Presidents Parliaments And Policy:

Presidents, Parliaments, and Policy Stephan Haggard, Matthew D. McCubbins, 2001-01-15 Advocates of parliamentary rule have been highly critical of presidentialism for dividing powers and providing the opportunity for gridlock between branches Fixed executive terms can saddle publics with ineffectual leaders who are not easily removed Yet the great theorists of presidential rule beginning with the Federalists saw very different qualities in the same institutions a desirable combination of strong leadership with checks on executive discretion These diverse assessments arise because we have surprisingly little comparative work on how presidential democracies function The introductory essays in this volume lay the theoretical groundwork for such comparative analysis Drawing on detailed cases of economic policymaking in Asia Latin America and Central Europe this book shows the diversity of presidential systems and isolates the effects of presidentialism from other factors that influence public policy such as party systems In doing so it casts doubt on the critics of presidential rule and underscores the continuing vitality of this particular form of democratic rule *Post-Communist and Post-Soviet Parliaments* Philip Norton, David M. Olson, 2013-09-13 The sudden collapse of communism stimulated both the rapid emergence of fledgling democracies and scholarly attention to the post communist transition These newly democratized parliaments have been described as parliaments in adolescence This book identifies six parliaments which exemplify the wide range of developments in the new post communist political systems from the stable consolidated democracies to the less stable and more authoritarian states within which their respective parliaments function Finally the post communist parliaments are compared with the presumptively more established west European parliaments This book bridges the usual gap in research between the post communist parliaments and more normal democratic parliaments to develop a common legislative research perspective on both new and established parliaments This book was previously published as a special issue of the Journal of Legislative Studies **Patterns of Parliamentary Behavior** Herbert Döring, 2017-03-02 This volume begins where the first D ring book of 1995 finished by considering what effects the rules had on legislative output during the same period It addresses four distinct yet complementary research topics the connection between a number of veto players and law production in West European parliamentary democracies the impact of closed versus open rules the effects of committee structure and organization on the degree of conflict or consensus on the procedure of passing legislation the importance of agenda setting and agenda control for the prevention of cycling across issues and the distribution of particular benefits of shifting and transient majorities Fundamental to this volume is the ability of the project group to fashion an original data set As a consequence this volume is able to ascertain the extent to which parliamentary procedures contributed to shaping policy output in this field during the 1980s **21st Century Political Science: A Reference Handbook** John T Ishiyama, Marijke Breuning, 2011 Offering full coverage of major subthemes and subfields within political science this reference handbook includes entries on topics from theory and methodology to international relations and institutions

Are Politics Local? Scott Morgenstern, 2017-10-12 Are politics local Why Where When How do we measure local versus national politics And what are the effects This book provides answers to these questions within an explicitly comparative framework including both advanced and developing democracies It does so by using a statistically based and graphical account of party nationalization providing methodology and data for legislative elections covering scores of parties across dozens of countries The book divides party nationalization into two dimensions static and dynamic to capture different aspects of localism both with important implications for representation Static nationalization measures the consistency in a party's support across the country and thus shows whether parties are able to encompass local concerns into their platforms Dynamic nationalization in turn measures the consistency among the districts in over time change in electoral results under the presumption that where districts differ in their electoral responses local factors must drive politics Each of the two dimensions in sum considers representation from the perspective of the mix of national versus local politics

Territory and Electoral Rules in Post-Communist Democracies Daniel Bochsler, 2015-12-11 The book extends research on the territorial structure of party systems party nationalization to 20 post communist democracies It explains party nationalisation as a consequence of ethnically oriented politics and shows how party nationalisation can increase our understanding of electoral systems

Shaping the Metropolis Zack Taylor, 2019-05-23 Rising income inequality

and concentrated poverty threaten the social sustainability of North American cities Suburban growth endangers sensitive ecosystems water supplies and food security Existing urban infrastructure is crumbling while governments struggle to pay for new and expanded services Can our inherited urban governance institutions and policies effectively respond to these problems In *Shaping the Metropolis* Zack Taylor compares the historical development of American and Canadian urban governance both at the national level and through specific metropolitan case studies Examining Minneapolis St Paul and Portland Oregon in the United States and Toronto and Vancouver in Canada Taylor shows how differences in the structure of governing institutions in American states and Canadian provinces cumulatively produced different forms of urban governance Arguing that since the nineteenth century American state governments have responded less effectively to rapid urban growth than Canadian provinces he shows that the concentration of authority in Canadian provincial governments enabled the rapid adoption of coherent urban policies after the Second World War while dispersed authority in American state governments fostered indecision and catered to parochial interests Most contemporary policy problems and their solutions are to be found in cities *Shaping the Metropolis* shows that urban governance encompasses far more than local government and that states and provinces have always played a central role in responding to urban policy challenges and will continue to do so in the future

Between Presidential Power and Legislative Veto Andreas Hahn, 2010 Reform success and reform delay are subject to a variety of explanations In general high decisiveness leads to reform propensity while its absence or high resoluteness to policy gridlock The Brazilian reform experience is contradicting both aspects are present factors leading to decisiveness as well as those inducing gridlock and reform delay Leaving the static point of view and accounting for a dynamic development this apparent contradiction gets resolved in fact the executive gained growing leeway during the 1990s providing it with the means to achieve a higher degree of decisiveness of the political system by simultaneously guaranteeing resoluteness It is however greatly mistaken to consider this development as a blank cheque to universal encompassing reforming in all areas Despite growing executive dominance and growing policy consensus some particular reforms were a success while others did not surpass its initial stages This is finally due to path dependency and explicit policy specificities triggering different institutional constraints and veto points which even strong Presidents cannot override

Indonesia's Changing Political Economy Jamie S. Davidson, 2015-01-22 Indonesia is Southeast Asia's largest economy and freest democracy yet vested interests and local politics serve as formidable obstacles to infrastructure reform In this critical analysis of the politics inhibiting infrastructure investment Jamie S Davidson utilizes evidence from his research press reports and rarely used consultancy studies to challenge mainstream explanations for low investment rates and the sluggish adoption of liberalizing reforms He argues that obstacles have less to do with weak formal institutions and low fiscal capacities of the state than with entrenched rent seeking interests misaligned central local government relations and state society struggles over land Using a political sociological approach Davidson demonstrates that getting the politics right matters as much as getting the prices right or putting the proper institutional safeguards in place for infrastructure development This innovative account and its conclusions will be of interest to students and scholars of Southeast Asia and policymakers of infrastructure investment and economic growth
