

An aerial photograph of a winding river in a rural landscape. The river flows from the top left towards the bottom right, with several meanders. The surrounding land is a mix of green and brown, suggesting fields and forests. In the background, there are dark, rolling hills. The sky is a deep blue, and a vibrant green aurora borealis is visible in the upper portion of the image, casting a glow over the landscape. The title 'RURAL DENMARK' and 'AND ITS LESSONS' is written in a white, serif font across the middle of the image, with a thin white line separating it from the author's name below.

from *Rural Denmark and Its Lessons*. In collecting the material for this book, its author followed the method of actually inspecting Danish farms of various sizes and taking careful notes on the spot of what he saw and heard. The results recorded in these pages may therefore be accepted as accurate to the best of his knowledge and belief. In the same way, he interviewed personally the different authorities whose opinions he has quoted. As most of this work, however, was of necessity done by the help of an interpreter, it is possible that errors consequent on misunderstandings may have crept in here and there, and for such errors, if any, he apologises in advance. Further, the fact that all money, standards, temperatures, weights, measures, any imperfections that remain are intentionally left to preserve the state of such historical works. *Rural Denmark and Its Lessons* Henry Rider Haggard, 1913 **Some Lessons from Rural Denmark** Frank Tate, 1924 *RURAL DENMARK & ITS LESSONS* H. Appalachia on Our Mind Henry D. Shapiro, 2014-03-30 *Appalachia on Our Mind* is not a history of Appalachia. It is rather a history of the American idea of Appalachia. The author argues that the emergence of this idea has little to do with the realities of mountain life but was the result of a need to reconcile the otherness of Appalachia as described by local color writers, tourists, and home missionaries with assumptions about the nature of America and American civilization. Between 1870 and 1900, it became clear that the existence of the strange land and peculiar people of the southern mountains challenged dominant notions about the basic homogeneity of the American people and the progress of the United States toward achieving a uniform national civilization. Some people attempted to explain Appalachian otherness as normal and natural, no exception to the rule of progress. Others attempted the practical integration of Appalachia into America through

philanthropic work In the twentieth century however still other people began questioning their assumptions about the characteristics of American civilization itself ultimately defining Appalachia as a region in a nation of regions and the mountaineers as a people in a nation of peoples In his skillful examination of the invention of the idea of Appalachia and its impact on American thought and action during the early twentieth century Mr Shapiro analyzes the following the discovery of Appalachia as a field for fiction by the local color writers and as a field for benevolent work by the home missionaries of the northern Protestant churches the emergence of the problem of Appalachia and attempts to solve it through explanation and social action the articulation of a regionalist definition of Appalachia and the establishment of institutions that reinforced that definition the impact of that regionalistic definition of Appalachia on the conduct of systematic benevolence especially in the context of the debate over child labor restriction and the transformation of philanthropy into community work and the attempt to discover the bases for an indigenous mountain culture in handicrafts folksong and folkdance **Miscellaneous**
