autonomy was to be granted in exchange for funding modes which are tied to the measurement of performance indicators. Unfortunately performance based budgeting or funding measures cannot meet the various expectations they do not raise the quality of teaching or learning they do not raise research performance they take back a great deal of managerial autonomy which is commonly judged to be essential for the well being of higher education institutions in particular research universities and they act as automata in place of proper governance and management.

After an introduction to the theme and to the book Chapter 1 **Financing Public Universities** covers the evolvement of mass higher education and the associated curtailment of funding Chapter 2 the public management reform debate Chapter 3 within which performance based budgeting or funding evolved Chapter 4 sketches alternative governance and management modes which can be used instead Chapter 5 and epitomizes inertia or challenges Chapter 6 Four appendices cover more technical matters such as a comparative exposition of the research performance of universities by nation Appendix C and examples of funding systems in the UK and in the USA Appendix D
