Running Out of Space--what are the Alternatives? Gloria Novak,American Library Association. Buildings for College and University Libraries Committee,1978      Running Out of Space : what are the Alternatives? : Proceedings of the Preconference, June 1975, San Francisco g Novak (editor.),1978      **University Libraries and Space in the Digital World** Graham Walton,2016-02-24 This timely book addresses physical space in university libraries in the digital age It considers the history of the use of space integrates case studies from around the world with theoretical perspectives explores recent developments including new build and refurbishment With users at the forefront chapters cover different aspects of learning and research support provision shared services and evaluation of space initiatives Library staff requirements and green issues are outlined The book also looks to the future identifying the key strategic issues and trends that will influence and shape future library spaces The authors are international senior university library managers and academics who provide a range of views and approaches and experience of individual projects and initiatives      *Serials Librarianship in Transition* Peter Gellatly,2019-12-05 This book first published in 1986 contains the invaluable and enlightening perspectives of an international roster of experts on the state of the art of serials librarianship and the indications for the future of the profession      *Library & Information Science Abstracts* ,1979      *Critical Thinking Across the Curriculum* Diane F. Halpern,2014-02-04 Consider that many of the people who are alive today will be working at jobs that do not currently exist and that the explosion of information means that today s knowledge will quickly become outdated As a result two goals for education clearly emerge learning how to learn and how to think critically about information that changes at a rapid rate We face a multitude of new challenges to our natural environment difficult dilemmas concerning the use of weapons of mass destruction political agendas for the distribution of scarce commodities and wealth psychological problems of loneliness and depression escalating violence and an expanding elderly population International in scope and in magnitude these new problems strain resources and threaten the continuance of life on earth To creatively and effectively attack these imminent problems a well educated thinking populace is essential An abridged edition of Halpern s best selling text *Critical Thinking Across the Curriculum* is designed to help students enhance their thinking skills in every class The skills discussed are needed in every academic area and setting both in and out of class They are determining cause assessing likelihood and uncertainty comprehending complex text solving novel problems making good decisions evaluating claims and evidence and thinking creatively In this adaptation of her best selling text Diane Halpern applies the theories and research of cognitive psychology to the development of critical thinking and learning skills needed in the increasingly complex world in which we work and live The book is distinguished by its clear writing style humorous tone many practical examples and anecdotes and rigorous academic grounding Everyday examples and exercises promote the transfer of critical thinking skills and dispositions to real world settings and problems The goal is to help readers recognize when and how to apply the thinking

skills needed to analyze arguments reason clearly identify and solve problems and make sound decisions Also of importance a general thinking skills framework ties the chapters together but each is written so that it can stand alone This organization allows for maximum flexibility in the selection of topics and the order in which they are covered This book is intended for use in any course emphasizing critical thinking as an approach to excellence in thinking and learning     **Alternatives** Helen P.
