Models Of The Visual System:

Models of the Visual System George K. Hung, Kenneth J. Ciuffreda, 2002-01-31 Over the past thirty years with improvements in optics electronics and computer technology great strides have been made in the quantitative analysis of the visual system A number of books on eye movement research have been written that have dealt with specific aspects of either eye movement control However none of these books provide a comprehensive overview of multiple aspects of the visual system Moreover few of these books contain modeling and detailed quantitative analyses of the visual system Further since the major books are almost ten years old there is a need for an update to include the most recent research findings It is with these considerations in mind that we have carefully compiled this updated comprehensive and quantitative model based edited book on various components of the visual system Some of the best vision scientists in the world in their respective fields have contributed to chapters in this book They have expertise in a wide variety of fields including bioengineering basic and clinical visual science medicine neurophysiology optometry and psychology Their combined efforts have resulted in a high quality book that covers modeling and quantitative analysis of optical neurosensory oculomotor perceptual and clinical systems It includes only those techniques and models that have such fundamentally strong physiological control system and perceptual bases that they will serve as foundations for models and analysis techniques in the future The book is aimed first towards seniors and beginning graduate students in biomedical engineering neurophysiology optometry and psychology who will gain a broad understanding of quantitative analysis of the visual system In addition it has sufficient depth in each area to be useful as an updated reference and tutorial for graduate and post doctoral students as well as general vision scientists

Besharse,Reza Dana,Barbara Ann Battelle,Thomas A. Reh,Ernst R. Tamm,David Beebe,Peter Bex,Paul Bishop,Dean Bok,Patricia D'Amore,Henry Edelhauser,Linda Mcloon,Jerry Niederkorn,2010-05-27 As the first comprehensive reference for the eye its support structures diseases and treatments Encyclopedia of the Eye is an important resource for all visual scientists ophthalmologists and optometrists as well as researchers in immunology infectious disease cell biology neurobiology and related disciplines This four volume reference is unique in its coverage of information on all tissues important for vision including the retina cornea and lens It also covers the physiological and pathophysiologic processes that affect all eye tissues This Encyclopedia is invaluable for graduate students and postdoctoral fellows who are seeking an introduction to an area of eye research Each chapter explains the basic concepts and provides references to relevant chapters within the Encyclopedia and more detailed articles across the wider research literature The Encyclopedia is also particularly useful for visual scientists and practitioners who are researching a new area seeking deeper understanding of important research articles in fields adjacent to their own or reviewing a grant outside their immediate area of expertise Written by experts at a level that permits students to grasp key elements of a specific subject Provides an entryway into the major features of current eye research No other source puts this much information so well indexed and with so many helpful full color figures and graphics in the hands of the ophthalmic scientist

The Amphibian Visual System Katherine V. Fite,2013-09-03 The Amphibian Visual System A Multidisciplinary Approach is a compendium of articles across a broad range of disciplines within experimental biology focusing on the study of the amphibian visual system The book presents a survey of the evolutionary history and major taxonomic and ecological adaptations of amphibians anatomic physiological developmental and behavioral data relating to the amphibian visual system description of important standards for laboratory amphibians and the crucial problem of species identification in neurobiological research Zoologists experimental biologists neurologists and anatomists will find the text very interesting

Operational Logistics Moshe Kress,2012-12-06 Operational Logistics The Art and Science of Sustaining Military Operations explores military logistics in terms of the theoretical foundations of operational logistics OpLog and its applications The theoretical foundations are examined with regard to two dimensions First the artistic or qualitative aspects of contemporary logistics are looked at in the context of the operational level of war These OpLog aspects include principles imperatives and tenets which are stated and analyzed The second dimension relates to the scientific aspects of logistics It is manifested by a formal network model that represents the structural and operational features of an OpLog system Hence the book examines both artistic and scientific dimensions of military logistics and integrates the respective qualitative and quantitative aspects into a unified and definitive presentation of operational logistics Chapter 1 presents a general introduction to military logistics Chapter 2 discusses the general structure and characteristics of logistics and describes its three levels strategic operational and tactical Chapter 3 focuses on Operational Logistics OpLog Chapter 4 deals with the logistics planning process Chapter 5 addresses the issue of logistics

information Chapter 6 deals with forecasting logistics demands Chapter 7 introduces the first version of the logistics network model Chapter 8 addresses an important property of an OpLog system Flexibility Chapter 9 discusses two major and dual issues in OpLog practice force accumulation and medical treatment and evacuation Chapter 10 presents an inter temporal network optimization model that is designed to determine deployment and employment of the support chain in an OpLog system

Applications of Human Performance Models to System Design Grant R. McMillan, David Beevis, Eduardo Salas, 2013-06-29 The human factors profession is currently attempting to take a more proactive role in the design of man machine systems than has been characteristic of its past Realizing that human engineering contributions are needed well before the experimental evaluation of prototypes or operational systems there is a concerted effort to develop tools that predict how humans will interact with proposed designs This volume provides an overview of one category of such tools mathematical models of human performance It represents a collection of invited papers from a 1988 NATO Workshop The Workshop was conceived and organized by NATO Research Study Group 9 RSG 9 on Modelling of Human Operator Behaviour in Weapon Systems It represented the culmination of over five years of effort and was attended by 139 persons from Europe Canada and the United States RSG 9 was established in 1982 by Panel 8 of the Defence Research Group to accomplish the following objectives Determine the utility and state of the art of human performance modelling Encourage international research and the exchange of ideas Foster the practical application of modelling research Provide a bridge between the models and approaches adopted by engineers and behavioral scientists Present the findings in an international symposium

Neural Networks for Perception Harry Wechsler, 2014-05-10 Neural Networks for Perception Volume 1 Human and Machine Perception focuses on models for understanding human perception in terms of distributed computation and examples of PDP models for machine perception This book addresses both theoretical and practical issues related to the feasibility of both explaining human perception and implementing machine perception in terms of neural network models The book is organized into two parts The first part focuses on human perception Topics on network model of object recognition in human vision the self organization of functional architecture in the cerebral cortex and the structure and interpretation of neuronal codes in the visual system are detailed under this part Part two covers the relevance of neural networks for machine perception Subjects considered under this section include the multi dimensional linear lattice for Fourier and Gabor transforms multiple scale Gaussian filtering and edge detection aspects of invariant pattern and object recognition and neural network for motion processing Neuroscientists computer scientists engineers and researchers in artificial intelligence will find the book useful
