[How to STEM](#) Carol Smallwood, Vera Gubnitskaia, 2013-12-05 During the past few years, groups like the President's Council of Advisors on Science and Technology Center for Education have been placing great emphasis on the significance of STEM (science, technology, engineering, and math) education. In brief, the US is seen as falling behind the rest of the world in science and technology education. In response, the curricula have been revised in many educational institutions and school districts across the country. It is clear that for STEM to be successful, other community organizations, most particularly libraries, need to be closely involved in the process. Library staff realize the importance of getting involved in STEM education, but many have difficulty finding comprehensive information that will help them plan and successfully implement STEM direction in their organization. This book is designed to meet that need. It is timely and relevant. *How to STEM: Science, Technology, Engineering, and Math Education in Libraries* is by and for libraries who are involved in contributing efforts into advancing these subjects. It is organized in 9 parts, including funding, grant writing, community partnerships, outreach, research, and examples of specific programming activities. Authors are drawn from the professional staffs of educational institutions, libraries, and non-profit organizations such as science museums. The book contains eight parts, each emphasizing a different aspect of how to succeed with STEM. Part 1 emphasizes hands-on activities that are both fun and educational and can be used to further STEM awareness. Parts 2 and 3 contain chapters on the uniting of STEM with Information Literacy. Innovative collection development ideas are discussed in Part 4, and Part 5 focuses on research and publishing. Outreach is the theme of Part 6, and the programs described in these chapters offer an array of ways to connect with students of all ages. The final section of *How to STEM: Science, Technology, Engineering, and Math Education in Libraries* addresses the funding of these programs. Librarians of all types will be pleased to discover easy-to-implement suggestions for collaborative efforts, many rich and diverse programming ideas, strategies for improving reference services, and library instruction to speakers of English as a second language, marketing and promotional tips designed to welcome multicultural patrons into the library, and much more.

The Souls of Mixed Folk Michele Elam, 2011-02-21 The Souls of Mixed Folk examines representations of mixed race in literature and the arts that redefine new millennial aesthetics and politics Focusing on black white mixes Elam analyzes expressive works novels drama graphic narrative late night television art installations as artistic rejoinders to the perception that post Civil Rights politics are bereft and post Black art is apolitical Reorienting attention to the cultural invention of mixed race from the social sciences to the humanities Elam considers the creative work of Lezley Saar Aaron McGruder Nate Creekmore Danzy Senna Colson Whitehead Emily Raboteau Carl Hancock Rux and Dave Chappelle All these writers and artists address mixed race as both an aesthetic challenge and a social concern and together they gesture toward a poetics of social justice for the mulatto millennium The Souls of Mixed Folk seeks a middle way between competing hagiographic and apocalyptic impulses in mixed race scholarship between those who proselytize mixed race as the great hallelujah to the race problem and those who can only hear the alarmist bells of civil rights destruction Both approaches can obscure some of the more critically astute engagements with new millennial iterations of mixed race by the multi generic cohort of contemporary writers artists and performers discussed in this book The Souls of Mixed Folk offers case studies of their creative work in an effort to expand the contemporary idiom about mixed race in the so called post race moment asking how might new millennial expressive forms

suggest an aesthetics of mixed race And how might such an aesthetics productively reimagine the relations between race art and social equity in the twenty first century

Panel to the Screen Drew Morton, 2016-11-28 Over the past forty years American film has entered into a formal interaction with the comic book Such comic book adaptations as Sin City 300 and Scott Pilgrim vs the World have adopted components of their source materials visual style The screen has been fractured into panels the photographic has given way to the graphic and the steady rhythm of cinematic time has evolved into a far more malleable element In other words films have begun to look like comics Yet this interplay also occurs in the other direction In order to retain cultural relevancy comic books have begun to look like films Frank Miller's original Sin City comics are indebted to film noir while Stephen King's The Dark Tower series could be a Sergio Leone spaghetti western translated onto paper Film and comic books continuously lean on one another to reimagine their formal attributes and stylistic possibilities In Panel to the Screen Drew Morton examines this dialogue in its intersecting and rapidly changing cultural technological and industrial contexts Early on many questioned the prospect of a low art form suited for children translating into high art material capable of drawing colossal box office takes Now the naysayers are as quiet as the queued crowds at Comic Cons are massive Morton provides a nuanced account of this

phenomenon by using formal analysis of the texts in a real world context of studio budgets grosses and audience reception

The Meaning of Superhero Comic Books Terrence R. Wandtke, 2014-01-10 For decades scholars have been making the connection between the design of the superhero story and the mythology of the ancient folktale Moving beyond simple comparisons and common explanations this volume details how the workings of the superhero comics industry and the conventions of the medium have developed a culture like that of traditional epic storytelling It chronicles the continuation of the oral traditional culture of the early 20th century superhero industry in the endless variations on Superman and shows how Frederic Wertham's anti comic crusade in the mid 1950s helped make comics the most countercultural new medium of the 20th century By revealing how contemporary superhero comics like Geoff Johns' Green Lantern and Warren Ellis's The Authority connect traditional aesthetics and postmodern theories this work explains why the superhero comic book flourishes in the new traditional shape of our acutely self-conscious digital age
