Rekindling The Movement Labors Quest For Relevance In The Twenty :

Rekindling the Movement Lowell Turner, Harry C. Katz, Richard W. Hurd, 2018-05-31 From gloomy times in the 1980s the American labor movement has returned to apparent prominence through the efforts of a new generation of energetic and progressive leaders A distinguished group of authors examines this resurgence and the potential of American unions with sympathetic yet critical eyes Experts from a wide variety of disciplines industrial relations political science economics and sociology identify the central developments analyze the strengths and weaknesses of the new initiatives and assess the progress made and the prospects for the future Though all agree on the importance of unions their opinions of the success of current renewal efforts diverge greatly The interdisciplinary and comparative approach of *Rekindling the Movement* is both challenging and enlightening Rather than merely trumpeting pet opinions contributors provide hard evidence and causal analysis grounded in realistic perspectives to back up suggestions for the improvement of the new labor movement Their straightforward observations about what is and is not possible what does and does not work will be of great practical value for policymakers and union leaders

Reinventing Social Emancipation Towards New Manifestoes Here the author examines alternative models to capitalist development through case studies of collective land management cooperatives of garbage collectors and women's agricultural cooperatives He also analyzes the changing capital labor conflict of the past two decades and the way labor solidarity is reconstituting itself under new forms from Brazil to Mozambique and South Africa *Globalization in the 21st Century* B. Berberoglu, 2010-04-12 This book examines the development and transformation of global capitalism in the late 20th and early 21st century It analyzes the dynamics and contradictions of the global political economy through a comparative historical approach based on class analysis After providing a critical overview of neoliberal capitalist globalization over the past three decades the book examines the emergence of new forces on the global scene and discusses the prospects of change in the global economy in a multi polar direction in the decades ahead The book concludes by focusing on the mass movements that are playing a central role in bringing about the transformation of global capitalism **Building Power, Breaking Power** Jesse Chanin, 2024-04-05 From 1965 to 2005 the United Teachers of New Orleans UTNO defied the South's conservative anti union efforts to become the largest local in Louisiana Jesse Chanin argues that UTNO accomplished and maintained its strength through strong community support addressing a Black middle class political agenda internal democracy and drawing on the legacy and tactics of the civil rights movement by combining struggles for racial and economic justice all under Black leadership and with a majority women and Black membership However the devastating effects of Hurricane Katrina provided the state government and local charter school advocates with the opportunity to remake the school system and dismantle the union Authorities fired 7 500 educators marking the largest dismissal of Black teaching staff since Brown v Board of Education Chanin highlights the significant staying power and political social and community impact of UTNO as well as the damaging effects of the charter school movement on educators Staircases or Treadmills? Chris Benner, Laura Leete, Manuel Pastor, 2007-04-13 Globalization technological change and deregulation have made the American marketplace increasingly competitive in recent decades but for many workers this new economy has entailed heightened job insecurity lower wages and scarcer benefits As the job market has grown more volatile a variety of labor market intermediaries organizations that help job seekers find employment have sprung up from private temporary agencies to government One Stop Career Centers In Staircases or Treadmills Chris Benner Laura Leete and Manuel Pastor investigate what approaches are most effective in helping workers to secure jobs with decent wages and benefits and they provide specific policy recommendations for how job matching organizations can better serve disadvantaged workers Staircases or Treadmills is the first comprehensive study documenting the prevalence of all types of labor market intermediaries and investigating how these intermediaries affect workers employment opportunities Benner Leete and Pastor draw on years of research in two distinct regional labor markets old economy Milwaukee and new economy Silicon Valley including a first of its kind random survey of the prevalence and impacts of intermediaries and a wide range of interviews

with intermediary agencies staff and clients One of the main obstacles that disadvantaged workers face is that social networks of families and friends are less effective in connecting job seekers to stable quality employment Intermediaries often serve as a substitute method for finding a job Which substitute is chosen however matters The authors find that the most effective organizations including many unions community colleges and local non profits actively foster contacts between workers and employers tend to make long term investments in training for career development and seek to transform as well as satisfy market demands But without effective social networks to help workers locate the best intermediaries most rely on private temporary agencies and other organizations that offer fewer services and statistical analysis shows often channel their participants into jobs with low wages and few benefits Staircases or Treadmills suggests that to become more effective intermediary organizations of all types need to focus more on training workers teaching networking skills and fostering contact between workers and employers in the same industries A generation ago rising living standards were broadly distributed and coupled with relatively secure employment Today many Americans fear that heightened job insecurity is overshadowing the benefits of dynamic economic growth Staircases or Treadmills is a stimulating guide to how private and public job matching institutions can empower disadvantaged workers to share in economic progress

Transnational Trade Unionism Peter Fairbrother, Christian Lévesque, Marc-Antonin Hennebert, 2013-08-22 Transnational trade union action has expanded significantly over the last few decades and has taken a variety of shapes and trajectories This book is concerned with understanding the spatial extension of trade union action and in particular the development of new forms of collective mobilization network building and forms of regulation that bridge local and transnational issues Through the work of leading international specialists this collection of essays examines the process and dynamic of transnational trade union action and provides analytical and conceptual tools to understand these developments The research presented here emphasizes that the direction of transnational solidarity remains contested subject to experimentation and negotiation and includes studies of often overlooked developments in transition and developing countries with original analyses from the European Union and NAFTA areas Providing a fresh examination of transnational solidarity this volume offers neither a romantic or overly optimistic narrative of a borderless unionism nor does it fall into a fatalistic or pessimistic account of international union solidarity Through original research conducted at different levels this book disentangles the processes and dynamics of institution building and challenges the conventional national based forms of unionism that prevailed in the latter half of the twentieth century
