Regions Of War And Peace:

Regions of War and Peace Douglas Lemke, 2002-01-21 In this contribution to the literature on the causes of war Douglas Lemke asks whether the same factors affect minor powers as affect major ones He investigates whether power parity and dissatisfaction with the status quo have an impact within Africa the Far East the Middle East and South America Lemke argues that there are similarities across these regions and levels of power and that parity and dissatisfaction are correlates of war around the world The extent to which they increase the risk of war varies across regions however and the book looks at the possible sources of this cross regional variation concluding that differential progress toward development is the likely cause This book will interest students and scholars of international relations and peace studies as well as comparative politics and area studies *The Geography of War and Peace* Colin Flint, 2005 Our world of increasing and varied conflicts is confusing and threatening to citizens of all countries as they try to understand its causes and consequences This book takes advantage of a diversity of geographic perspectives as it analyzes the political processes of war and their spatial expression

The Geography of War and Peace : From Death Camps to Diplomats Colin Flint Professor of Geography Pennsylvania State University, 2004-09-24 How and why war and peace occur cannot be understood without realizing that those who make war and peace must negotiate a complex world political map of sovereign spaces borders networks and scales This book takes advantage of a diversity of perspectives as it analyzes the political processes of war and their spatial expression Topics include terrorism nationalism religion drug wars water conflicts diplomacy peace movements and post war reconstruction War in Peace Robert Gerwarth, John Horne, 2013-10-03 The First World War did not end in November 1918 In Russia and Eastern Europe it finished up to a year earlier and both there and elsewhere in Europe it triggered conflicts that lasted down to 1923 Paramilitary formations were prominent in this continuation of the war They had some features of formal military organizations but were used in opposition to the regular military as an instrument of revolution or as an adjunct or substitute for military forces when these were unable by themselves to put down a revolution whether class or national Paramilitary violence thus arose in different contexts It was an important aspect of the violence unleashed by class revolution in Russia It structured the counter revolution in central and Eastern Europe including Finland and Italy which reacted against a mythic version of Bolshevik class violence in the name of order and authority It also shaped the struggles over borders and ethnicity in the new states that replaced the multi national empires of Russia Austria Hungary and Ottoman Turkey It was prominent on all sides in the wars for Irish independence In many cases paramilitary violence was charged with political significance and acquired a long lasting symbolism and influence War in Peace explores the differences and similarities between these various kinds of paramilitary violence within one volume for the first time It thereby contributes to our understanding of the difficult transitions from war to peace It also helps to re situate the Great War in a longer term context and to explain its enduring impact **War and Peace in Africa's Great Lakes Region**

Gilbert M. Khadiagala, 2017-07-11 The book probes major security and governance trends in Africa's Great Lakes region since the 1990s. It examines political dynamics in key states: Burundi, the DRC, Rwanda, and Uganda, as well as the role of international actors such as the AU, the EU, and the UN, thereby providing a unique perspective on efforts towards regional peace and prosperity. The authors suggest that while the region has made tremendous progress, it faces continuing challenges, including reversals in governance that threaten future regional security.

The Relevance of Regions in a Globalized World Galia Press-Barnathan, Ruth Fine, Arie M. Kacowicz, 2018-11-09 This volume provides a unique open inter-disciplinary dialogue across the Humanities and Social Sciences to further our understanding of the phenomenon of regions and regionalism in a globalized world, both at the theoretical and empirical levels. What comprises a region? What are the different regional dynamic processes that take place? What is the relationship between the regional and the global? What role does identity building play? Bringing together scholars from various disciplines within and across the Social Sciences and the Humanities to reflect on these questions, the book explores how regions are imagined, constructed, understood, and explained in different academic disciplines. Each chapter addresses these common questions and uses its own disciplinary lenses to answer them. In addition, the volume offers interesting reflections on the academic borders constructed in the study of regions, thus demonstrating the importance of obtaining insights from both social scientists and humanities scholars in order to better understand the relevance of regions in a complex and globalized world. An important work for scholars and postgraduate students in many fields, including political science, international relations, sociology, economics, geography, history, and literature, as well as for those interested in regionalism and area studies.

War and Peace in Somalia Michael Keating, Matt Waldman, 2019-01-01 For the last thirty years, Somalia has experienced violence and upheaval. Today, the international effort to help Somalis build a federal state and achieve stability is challenged by deep-rooted grievances, local conflicts, and a powerful insurgency led by Al Shabaab. Consisting of forty-four chapters by conflict resolution specialists and the world's leading experts on Somalia, this volume constitutes a unique compendium of insights into the insurgency and its impact. *War and Peace in Somalia* explores the legacies of past violence, especially impunity, illegitimacy, and exclusion, and the need for national reconciliation. Drawing on decades of experience and months of field research, the contributors throw light on diverse forms of local conflict, its interrelated causes, and what can be done about it. They share original research on the role of women, men, and youth in the conflict and present new insight into Al Shabaab, particularly the group's multi-dimensional strategy, the motivations of its fighters, their foreign links, and the prospects for engagement. This ground-breaking volume illuminates the war in Somalia and sets out what can and should be done to bring it to an end. For policymakers and researchers covering Somalia, East Africa, extremism, or conflict resolution, this is a must-read.

The Public Papers of Woodrow Wilson: War and peace : presidential messages, addresses, and public papers

(1917-1924) Woodrow Wilson, 1927 **Regions, Power, and Conflict** William R. Thompson, Thomas J. Volgy, Paul Bezerra, Jacob Cramer, Kelly Marie Gordell, Manjeet Pardesi, Karen Rasler, J. Patrick Rhamey Jr., Kentaro Sakuwa, Rachel Van Nostrand, Leila Zakhirova, 2022-08-16 The three main levels of analysis in international relations have been the systemic the national and the individual A fourth level that falls between the systemic and the national is the region It is woefully underdeveloped in comparison to the attention afforded the other three Yet regions tend to be distinctive theaters for international politics Otherwise we would not recognize that Middle Eastern interstate politics somehow does not resemble Latin American interstate politics or interstate politics in Southern Africa although once the Middle East and Southern Africa may have seemed more similar in their mutual fixation with opposition to domestic policies in Israel and South Africa respectively This book divided into three parts first makes a case for studying regional politics even though it must also be appreciated that regional boundaries are also hazy and not always easy to pin down empirically The second part examines power distributions within regions as an important entry point to studying regional similarities and differences Two emphases are stressed One is that regional power assessments need to be conditioned by controlling for weak states which are more common in some regions than they are in others The other emphasis is on regional power hierarchies Some regions have strong regional hierarchies while others do not Regions with strong hierarchies operate much differently from those without them in the sense that the former are more pacific than the latter The third part of the book focuses on regional differences in terms of conflict behavior order preferences rivalries and rivalry termination Strong Money Demand in Financing War and Peace Makoto Saito, 2021-06-17 This book theoretically and empirically investigates the emergence of strong money demand in wartime Japan 1937 1945 its disappearance after the end of the war 1945 1949 and the reemergence of strong money demand in contemporary Japan from 1995 to the present in terms of the effects on fiscal activities and the price level An augmented fiscal monetary theory of the price level is constructed from a close examination of the strong money demand present in these periods Then profoundly puzzling phenomena such as mild deflation despite monetary expansion low long term interest rates despite fiscal unsustainability and weak aggregate demand despite near zero rates of interest all of which are actually being observed in contemporary Japan can now be interpreted in line with the above augmented theory In the present strong money demand at near zero rates endows the Japanese government with maximum fiscal flexibility However if it disappeared for some reason prices would surge to the quantity theory of money level and fiscal sustainability would have to be restored In the future alternative currency units issued by private banks might carry out a purge of such strong demand for the yen **States, Nations, and the Great Powers** Benjamin Miller, 2007-08-30 Why are some regions prone to war while others remain at peace What conditions cause regions to move from peace to war and vice versa This book offers a novel theoretical explanation for the differences in levels of and transitions between war and peace The author distinguishes between hot and cold outcomes depending on intensity of the

war or the peace and then uses three key concepts state nation and the international system to argue that it is the specific balance between states and nations in different regions that determines the hot or warm outcomes the lower the balance the higher the war proneness of the region while the higher the balance the warmer the peace The international systematic factors for their part affect only the cold outcomes of cold war and cold peace The theory of regional war and peace developed in this book is examined through case studies of the post 1945 Middle East the Balkans and South America in the nineteenth and twentieth centuries and post 1945 Western Europe It uses comparative data from all regions and concludes by proposing ideas on how to promote peace in war torn regions

War & Peace ,1914 Regional Peacemaking and Conflict Management Carmela

Lutmar, Benjamin Miller, 2015-11-06 This volume examines mechanisms for regional peacemaking and conflict management in Europe and the Middle East To date little research has been devoted to uncovering the conditions for peace and the factors that contribute to stabilizing the state of peace This volume assesses the factors that contribute to regional pacification the incentives that motivate states in establishing peaceful relations and most importantly how regions become peaceful It discusses the conditions under which various types of peace might emerge on a regional level and the factors most likely to determine the outcome The book takes an innovative approach through a systematic comparison of two regions that are particularly prominent and important for the subject of regional pacification Europe and the Middle East While many believe that the European case is the indispensable model for peacemaking others believe that these two regions are too different for Europe to be a useful framework for the Middle East This volume occupies a middle ground between these two extreme positions It argues that while a mindless copying of European models will not lead to peace in the Middle East important insights can be gained from the most successful case of regional peacemaking to date This work will be of much interest to students of regional security peacemaking conflict management Middle East politics European security and IR in general
