Cutcliffe, José Santos, Paul S. Links, Javeria Zaheer, Henry G. Harder, Frank Campbell, Rod McCormick, Kari Harder, Yvonne Bergmans, Rahel Eynan, 2013-10-15 Suicide remains one of the most pressing public health concerns across the world Expensive in terms of the human cost and associated suffering the economic costs the social costs and the spiritual costs it affects millions of people every year This important reference work collects together a wide range of research around suicide and suicide prevention in order to guide future research and provide guidance for professionals about the best way to respond meaningfully to suicidal patients Responding to the need for multi disciplinary and international research to deepen our understanding of suicide it demonstrates where our knowledge is firmly evidence based and where new areas for research are emerging as well as highlighting where we know little Divided into six parts each with its own editorial introduction and commentary it explores research with and about survivors of suicide and indigenous populations The remaining sections look at suicide focused research in psychiatric nursing psychiatry psychology and social work and allied health It is of interest to all advanced students practitioners and scholars interested in suicide and its impact and prevention **At Play in the Fields of Consciousness** Jefferson A. Singer, Peter Salovey, 1999-03 This collection of articles pays homage to the creativity and scientific rigor Jerome Singer has brought to the study of consciousness and play It will interest personality social clinical and developmental psychologists alike **Handbook of Posttraumatic Growth** Lawrence G. Calhoun, Richard G. Tedeschi, 2014-07-10 Posttraumatic growth is an area in which investigations are now being undertaken in many different parts of the world The view that individuals can be changed sometimes in radically good ways by their struggle with trauma is ancient and widespread However the systematic focus by scholars and clinicians on the possibilities for growth from the struggle with crisis is relatively recent There are now a growing number of studies and scholarly papers on the antecedents correlates and consequences of posttraumatic growth and there are also theoretical models that can help guide the research further It is clear however that this phenomenon is not yet well understood The Handbook of Posttraumatic Growth Research and Practice provides both clinicians and researchers with a comprehensive and up to date view of what has been done so far In addition it uses the foundations of what has been done to provide suggestions for the next useful steps to take in understanding posttraumatic growth The book offers contributions of important and influential scholars representing a wide array of perspectives of posttraumatic growth This volume serves as an impetus for additional work both in the academic aspects and in the possibilities for clinical applications of posttraumatic growth This Handbook will appeal to students practitioners and researchers working in a broad array of disciplines and human services The Nature of Grief John Archer, 2003-09-02 In this study on the evolution of grief John Archer shows that grief is a natural reaction to losses of many sorts and he proves this by bringing together material from evolutionary psychology ethology and experimental psychology

Dual-process Theories in Social Psychology Shelly Chaiken, Yaacov Trope, 1999-02-19 This informative volume presents the first comprehensive review of research and theory on dual process models of social information processing. These models distinguish between qualitatively different modes of information processing in making decisions and solving problems: e.g. associative versus rule based, controlled versus uncontrolled, and affective versus cognitive modes. Leading contributors review the basic assumptions of these approaches and review the ways they have been applied and tested in such areas as attitudes, stereotyping, person perception, memory, and judgment. Also examined are the relationships between different sets of processing modes, the factors that determine their utilization, and how they work in combination to affect responses to social information.

Functions of Psalms and Prayers in the Late Second Temple Period Mika S. Pajunen, Jeremy Penner, 2017-07-24 When thinking about psalms and prayers in the Second Temple period, the Masoretic Psalter and its reception is often given priority because of modern academic or theological interests. This emphasis tends to skew our understanding of the corpus we call psalms and prayers and often dampens or mutes the lived context within which these texts were composed and used. This volume is comprised of a collection of articles that explore the diverse settings in which psalms and prayers were used and circulated in the late Second Temple period. The book includes essays by experts in the Hebrew Bible, the Dead Sea Scrolls, Apocrypha, and Pseudepigrapha, and the New Testament, in which a wide variety of topics, approaches, and methods, both old and new, are utilized to explore the many functions of psalms and prayers in the late Second Temple period. Included in this volume are essays examining how psalms were read as prophecy, as history, as liturgy, and as literature. A variety of methodologies are employed and include the use of cognitive sciences, and poetics, linguistic theory, psychology, redaction criticism, and literary theory.

Adopting the Song of Phrase: An Mental Symphony within **Ruminative Thoughts Advances In Social Cognition**
