ALPERT, Saul Wisnia, Michelle J

Alpert,2009-06-30 Spinal cord injury or SCI is frequently sudden and unexpected through accident disease or violence patients temporarily lose control of their bodies and it seems their lives With rehabilitation they can learn to navigate their world once more retraining muscles and mind to compensate for paralyzed limbs and diminished strength But as Dr Michelle Alpert shows here there is far more to recapturing full independent lives than regaining movement Central to long term success is mending the family unit Combining Dr Alpert s clinical experience with patients own stories Spinal Cord Injury and the Family is for individuals and their families who must climb back from injury for the young quad couple both quadriplegic who wish to conceive and raise a child for the paraplegic dad who wants to teach his daughter to drive for the couple wondering how they can regain the sexual spark in their relationship The authors cover the causes of and prognosis for SCI through case studies review common courses of rehabilitation and answer the what now questions from daily routines to larger issues concerning sex education and employment childbearing and parenting with SCI Rich in clinical information and practical advice the book shows how real patients and their families are living full lives after spinal cord injury Handbook of Clinical Psychology in Medical Settings Ronald H. Rozensky, Jerry J. Sweet, Steven M. Tavian, 2013-06-29 For two decades I have been responding to questions about the nature of health psychology and how it differs from medical psychology behavioral medicine and clinical psychology From the beginning I have taken the position that any application of psychological theory or practice to problems and issues of the health system is health psychology I have repeatedly used an analogy to Newell and Simon s General Problem Solver program of the late 1950s and early 1960s which had two major functional parts in addition to the executive component One was the problem solving core the procedural competence the other was the representation of the problem environment In the analogy the concepts knowledge and techniques of psychology constitute the core competence the health system in all its complexity is the problem environment A health psychologist is one whose basic competence in psychology is augmented by a working knowledge of some aspect of the health system Quite apparently there are functionally distinct aspects of health psychology to the degree that there are meaningful subdivisions in psychological competence and significantly different microenvironments within the health system I hesitate to refer to them as areas of specialization as the man who gave health psychology its formal definition Joseph Matarazzo has said that there are no specialties in psychology cited in the editors preface to this book *Brain Injury Medicine, Third Edition* Nathan D. Coping with Chronic Stress Benjamin H. Gottlieb, 2013-11-21 Much of what we know about the subject of coping is based on human behavior and cognition during times of crisis and transition Yet the alarms and m or upheavals of life comprise only a portion of those experiences that call for adaptive efforts There remains a vast array of life situations and conditions that pose continuing hardship and threat and do not promise resolution These chronic stressors issue in part from persistently difficult life circumstances roles and burdens and in part from the conversion of traumatic events into persisting adjustment challenges Indeed there is growing recognition of the fact that many traumatic experiences leave a long lasting emotional residue Whether or not coping with chronic problems differs in form emphasis or function from the ways people handle acute life events and transitions is one of the central issues taken up in these pages This volume explores the varied circumstances and experiences that give rise to chronic stress as well as the ways in which individuals adapt to and accommodate them It addresses a number of substantive and methodological questions that have been largely overlooked or sidelined in previous inquiries on the stress and coping process

Handbook of Military and Veteran Suicide Bruce Bongar, Glenn Sullivan, Larry James, 2017-03-30 For the past decade suicidal behavior in military and veteran populations has been a constant feature in the news and in the media with suicide rates among active duty American military personnel reaching their highest level in almost three decades Handbook of Military and Veteran Suicide reviews the most advanced scientific understanding of the phenomenon of active duty and veteran suicide while providing a useful hands on clinical guide for those working with this population This comprehensive Handbook covers all relevant topics and current research in suicide in military and veteran populations including links between suicide and PTSD the stigma of mental health treatment in the military screening for firearms access in military and veteran populations subintentioned suicide e g reckless driving and other such accidental deaths women in combat and working with families Chapters also cover suicide risk assessment ethical issues in treating suicidal patients evidence based treatments for PTSD traumatic brain injury and managing suicide in older veterans Significant issues that may arise in assessing and treating military and veteran populations who are at risk for suicide are presented and discussed with evidence based and practical recommendations This Handbook will benefit researchers policy makers and clinicians who work with active duty military and veteran populations

Integrating Theory and Practice in Clinical Neuropsychology Ellen Perecman, 2018-10-03 The extent to which a brain injured individual can resume premorbid functioning depends on factors ranging from the physiological to the psychological Originally published in 1989 the thesis of this volume is that atheoretical application of practical techniques in clinical neuropsychology is as ill conceived as a neuropsychological theory that fails to acknowledge the role of historical or situational context in behaviour or task performance The chapters that follow address this thesis as experimental psychologists join clinicians in an effort to bridge the gap between theoretical abstraction and practical reality

Serial Offenders Louis B. Schlesinger, 2000-07-31 Although serial offenders have been a recognized problem in society for centuries only recently have the complexities of these individuals come to light Serial Offenders Current Thought Recent

Findings presents current and inclusive information on serial offending in a clear and straightforward manner Citing numerous case examples this book will provide forensic psychologists and psychologists as well as criminologists social workers and corrections officials with relevant and informative data Author Louis B Schlesinger presents current thinking on serial offenders in the first of three parts contained in the text In Part I he covers serial homicide child molestation rape arson and the nonviolent serial offender while offering new information and perspectives on these traditional problems Part II reverses thought and takes a look at recent clinical and research findings From profiling by law enforcement and health care workers to the neurobiological approach to understanding why people continually commit these crimes Part II delves beyond right and wrong to illuminate and identify the many shades of gray Part III focuses on the unusual aspects of serial offending and on special populations of offenders From infantophilia to serial offending by females adolescents and members of the clergy Schlesinger provides insight into a world that few have witnessed in such a comprehensive manner
