The Essential Civil Society Reader Don E. Eberly, 2000-07-12 There is a growing anxiety about the basic health of society. Everywhere we see the fraying of the social fabric, the decline of families, the absence of consensus on unifying moral principles, and the disappearance of community and voluntary associations. Around the world, politicians and intellectuals of all political persuasions seek to restore civil society by cultivating stronger public ethics and social institutions. In *The Essential Civil Society Reader*, Don Eberly, one of the nation's leading civil society theorists and activists, presents the classic writings of the leading scholars and organizers who have brought the civil society debate to the forefront of American politics. The future of democracy depends on a strong civil society, and this book tells readers how we can achieve it.

Political and Cultural Perceptions of George Orwell Ian Williams, 2017-08-30 This book analyzes George Orwell's politics and their reception across both sides of the Atlantic. It considers Orwell's place in the politics of his native Britain and his reception in the USA, where he has had some of his most fervent emulators, exegetists, and detractors. Written by an ex-teenage Maoist from Liverpool, UK, who now lives and writes in New York, the book points out how often the different strands of opinion derive from ancestral ideological struggles within the Communist/Trotskyist movement in the 30s and how these often overlook or indeed consciously ignore the indigenous British politics and sociology that did so much to influence Orwell's political and literary development. It examines in the modern era what Orwell did in his: the seductions of simplistic and absolutist ideologies for some intellectuals, especially in their reactions to Orwell himself.

Life in the Market Ecosystem Stuart K. Hayashi, 2014-11-13 *Life in the Market Ecosystem*, the second book in the *Nature of Liberty* trilogy, confronts evolutionary psychology head-on. It describes the evolutionary psychologists' theory of gene-culture co-evolution, which states that although customs and culture are not predetermined by anyone's genetic makeup, one's practice of a custom can influence the likelihood of that person having children and grandchildren. Therefore, according to the theory, customs count as evolutionary adaptations. Extending that theory further, as entire systems of political economy—capitalism, socialism, and hunter-gatherer subsistence—consist of multiple customs and institutions, it follows that an entire political-economic system can likewise be classified as an evolutionary adaptation. Considering that liberal-republican capitalism has insofar as the system has been implemented done more to reduce the mortality rate and secure human fertility than other models of societal structure, it stands to reason that liberal-republican capitalism is itself a beneficent evolutionary adaptation. Moreover, as essential tenets of Rand's Objectivism—individualism, observation-based rationality, and peaceable self-interest—have been integral to the development of the capitalist ecosystem, important aspects of the Objectivism are worthwhile adaptations as

well This book shall uphold that position as well as combat critiques by evolutionary psychologists and environmentalists who denounce capitalism as self destructive Instead capitalism is the most sustainable and fairest political model This book argues that of all the philosophies Objectivism is the one that is most fit for humanity **Culture of the Internet** Sara Kiesler,2014-02-04 As we begin a new century the astonishing spread of nationally and internationally accessible computer based communication networks has touched the imagination of people everywhere Suddenly the Internet is in everyday parlance featured in talk shows in special business technology sections of major newspapers and on the covers of national magazines If the Internet is a new world of social behavior it is also a new world for those who study social behavior This volume is a compendium of essays and research reports representing how researchers are thinking about the social processes of electronic communication and its effects in society Taken together the chapters comprise a first gathering of social psychological research on electronic communication and the Internet The authors of these chapters work in different disciplines and have different goals research methods and styles For some the emergence and use of new technologies represent a new perspective on social and behavioral processes of longstanding interest in their disciplines Others want to draw on social science theories to understand technology A third group holds to a more activist program seeking guidance through research to improve social interventions using technology in domains such as education mental health and work productivity Each of these goals has influenced the research questions methods and inferences of the authors and the look and feel of the chapters in this book Intended primarily for researchers who seek exposure to diverse approaches to studying the human side of electronic communication and the Internet this volume has three purposes to illustrate how scientists are thinking about the social processes and effects of electronic communication to encourage research based contributions to current debates on electronic communication design applications and policies and to suggest by example how studies of electronic communication can contribute to social science itself Language and Globalization Maryam Borjian,2017-06-26 In this collection of real life personal narratives on the theme of language and globalization scholars from a range of different sub disciplines of linguistics time periods and geographical spaces throughout the world examine the interaction and intersectionality of languages and globalization and the implications of such interactions for world languages and cultures A feature of the book is the application of autoethnography as its underlying approach method in which contributors draw on their own lived experiences of life scholarship and work to investigate and reflect on linguistic globalization and its issues and challenges against the backdrop of the globalized world of the 21st century **Adorno** Conrad Riker, Tired of Woke Professors Gaslighting You Into Hating Your Own Masculinity Why are men blamed for every societal problem while feminism gets a free pass How did a Marxist hypocrite who lounged in Hollywood mansions become academia s guru for hating capitalism Ready to crush the woke virus Adorno spawned and reclaim your right to lead Expose Adorno s luxury hypocrisy preaching revolution from a Beverly Hills pool Debunk the culture industry myth that action movies and Joe Rogan
