fundamental concern across the disciplines in the humanities and social sciences Contributors Barry Barnes Dagmar Barnouw Lorraine Code Lorraine Daston Johannes Fabian Kenneth J Gergen Mary E Hawkesworth Barbara Herrnstein Smith Evelyn Fox Keller George Levine Allan Megill Peter Miller Andy Pickering Theodore M Porter

Turkish Studies in the History and Philosophy of Science G. Irzik, Güven Güzeldere, 2005-07-19 As an academic discipline the philosophy and history of science in Turkey was marked by two historical events Hans Reichenbach's immigrating to Turkey and taking a post between 1933 and 1938 at Istanbul University prior to his tenure at UCLA and Aydin Sayili's establishing a chair in the history of science in 1952 after having become the first student to receive a Ph D under George Sarton at Harvard University Since then both disciplines have flourished in Turkey The present book which contains seventeen newly commissioned articles aims to give a rich overview of the current state of research by Turkish philosophers and historians of science Topics covered address issues in methodology causation and reduction and include philosophy of logic and physics philosophy of psychology and language and Ottoman science studies The book also contains an unpublished interview with Maria Reichenbach Hans Reichenbach's wife which sheds new light on Reichenbach's academic and personal life in Istanbul and at UCLA

Epistemology Nicholas Rescher, 2012-02-01 Guided by the founding ideas of American pragmatism Epistemology provides a clear example of the basic concepts involved in knowledge acquisition and explains the principles at work in the development of rational inquiry It examines how these principles analyze the course of scientific progress and how the development of scientific inquiry inevitably encounters certain natural disasters At the center of the book's deliberations there lies not only the potential for scientific progress but also the limit of science as well This comprehensive introduction to the theory of knowledge addresses a myriad of topics including the critique of skepticism the nature of rationality the possibility of science for extraterrestrial intelligences and the prospect of insoluble issues in science

Transforming Critical Thinking Barbara J. Thayer-Bacon, 2000-03 Thayer Bacon argues that factors such as race gender and social status have direct bearing on philosophical inquiry by abstracting theorists from their personal and social contexts the absolutism of traditional critical thinking philosophies come into question Thayer Bacon encourages reevaluating the diversity of inquiry and suggests that diversity is a factor which constructs philosophy

The Routledge Handbook of Philosophy of Relativism Martin Kusch, 2019-12-06 Relativism can be found in all philosophical traditions and subfields of philosophy It is also a central idea in the social sciences the humanities religion and politics This is the first volume to map relativistic motifs in all areas of philosophy synchronically and diachronically It thereby provides essential intellectual tools for thinking about contemporary issues like cultural diversity the plurality of the sciences or the scope of moral values The Routledge Handbook of Philosophy of Relativism is an outstanding major reference source on this fundamental topic The 57 chapters by a team of international contributors are divided into nine parts Relativism in non Western philosophical

traditions Relativism in Western philosophical traditions Relativism in ethics Relativism in political and legal philosophy Relativism in epistemology Relativism in metaphysics Relativism in philosophy of science Relativism in philosophy of language and mind Relativism in other areas of philosophy Essential reading for students and researchers in all branches of philosophy this handbook will also be of interest to those in related subjects such as politics religion sociology cultural studies and literature
