**The Ambiguous Legacy of Socialist Modernist Architecture in Central and Eastern Europe** Mariusz Sokołowicz, Aleksandra Nowakowska, Błażej Ciarkowski, 2023-04-28 This book examines the unique socialist modernist architecture built in the twentieth century in Central and Eastern Europe as a source of heritage and of existing and potential

value for the present and future generations Due to the historical context in which it was created such architecture remains ambiguous On the one hand the wider public associates it with the legacy of the unpleasant period of the real socialist economic regime Yet on the other hand it is also a manifestation of social modernization and the promotion of a significant proportion of the population This book focuses particularly on concrete heritage a legacy of modernist architecture in Central and Eastern Europe and it was this material that enabled their rebuilding after World War II and modernization during the following decades The authors search for the value of modernist architecture and using case studies from Poland Bulgaria Northern Macedonia Lithuania and Slovenia verify to what extent this heritage is embedded in the local socio economic milieu and becomes a basis for creating new values They argue that the challenge is to change the ways we think about heritage from looking at it from the point of view of a single monument to thinking in terms of a place with its own character and identity that builds its relation to history and its embeddedness in the local space Furthermore they propose that the preservation of existing concrete structures and adapting them to modern needs is of great importance for sustainability With increasing awareness of the issue of preserving post war architectural heritage and the strategies of dissonant heritage management this multidisciplinary study will be of interest to architecture historians conservators heritage economists urban planners and architects

*Essays on the Industrial Revolution in Britain* Sidney Pollard, 2024-10-28 This volume has three main themes First there is the concept of the Industrial Revolution and its main characteristics and the author defends both the term and the notions behind it against attempts to play down their significance A particular interest is the comparison of what happened to Britain with similar processes in other European countries The second theme is the set of problems facing the early entrepreneurs and managers Their difficulties as pioneers in the economic as well as the social sphere are often underrated and are here explored in detail Last there is an emphasis on the characteristic feature of industrialisation as a regional phenomenon and on the significance of particular regions in the entire process All three themes have called forth extended debate in which these essays have played an important part

**Geography And Development** Arthur Morris, 2005-08-15 First published in 1998 Written in a highly accessible style this book examines economic development processes across the world The old certainties of what constitutes development and whether it is the same for all peoples no longer exist Goals once imposed by agencies like the World Bank are increasingly questioned and the spatial development planning characteristics of the 1960s and 70s is increasingly seen as an intrusion into free and competitive markets Indeed a question now being asked is should development be promoted at all This book examines these fundamental issues and presents and evaluates the different theoretical approaches to development Each country has its own tale to tell and by using valuable case study material the author shows how different policies have impacted on the geography of regions Processes of development in the newly industrialised countries NICS of South Korea and Singapore are examined as well as the flexible specialisation model characteristic of many Mediterranean countries and the post industrial service economies based on high

technology The book argues convincingly that the fundamental spatial and temporal patterns of development in modern times are no longer the importance of physical resources but the complex human resources and the determination to work Anchored firmly in the needs of students this book will be widely welcomed by undergraduates taking courses in human geography and development studies

**Mediating Innovation Policy Delivery** Charles Conteh, 2025-03-31 Report cards and academic scholarship have been critical of innovation policy in Canada But what if these reports have done a profound injustice to the story of knowledge driven economic reinvention and the actual transformation taking place in the country Spotlighting what is happening in cities and regions across Ontario *Mediating Innovation Policy Delivery* argues that it is far more nuanced and exciting than what has been captured in scorecards and report cards The book explores the intermediary institutions the organizational brokers at the frontline of Canada's innovation race that are shepherding the process of economic reinvention in regions large and small The book draws on case studies to explore three central themes The first is about innovation innovation policy and their delivery systems The second is that of regions as the frontlines of technological and socioeconomic change in the Canadian federation The third covers the role of intermediary institutions as innovation platforms highlighting their triumphs and tribulations as they strategically navigate through the shifting currents of change The book's main lessons apply not just to Ontario and Canada but also to other industrialized democracies worldwide Ultimately the book advances our knowledge of organizational instruments of innovation policy delivery that operate at the strategic interface between the state market and society

*Visiting Grandchildren* Donald Savoie, 2006-03-04 During his successful campaign to become Conservative Party leader in the spring of 2004 Stephen Harper said of the Maritime provinces We will see the day when the region is not the place where you visit your grandparents but instead more often than not the place where you visit your grandchildren In *Visiting Grandchildren* esteemed policy analyst and scholar Donald J Savoie explores how Canadian economic policies have served to exclude the Maritime provinces from the wealth enjoyed in many other parts of the country especially southern Ontario and calls for a radical new approach in how Canadian governments determine policies that affect the different regions Savoie advocates a ratchet effect for national economic policies whereby regions take turns at high growth with the slow growth region of one period becoming the high growth region of the next with none moving from slow growth to decline He demonstrates how this pattern has been effective in countries undergoing long term regional convergence and how it would recognize that what is good for the Maritimes is good for Canada no less than what is good for Ontario is good for Canada *Visiting Grandchildren* looks to history accidents of geography and to the workings of national political and administrative institutions to explain the relative underdevelopment of the Maritime provinces Savoie argues that the region must strive to redefine its relationship with the national government and with other regions that it must ask fundamental questions of itself about its own responsibility for its present underdevelopment develop a cooperative mindset and embrace the market if it is to prosper in the twenty first century

Savoie's work serves as the blueprint for a new way of envisioning the Maritime region *Regional Policy* Ugo Fratesi, 2023-11-08 Regional policy is an essential in any government's toolkit for promoting socioeconomic prosperity. It comes in many forms and can be used to target the development of weak and stronger regions. This textbook provides comprehensive and systematic coverage of regional policy, dealing with core theories and looking at contemporary challenges in practice, addressing regional policy across the world. Structured in four parts, the book opens with an exploration of regional policy's characterisation, aims, and rationale. The second part is devoted to issues of implementation and the instruments available to policymakers for intervention. The third part addresses regional policy evaluation, as well as statistics and modelling in policymaking. Finally, the book discusses how regional policy is applied in different contexts. Each chapter contains real-life examples of a regional policy topic in action and highlights supplementary topics for advanced readers. With its broad coverage of the subject, *Regional Policy: Theory and Practice* will prove a valuable resource for advanced students, researchers, and practitioners in regional policy, regional economics, economic geography, planning, and public policy.

*A Fishery for Modern Times* Miriam Wright, 2001-12-15 In the early 1990s, the northern cod populations off the coast of Newfoundland had become so depleted that the federal government placed a moratorium on commercial fishing. The impact was devastating both for Newfoundland's economy and for local fishing communities. Today, although this natural resource, exploited commercially for over 500 years, appears to be returning in diminished numbers, many fisheries scientists and fishers question whether the cod will ever return to its former abundance. In *A Fishery for Modern Times*, Miriam Wright argues that the recent troubles in the fishery can be more fully understood by examining the rise of the industrial fishery in the mid-twentieth century. The introduction of new harvesting technologies and the emergence of quick freezing in the late 1930s eventually supplanted household production by Newfoundland's fishing families. While the new technologies increased the amount of fish caught in the northwest Atlantic, Wright argues that the state played a critical role in fostering and financing the industrial frozen fish sector. Many bureaucrats and politicians, including Newfoundland's premier Joseph Smallwood, believed that making the Newfoundland fishery modern with centralization, technology, and expertise would transform rural society, solving deep-seated economic and social problems. *A Fishery for Modern Times* examines the ways in which the state, ideologies of development, and political, economic, and social factors, along with political actors and fishing company owners, contributed to the expansion of the industrial fishery from the 1930s through the 1960s. While the promised prosperity never fully materialized, the continuing reliance on approaches favouring high-tech, big-capital solutions put increasing pressure on cod populations in the years that followed. As Wright concludes, "We can no longer afford to view the fisheries resources as property of the state and industry to do with it as they choose. That path had led only to devastation of the resource, economic instability, and great social upheaval."

**Family Business and Regional Development** Rodrigo Basco, Roger Stough, Lech Suwala, 2021-04-07 This book explores the relationship between families, firms, and regions and the

extent to which these relationships contribute to regional economic and social development Although family business participation in economic activities has been a common phenomenon since pre industrial societies and its importance has evolved throughout time and across spatial contexts the book suggests that these factors have often been neglected in family business and regional studies Taking this research gap into account the book aims to deepen our understanding of the role family firms play in the regional economy In particular it explores two seldom studied questions Firstly what role do family firms play in regional development Secondly how do formal and informal regional contexts shape family firm operations and performance This book presents a model of regional familiness and uses themes such as productivity networks and competitiveness to shed new light on family businesses Moreover it evaluates the juxtaposition and cross fertilisation between family business and regional studies to encourage the cross fertilisation of ideas theories and research methods between the two fields Bringing together leading experts in entrepreneurship regional economics and economic geography this book will be valuable reading for advanced students researchers and policymakers interested in family firms regional studies and economic geography
