Sting Paul Carr,2017-09-15 Gordon Sumner was born in a mainly working class area of North Tyneside England in 1951 Decades later we would come to know him as Sting one of the world s best selling music artists Sting was the lead singer of the Police from 1977 to 1984 before launching a hugely successful solo career In Sting From Northern Skies to Fields of Gold popular music scholar Paul Carr argues that the foundations of Sting s creativity and drive for success were established by his birthplace with vestiges of his Northern Englishness continuing to emerge in his music long after he left his hometown Carr frames Sting s creative impetus and output against the real imagined and idealized places he has occupied Focusing on the sometimes blurry borderlines between nostalgia facts imagination and memories as told by Sting the people who knew and know him and those who have written about him Carr investigates the often complex resonance between local boy Gordon Sumner and the star the world knows as Sting Published to coincide with the fortieth anniversary of the formation of the definitive line up of the Police this is the first book to examine the relationship between Sting s working class background in Newcastle the life he has consequently lived and the creativity and inspiration behind his music

Sacred Groves, Cultural Ecosystems and Conservation Rena Laisram,2023-04-03 Sacred Groves Cultural Ecosystems and Conservation addresses the increasing contemporary relevance of ecosystems being depleted at an alarming rate worldwide The purpose of this collection of essays is to bring together different perspectives on sacred groves in the context of the cultural and spiritual dimensions of biodiversity conservation In offering an experience of sacred natural sites in varied cultural contexts of Africa and Asia it raises a common concern for natural resource management Based on the long term research of the contributing authors the nine chapters reflect a continuous process of redefining sacred spaces within an interdisciplinary framework grounded on existing literature and ethnographic field research The highlight of the discourse is the complex interactions and negotiations between the sacred and the secular which brings center stage the

subject of sacred status that communities have given to nature This book will be of interest to researchers and general audience alike interested and concerned with earth ecosystems and the spiritual world creating a space for critical enquiry and future hopes in the face of threatening habitat loss The Penguin Book of Classical Myths Jennifer March,2008-06-05

The figures and events of classical myths underpin our culture and the constellations named after them fill the night sky Whether it s the raging Minotaur trapped in the Cretan labyrinth or the twelve labours of Hercules Aphrodite s birth from the waves or Zeus visiting Danae as a shower of gold the mythology of Greece and Rome is full of unforgettable stories All the stories of the Greek tragedies Oedipus Medea Antigone are there all the events of the Trojan wars and of Odysseus and Aeneas epic journeys the founding of Athens and of Rome These are the strangest tales of love war betrayal and heroism ever told and while brilliantly retelling them this book shows how they echo through the works of much later writers from Chaucer and Shakespeare to Camus and Ted Hughes Full of attractive illustrations and laid out in eighteen clear chapters the titles include Dangerous Women and Heroes Dr Jennifer March has written a fascinating guide to the myths of classical civilization that is as readable as a novel Dionysus and Apollo after Nihilism Carlos A. Segovia,Sofya Shaikut Segovia,2023-02-17

This book recovers Dionysus and Apollo as the twin conceptual personae of life s dual rhythm in an attempt to redesign contemporary theory through the reciprocal affirmation of event and form earth and world dance and philosophy It revisits Heidegger and L vi Strauss and combines them with Roy Wagner with the purpose of moving beyond Nietzsche s manifold legacy including post structuralism new materialism and speculative realism It asks whether merging philosophy and anthropology around issues of comparative ontologies may give us a chance to re become earthbound dwellers on a re worlded earth Strokes of Genius Eric Chaline,2017-08-15

What could be better than diving into cool water on a hot day In this enormously enjoyable and informative history of swimming Eric Chaline sums up this most summery of moments with one phrase pleasure beckons at the water s edge Strokes of Genius traces the history of swimming from the first civilizations to its current worldwide popularity as a sport fitness pastime and leisure activity Chaline explores swimming s role in ritual early trade and manufacturing warfare and medicine before describing its transformation in the early modern period into a leisure activity and a competitive sport the necessary precursors that have made it the most common physical pastime in the developed world The book celebrates the physicality and sensuality of swimming attributes that Chaline argues could have contributed to the evolution of the human species Swimming like other disciplines that use repetitive movements to train the body and quiet the mind is also a means of spiritual awakening a personal journey of discovery Swimming has attained the status of a cultural marker denoting eroticism leisure endurance adventure exploration and excellence Strokes of Genius shows that there is not a single story of human swimming but many currents that merge diverge and remerge Chaline argues that swimming will become particularly important as we look toward a warmer future in which our survival may depend on our ability to adapt to life in an aquatic world **Jonah Through the Centuries** Lena-Sofia Tiemeyer,2021-08-27
