*The World Bank Research Observer*, 2007 **China's Economy Into the New Century** John Wong, Ding Lu, 2002 In the last two decades of the 20th century China stood out as the world's star performer in economic growth thanks to the market oriented reform that started in 1978 At the turn of the century the Chinese economy faces a series of challenges to sustain its growth and stability The two decade long rapid growth has effectively strengthened China's economic power and raised its people's standard of living It has also transformed China from a centrally planned command economy into a socialist market economy which operates increasingly in line with capitalist norms Major structural problems however remain and are growing acute Weakness in the fiscal system breeds rent seeking at the local level and causes tension in the state budget The flawed financial institutions and the biased ownership structure continue to distort resource allocation and cause huge efficiency losses Inter provincial and inter regional disparity is reaching a level that threatens national unity and social stability As China joins the World Trade Organization and becomes more integrated into the world economy it urgently needs to improve the domestic business environment and to beef up indigenous industries for foreign competition This volume is a collection of papers written by scholars at the East Asian Institute to address those problems during the period 1999-2001 The authors with their knowledge and experience in China studies provide in depth observations and professional analyses of some of the most important issues for the Chinese economy at the turn of the century Some of the observations and analyses

lead to enlightening policy recommendations The solid scholarship combined with the policy orientation of these papers will appeal greatly to researchers in academia governments and other institutions The policy oriented and fact based analyses will also be of interest to practitioners in business including business consultants *Pro-poor Development Policies* Hal Hill,Majah-Leah V Ravago,James A. Roumasset,2022-10-03 This collection of essays provides a wealth of information and analysis about the Philippine economy and the role of agriculture and economic policy in it The Philippine experience has been quite different from the highly successful Asian economies with a long period of low growth until the turn of the century and only then greater success The authors cover not only the Philippine experience but also place it in its Asian context and that of developing countries more generally They report on the lessons learned both positive and negative from the various economic policies that have been adopted with regard to both agriculture and to economic inequality Those interested in Philippine economic development and Asian development more broadly will find this an important reference work Anne O Krueger Senior Research Professor Johns Hopkins School of Advanced International Studies 1st Deputy Managing Director IMF 2001 6 Vice President of Economics and Research World Bank 1982 86 The World Bank Research Program 2001 World Bank,World Bank Staff,2001-01-01 This publication is a compilation of reports on research projects initiated under way or completed in fiscal year 2001 July 1 2000 through June 30 2001 The abstracts cover 150 research projects from the World Bank and grouped under 11 major headings including poverty and social development health and population education labor and employment environment infrastructure and urban development and agriculture and rural development The abstracts detail the questions addressed the analytical methods used the findings to date and their policy implications Each abstract identifies the expected completion date of each project the research team and reports or publications produced **Road Development, Economic Growth, and Poverty Reduction in China** Shenggen Fan,Connie Chan-Kang,2005-01-01 Since 1985 the Chinese government has given high priority to building roads particularly high quality roads that connect industrial centers This report evaluates the contribution roads have made to poverty reduction and economic growth in China over the last two decades It disaggregates road infrastructure into different classes to account for differences in their quality and then estimates the impact of road investments on overall economic growth agricultural growth urban growth urban poverty reduction and rural poverty reduction The report makes the case for a greater focus on low quality and rural roads in future infrastructure investment strategies in China It does so by showing how investing in low quality and rural roads will generate larger marginal returns raise more people out of poverty per yuan invested and reduce regional development disparity more sharply than investing in high quality roads The study s findings will have considerable implications for China s infrastructure policy *China's Logic: The Balance Development* Lixing Zou,2017-10-10 The law of balance is not just a motivating power but also serves the purpose of development How did human society develop in a balanced manner in history How is China s Modernization impacted by the law of equilibrium How does the law of balance affect China s economic and trade relations

with other countries This book attempts to answer these questions and more It applies the balance law methodology to systematically analyze major factors influencing the sustainable development of the Chinese economy and society and to discuss the balanced way of thinking market credit innovation energy and international collaboration that boost sustainable development While the theoretical system of socialism with Chinese characteristics needs a balanced development perspective solving the problem of imbalance requires a balanced approach as well as a balanced interaction between man nature and society which is the key factor for economic development in the 21st century
