Radiographic Examination In Blunt Abdominal Trauma:

Radiographic Examination in Blunt Abdominal Trauma James J. McCort, 1966 *Imaging and Intervention in Abdominal Trauma* Robert F. Dondelinger, 2003-11-13 This excellently illustrated reference work provides a comprehensive overview of the imaging and management of abdominal trauma. Detailed attention is paid to pathophysiology, clinical symptoms and findings, all relevant imaging modalities and other tests employed to evaluate abdominal injuries at the time of admission of the trauma victim. Types of management described in depth include surgical, conservative, interventional, radiological and endoscopic. Posttraumatic complications are discussed, including those arising from treatment. There are also general chapters on patient resuscitation, logistics and medicolegal issues. *Abdominal Trauma* H. M. Delany, R. S. Jason, 2012-12-06 Trauma to the abdomen, both accidental and willful, has become increasingly common in this era of increasing violence. Large numbers of patients all over the country are admitted to emergency rooms because of abdominal trauma of varying degrees of severity. All too often the correct diagnosis is suspected belatedly or not at all so that proper treatment is not initiated in sufficient time to be lifesaving. Not infrequently the injured patient is examined by an intern or an insufficiently experienced resident physician. Even in instances where more senior internists and surgeons are available, detailed knowledge about the necessary methodology to establish the correct diagnosis and institute the appropriate treatment is lacking. This monograph, representing the felicitous collaboration of a surgeon and a radiologist together with several other contributors, is timely and important. The authors and their contributors have approached their subject with a wealth of clinical experience obtained in several very active acute care municipal hospitals in the largest city in this country. They have observed and treated a very large number of patients with a multitude of traumatic causes, including firearm injuries, stab wounds, vehicular accidents, falls and assaults. The authors have divided this work into four main sections: General Perspectives on Abdominal Injury, Types of Abdominal Injuries, Specific Diagnostic Techniques, and Specific Organ or Supporting Structure Injury. **Critical Observations in Radiology for Medical Students** Katherine R. Birchard, Kiran Reddy Busireddy, Richard C. Semelka, 2015-02-17 *Critical Observations in Radiology for Medical Students* is an ideal companion for medical students and clinicians with a focus on medical learning and patient management to support clerkship rotations and internship training. This brand new title delivers comprehensive radiological illustrations of various pathologies on different modalities, guiding the reader through the processes of understanding different imaging techniques, requesting the most appropriate medical imaging modality and procedure in order to reach a clinical diagnosis. With a simple approach to a wide range of organ-based important pathologies from an imaging point of view, this comprehensively illustrated volume uses a simple, consistent categorization scheme. *Critical Observations in Radiology for Medical Students* includes in-depth evaluations of the strengths and weaknesses for each modality, explanations of the basic physics of different imaging modalities, an accessible overview of the current FDA and ACR guidelines for imaging safety, radiation risks, with special

guidelines for imaging children and pregnant women An exploration of a wide range of organ based pathologies from an imaging point of view A companion website at www.wiley.com/go/birchard featuring self assessment MCQs downloadable pdfs of algorithms and all the images from the book *Critical Observations in Radiology for Medical Students* is a timely manageable and concise learning resource with broad topic coverage and enhanced learning features to help students and clinicians answer the question which test should I order and confidently diagnose and manage conditions *Abdominal Trauma* Frank William Blaisdell, Donald D.
