The Guns of Independence Jerome A. Greene,2005-04-19 A modern scholarly account of the most decisive campaign during the American Revolution examining the artillery tactics and leadership involved The siege of Yorktown in the fall of 1781 was the single most decisive engagement of the American Revolution The campaign has all the drama any historian or student could want the war s top generals and admirals pitted against one another decisive naval engagements cavalry fighting siege warfare night bayonet attacks and much more Until now however no modern scholarly treatment of the entire campaign has been produced By the summer of 1781 America had been at war with England for six years No one believed in 1775 that the colonists would put up such a long and credible struggle France sided with the colonies as early as 1778 but it was the dispatch of 5 500 infantry under Comte de Rochambeau in the summer of 1780 that shifted the tide of war against the British In early 1781 after his victories in the Southern Colonies Lord Cornwallis marched his army north into Virginia Cornwallis believed the Americans could be decisively defeated in Virginia and the war brought to an end George Washington believed Cornwallis s move was a strategic blunder and he moved vigorously to exploit it Feinting against General Clinton and the British stronghold of New York Washington marched his army quickly south With the assistance of Rochambeau s infantry and a key French naval victory at the Battle off the Capes in September Washington trapped Cornwallis on the tip of a narrow Virginia peninsula at a place called Yorktown And so it began Operating on the belief that Clinton was about to arrive with reinforcements Cornwallis confidently remained within Yorktown s inadequate defenses Determined that nothing short of outright surrender would

suffice his opponent labored day and night to achieve that end Washington's brilliance was on display as he skillfully constricted Cornwallis's position by digging entrenchments erecting redoubts and artillery batteries and launching well timed attacks to capture key enemy positions The nearly flawless Allied campaign sealed Cornwallis's fate Trapped inside crumbling defenses he surrendered on October 19 1781 effectively ending the war in North America Penned by historian Jerome A Greene *The Guns of Independence The Siege of Yorktown 1781* offers a complete and balanced examination of the siege and the participants involved Greene's study is based upon extensive archival research and firsthand archaeological investigation of the battlefield This fresh and invigorating study will satisfy everyone interested in American Revolutionary history artillery siege tactics and brilliant leadership

Journal of the Senate of the State of New York ... New York (State). Legislature. Senate,1814 **Memoirs of Georgia** ,1895 Dade's Last Command Frank Laumer,1995-08-03 Dade s Battle in December 1835 precipitated the Second Seminole War It was the first American war fought over the issue of slavery Frank Laumer writes and it occurred principally because of white determination to protect the institution In their search for runaway slaves white citizens of Georgia and Florida invaded Seminole land and met with resistance the violent encounters that followed led to Dade s Battle

As a result Laumer says the escape hatch was closed Native Americans were removed from the land and Florida was made safe for white expansion Coupling thirty years of research with a passion to understand the fate of Major Dade's command and the motivations of the attacking Seminoles Laumer has written a vivid account of a battle that changed Florida's history After walking Dade's route on the Fort King Road from Tampa to the battlefield north of the Withlacoochee River wearing the complete woolen uniform of an enlisted man carrying musket canteen pack bayonet and haversack Laumer can describe not only the clothing and weapons of the soldiers but also the tension and fear they felt as they marched through Seminole territory He has also assessed the position of the Seminoles sympathizing with the choices forced by their leaders Laumer also describes the backgrounds of the soldiers who marched under Dade and the role of much maligned black interpreter Louis Pacheco and he offers new insights on the mistakes made by the commanders who ordered the march More than the account of a single military action Dade's Last Command is the story of good and decent men who died violent and terrible deaths to perpetuate a political and social evil

Artillerists and Engineers pb Arthur Wade, 2011-01-31

In 1794, faced with possible war with Great Britain, the federal government assumed the responsibility for the construction and manning of seacoast fortifications from Maine to Georgia. Construction was entrusted to French-born engineers who followed traditional European bastioned designs. In 1806, Britain's abuse of neutral maritime rights again threatened war, and Congress appropriated funds for additional seacoast defenses. Almost all of the design and construction of these works was supervised by officers of the Corps of Engineers, most of whom were graduates of the new U.S. Military Academy. On the eve of the outbreak of the War of 1812, the defenses of the Atlantic coast and the Mississippi River below New Orleans were substantially complete, manned by regular troops and performed well. Due to the effectiveness of these fortifications, the United States embarked on construction of a series of permanent seacoast defense systems in 1816 that lasted through World War II.
