Mental Evolution in Animals George John Romanes, 2015-06-24 Excerpt from *Mental Evolution in Animals* With a Posthumous Essay on Instinct by Charles Darwin It will be observed that the title of this volume is *Mental Evolution in Animals* The reasons which have led me to depart from my intention as expressed in the Preface of *Animal Intelligence* to devote the present essay to mental evolution in man as well as in animals are given in the introductory chapter It may appear that in the following pages a somewhat disproportionate amount of space has been allotted to the treatment of Instinct but looking to the confusion which prevails with reference to this important branch of psychology in the writings of our leading authorities I have deemed it desirable to consider the subject exhaustively It is I think desirable briefly to explain the circumstances under which I have been enabled to produce so much hitherto unpublished material from the MSS of the late Mr Darwin and also to state the extent to which I have availed myself of such of this unpublished material as came into my hands As I have already explained in the Preface of *Animal Intelligence* Mr Darwin himself gave me all his MSS relating to psychological subjects with the request that I should publish any parts of them that I chose in my works on *Mental Evolution* But after his death I felt that the circumstances with reference to this kind offer were changed and that I should scarcely be justified in appropriating so much material the value of which had become enhanced About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in

Mental Evolution in Animals George John Romanes,2017-11-25 Excerpt from Mental Evolution in Animals With a Posthumous Essay on Instinct by Charles Darwin Could be published in a consecutive form this is the chapter which was intended for the Origin of Species and which for the sake of reference I have added as an Appendix to my present work For the rest the numerous disjointed para graphs and notes which I found among the mss I have woven into the text of this book feeling on the one hand that they were not so well suited to appear as a string of disconnected passages and on the other hand that it was desirable to publish them somewhere I have gone through all the mss carefully and have arranged so as to introduce every passage in them of any importance which I find to have been hitherto unpublished In no case have I found any reason to suppress a passage so that the quotations which I have given may be collectively regarded as a full supplementary publication of all that Mr Darwin has written in the domain of psychology In order to facilitate reference I have given in the Index under Mr Darwin s name the numbers of all the pages in this work where the quotations in question About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Richards, 2014-06-01. With insight and wit, Robert J. Richards focuses on the development of evolutionary theories of mind and behavior from their first distinct appearance in the eighteenth century to their controversial state today. Particularly important in the nineteenth century were Charles Darwin's ideas about instinct, reason, and morality, which Richards considers against the background of Darwin's personality, training, scientific and cultural concerns, and intellectual community. Many critics have argued that the Darwinian revolution stripped nature of moral purpose and ethically neutered the human animal. Richards contends, however, that Darwin, Herbert Spencer, and their disciples attempted to reanimate moral life, believing that the evolutionary process gave heart to unselfish, altruistic behavior. Richards's book is now the obvious introduction to the history of ideas about mind and behavior in the nineteenth century. Mark Ridley, *Times Literary Supplement*.
