United States. Superintendent of Documents,1986      **Made, Not Born** Bruce Newsome,2007-09-30 Why do the combat capabilities of individual soldiers vary so much This book seeks to provide an answer to this and other questions about variability in combat performance Some soldiers flee quickly from the battlefield while others endure all hardships until the bitter end Some combat units can perform numerous types of missions while others cannot keep themselves organized during peacetime Some militaries armed with obsolete weapons have out fought enemies with the latest weapons just as

some massively outnumbered armies have beaten back much larger opponents In this first social scientific study of the effectiveness of combat troops Newsome evaluates competing explanations for the varying combat capabilities and performances There are four main explanations each emphasizing the influence of a single factor The first focuses on material endowments How well funded are the troops Do they have the latest protective gear and the most advanced weaponry Second some analysts claim that democracies produce better commanders superior strategies more motivated personnel or better managed personnel others however associated those characteristics with more authoritarian forms of government Third is the idea that giving more power to the troops on the ground in individual combat units empowers them with decision making capability and adaptability to fast changing situations and circumstances Newsome presents evidence that decentralized personnel management does correlate with superior combat performance Fourth soldier capabilities and performance often are assumed to reflect intrinsic attributes such as prior civilian values Newsome argues that the capabilities of combat soldiers are acquired through military training and other forms of conditioning but he does not entirely discount the role of a soldier s individual character In the age old nature vs nurture argument he finds that intrinsic qualities do count but that extrinsic factors such as training and environment matter even more

Thomas W. Britt, Carl Andrew Castro, Amy B. Adler, 2005-12-30 With global commitments and combat duty our armed forces face life threatening challenges on a daily basis However less visible threats also impact the mental health of our military men and women Experts examine challenges on the battlefield such as women coming to terms with life after being prisoners of war or soldiers dealing with mistakenly killing civilians But life in the armed forces presents less dramatic daily challenges Away from the front lines soldiers have to raise their families sometimes as single parents Children have to learn what it s like to be in a military family and to make sense of war Gay or lesbian officers cope with a don t ask don t tell policy An unprecedented range of contributors military officers medical doctors psychologists psychiatrists and professors take us onto the bases and the battlefields and inside the minds of military personnel who face far greater challenges than most of us ever see in the headlines These volumes also highlight factors that make members of the military resilient and stable as well as programs and practices that can ease the psychological burdens of military personnel families and children Readers can better understand how society views our military and military operations and how each one of us can play a role in supporting our armed forces
