**The Northwest Coast** Barry M. Gough,2011-11-01 The voyages of Cook and Vancouver heralded a vast influx of irrepressible Europeans fur traders whalers administrators visitors missionaries miners botanists and sailors people of every class and distinction They came to conquer the Pacific its islands and its continents for God gold and glory They brought with them their morals ideologies knowledge technology plants and animals They also brought diseases rum and guns They brought with them powers to build and powers to destroy from the Epilogue The Northwest Coast was irrevocably changed the day that Captain James Cook sailed into Nootka Sound in 1778 Cook s discovery of the sea otter population along the coast initiated the maritime fur trade which in turn led to feverish competition among several nations especially Britain Russia and the United States as well as the celebrated rivalry between Spain and Britain for control of Nootka By 1812 a toe hold of British empire was established and the aboriginal way of life was shattered The Northwest

Coast documents Britain's rise to pre-eminence in this far-flung corner of the empire. It shows how the relentless activities of its commercial interests, the adroit use of its naval power and the steely resolve of its diplomats secured British claims to dominion and rights to trade along the Northwest Coast. Written by a leading maritime scholar and based on fresh research into known manuscripts and printed works on Pacific trade and exploration, this book incorporates new interpretations on exploration and commercial activity in this area. It documents the interaction, often violent, between British sailors and aboriginal people, depicts many of the rivalries among British mariners and examines various claims to the discovery of the Northwest Passage. The Northwest Coast significantly expands and updates the author's award-winning book *Distant Dominion*. Gough's compelling narrative combined with his extensive use of quotations from the journals and correspondence of explorers and merchant traders provide insights into the motives and attitudes of these early pioneers of the empire.

**A Voyage to the North West Side of America** Robert Galois, 2011-11-01 James Colnett, a veteran of James Cook's second voyage to North America, was an early participant in the maritime sea otter trade. Between 1786 and 1789, his two vessel expedition traversed the Northwest Coast from Prince William Sound to Vancouver Island and wintered on the Hawaiian Islands. Along the way, he and his crew had some remarkable encounters with Native peoples of the Northwest Coast and the Hawaiian Islands; they were the first Europeans to encounter the Tsimshian and the southern Heiltsuk peoples, as well as the first to land on the southern Queen Charlotte Islands. Colnett's journal of this expedition is published here for the first time. Editor Robert Galois provides extensive annotations along with an introductory essay addressing the geopolitical context of the voyage and the intellectual background that shaped the writing of the journal. Galois supplements Colnett's writings with extracts from a second journal, also previously unpublished, by Andrew Bracey Taylor, third mate on one of the ships under Colnett's command. Also included are illustrations from Colnett's journals and a variety of maps, both contemporary and historical. This fascinating and informative account offers a new understanding of the early European presence in the Northwest and of Native responses to these developments. It will interest historians, geographers, and ethnographers of the Northwest Coast and beyond.

*Enlightenment and Exploration in the North Pacific, 1741-1805* Stephen W. Haycox, James K. Barnett, Caedmon Liburd, 2016-06-01 Saluting an era of adventure and knowledge seeking, fifteen original essays consider the motivations of European explorers of the Pacific, the science and technology of 18th-century exploration, and the significance of Spanish, French, and British voyages. Among the topics discussed are the quest by enlightenment scientists for new species of plant and animal life and their fascination with Native cultures, advances in shipbuilding, navigation, medicine, and diet that made extended voyages possible, and the lasting

*History of the Sea* Callum Roberts,2009-01-05 Humanity can make short work of the oceans creatures In 1741 hungry explorers discovered herds of Steller s sea cow in the Bering Strait and in less than thirty years the amiable beast had been harpooned into extinction It s a classic story but a key fact is often omitted Bering Island was the last redoubt of a species that had been decimated by hunting and habitat loss years before the explorers set sail As Callum M Roberts reveals in *The Unnatural History of the Sea* the oceans bounty didn t disappear overnight While today s fishing industry is ruthlessly efficient intense exploitation began not in the modern era or even with the dawn of industrialization but in the eleventh century in medieval Europe Roberts explores this long and colorful history of commercial fishing taking readers around the world and through the centuries to witness the transformation of the seas Drawing on firsthand accounts of early explorers pirates merchants fishers and travelers the book recreates the oceans of the past waters teeming with whales sea lions sea otters turtles and giant fish The abundance of marine life described by fifteenth century seafarers is almost unimaginable today but Roberts both brings it alive and artfully traces its depletion Collapsing fisheries he shows are simply the latest chapter in a long history of unfettered commercialization of the seas The story does not end with an empty ocean Instead Roberts describes how we might restore the splendor and prosperity of the seas through smarter management of our resources and some simple restraint From the coasts of Florida to New Zealand marine reserves have fostered spectacular recovery of plants and animals to levels not seen in a century They prove that history need not repeat itself we can leave the oceans richer than we found them      **William Robert Broughton's Voyage of Discovery to the North Pacific**
