disadvantaged in terms of access to conventional financial services from formal financial institutions The objective of this book is to provide an overview of microfinance programmes in Asia focusing in particular on the determinants of the accessibility of rural households to microcredit The book studies seven Asian countries such as China Malaysia Vietnam Thailand the Philippines Indonesia and Bangladesh with two specific case studies *Varieties of Governance in China* Jie Lu, 2015 *Varieties of Governance in China* examines the origins of the varying institutional foundations of rural China s decentralized governance explains the performance and change of the formal and informal institutions that uphold rural China s governance and documents the effects of rural urban migration on institutional change and local governance in Chinese villages *OECD Review of Agricultural Policies: China 2005* OECD, 2005-11-14 This book presents a comprehensive overview and assessment of China s agricultural policies combined with OECD estimates of the level of support provided to the Chinese farm sector *Banking in China* V. Clark, 2006-03-14 The challenges in development often seem insurmountable They overwhelm tions and the builders of their most basic institutions I am often asked how development finance agencies can work together to meet this challenge In reply I invite you to read a story about cooperation in re building one of the most basic institutions of any society the banking system KfW Bankengruppe places great emphasis on financial sector development Our experience in our own country and beyond our borders shows that one of the first steps is building a banking system that fuels growth through investment in enterprises Micro small and medium enterprises are the backbone of many economies they are also the wealth of the people and generate their hope in the future We believe that the depth of the financial sector is related to economic growth the growth and safety of deposits the facility of payments and the invitation to develop new products and services that strengthen markets and promote investment A strong banking system supports economic growth by attracting unproductive capital and injecting it into the

economy increasing the productivity of the country's capital base and leveraging it by attracting outside capital
