Same Difference Rosalind Barnett, Caryl Rivers, 2009-03-25 From respected academics like Carol Gilligan to pop psychology guru like John Gray and even the controversial Harvard President Lawrence Summers the message has long been the same Men and women are fundamentally different and trying to bridge the gender gap can only lead to grief But as the New York Times Book Review raved Barnett and Rivers debunk these theories in a no nonsense way offering a refreshingly direct and unashamedly judgmental critique of traditional parental roles tutting at the couples they interviewed who cling to stereotyped ideas of the family Blending case histories new research and thoughtful analysis the writers describe the divide between the sexes as a crevice not a chasm The good news We're all a lot more flexible than the gender clichés let on Psychology Today *Challenging Popular Myths of Sex, Gender and Biology* Malin Ah-King, 2013-11-27 This edited volume challenges popular notions of sex gender and biology and features international trans disciplinary research The book begins with an exploration of supposedly natural sexual differences then looks at research in evolutionary biology and examines topics such as gender stereotypes in humans The first chapters explore important questions What are the fundamental sex differences How do genes and hormones influence an individual's sex Subsequent chapters concern topics including sex stereotypes in the field of sexual conflict how the focus on genes in evolutionary biology disregards other means of inheritance and the development of Darwin's theory of sex differences The last three chapters look at humans discussing an interdisciplinary approach to the evolution of sex differences in body height biological versus social constructive perspectives on the gendering of voices and nature culture arguments in the current political debate on paternity leave in Norway **The End of Gender** Debra Soh, 2021-08-31 International sex researcher neuroscientist and frequent contributor to The Globe and Mail Toronto Debra Soh discusses what she sees as gender myths in this examination of the many facets of gender identity [Gender and the Interpretation of Classical Myth](#) Lillian Doherty, 2015-03-02 Myths reflect reinforce and sometimes

Health Communication for the Prevention of Gender-Based Violence Given Mutinta, 2025-10-19 This book highlights the role of traditional media in shaping public perceptions of gender based violence and how digital media has revolutionised health communication It also discusses the potential of indigenous communication tools such as folktales and oral traditions to prevent gender based violence in marginalised communities The book highlights the need for partnerships between organisations healthcare providers and community leaders to enhance resource sharing and adapt to evolving community needs and underscores how continuous monitoring and evaluation of these programmes are crucial for a successful fight against gender based violence The book argues that evidence based recommendations for improving health communication efforts and increasing awareness can help create a more secure and equitable society *Women, Gender, Remittances and Development in the Global South* Ton van Naerssen, Lothar Smith, Marianne H. Marchand, 2016-03-09 This book endeavours to take the conceptualisation of the relationship between transnational remittance exchanges and gender to a new level Thus inevitably it provides a number of case studies of relationships between gender and remittances from around the world highlighting different processes and practises Thereby the authors seek to understand the impact of remittances on gender and gender relations both at the sending as well as at the receiving end For each case study authors ask how remittances affect gender identities and relationships but also vice versa By itself this already adds a wealth of insights to a field that is remarkably understudied despite a volume of studies on gender and the feminization of migration in developing contexts

Chapters take an open explorative approach to the relationship between gender and remittance behaviour with the aid of case studies focusing on transnational flows between migrants and countries of origin. With the wide variety of cases this book is able to provide conceptual insights to better understand how remittances affect gender identity roles and relations at both the receiving and sending end and give specific attention to the roles of various actors directly and indirectly involved in remittance sending in current collectively organized remittance schemes from around the world.

Seeing Nature Through Gender Virginia Scharff, 2003. Environmental history has traditionally told the story of Man and Nature. Scholars have too frequently overlooked the ways in which their predominantly male subjects have themselves been shaped by gender. *Seeing Nature through Gender* here reintroduces gender as a meaningful category of analysis for environmental history, showing how women's actions, desires, and choices have shaped the world and seeing men as gendered actors as well. In thirteen essays that show how gendered ideas have shaped the ways in which people have represented, experienced, and consumed their world, Virginia Scharff and her coauthors explore interactions between gender and environment in history. Ranging from colonial borderlands to transnational boundaries, from mountaintop to marketplace, they focus on historical representations of humans and nature on questions about consumption, environmental politics, and on the complex reciprocal relations among human bodies and changing landscapes. They also challenge the ecofeminist position by challenging the notion that men and women are essentially different creatures with biologically different destinies. Each article shows how a person or group of people in history have understood nature in gendered terms and acted accordingly, often with dire consequences for other people and organisms. Here are considerations of the ways we study sexuality among birds of William Byrd's masking sexual encounters in his account of an eighteenth-century expedition; of how the ecology of fire in a changing built environment has reshaped firefighters' own gendered identities; of how the evolution of snow bunnies to shredder beetles; others are dead serious, as in a chilling portrait of how endocrine disruptors are reinventing humans, animals, and water systems from the cellular level out. Aiding and adding significantly to the enterprise of environmental history, *Seeing Nature through Gender* bridges gender history and environmental history in unexpected ways to show us how the natural world can remake the gendered patterns we've engraved on ourselves and on the planet.

Gender and Citizenship in the Middle East Suad Joseph, 2000-11-01. The essays in this work illustrate the various ways in which women in the Middle East fall short of being vested with the rights and privileges that would define them as fully enfranchised citizens. They offer an examination of national legislation on personal status, penal law, and labour.

Gender and the Interpretation of Classical Myth Lillian Doherty, 2015-03-02. Myths reflect, reinforce, and sometimes subvert gender ideologies and so have an influence in the real world. The struggles to redefine gender roles and identities in our own time are inevitably reflected in our interpretations and retellings of these classical myths. Using the new lenses provided by gender studies and diverse

forms of feminism Lillian Doherty re examines some of the major approaches to myth interpretation in the twentieth century psychological ritualist charter structuralist and folklorist She also explores popular uses of classical mythology from television and comic books to the evocation of goddesses in Jungian psychology
