Callahan, German E. Berrios, 2005 By tracing the history of depression in primary care over the past half century in the US and UK this book opens a pathway for future improvements in the treatment of depressed patients The authors argue for a public health perspective that will place more emphasis on the roles of society and culture in causing depression and will help close the gap between primary care practice and psychiatric knowledge **Reinventing State Capitalism** Aldo Musacchio, Sergio G. Lazzarini, 2014-04-22 The wave of liberalization that swept world markets in the 1980s and 90s altered the ways that governments manage their economies Reinventing State Capitalism analyzes the rise of new species of state capitalism in which governments interact with private investors either as majority or minority shareholders in publicly traded corporations or as financial backers of purely private firms the so called national champions Focusing on a detailed quantitative assessment of Brazil s economic performance from 1976 to 2009 Aldo Musacchio and Sergio Lazzarini examine how these models of state capitalism influence corporate investment and performance According to one model the state acts as a majority investor granting the state owned enterprise SOE financial autonomy and allowing professional management This form the authors argue has reduced many agency problems commonly faced by state ownership According to another hybrid model the state uses sovereign wealth funds holding companies and development banks to acquire a small share of equity ownership in a corporation thereby potentially alleviating capital constraints and

leveraging latent capabilities Both models have benefits and costs Yet neither model has entirely eliminated the temptation of governments to intervene in the operation of natural resource industries and other large strategic enterprises Nevertheless the longstanding debate over whether private ownership is superior or inferior to state capitalism has become irrelevant

that we no longer comprehend why and how people display a deep concern for everyday life values in their social practices. People continue to enact these values and live by them while academics lack the vocabulary and methods to grasp them. By reconstructing the history of ideas about everyday life values and by analysing the role of such values in contemporary care practices for patients with chronic disease in the Netherlands *Reinventing the Good Life* explores new ways to study the values of everyday life particularly in situations where the achievement of a clear cut or uniform good is unlikely.
