**Redefining Recovery from Aphasia** Dalia Cahana-Amitay, Martin Albert, 2015-01-07 This book focuses on two fundamental aspects of brain language relations one concerns the neural organization of language in the healthy brain the other challenges current approaches to treatment of aphasia and offers a new theory for recovery from aphasia The essence of the book lies in the phrase neural multifunctionality the constant and dynamic incorporation of non linguistic functions into language models of the intact brain The book makes the claim that language is a construction created as we use it and cannot be understood as being supported by neurally based linguistic networks only Rather language emerges from the constant and dynamic interaction among neural networks subserving cognitive affective and praxic functions with neural networks subserving lexical retrieval naming sentence processing comprehension and discourse communication conversation In persons with stroke induced aphasia neural networks for executive system function attention memory motor system function visual system function and emotion interact with neural networks for language to produce the aphasia profile and to influence recovery from aphasia

Consequently neural multifunctionality in aphasia explains individual differences in the lesion deficit model and continued recovery over time redefining the concept of recovery from aphasia and offering new opportunities for treatment

Porter,Elizabeth Olmsted Teisberg,2006-04-24 The U S health care system is in crisis At stake are the quality of care for millions of Americans and the financial well being of individuals and employers squeezed by skyrocketing premiums not to mention the stability of state and federal government budgets In Redefining Health Care internationally renowned strategy expert Michael Porter and innovation expert Elizabeth Teisberg reveal the underlying and largely overlooked causes of the problem and provide a powerful prescription for change The authors argue that competition currently takes place at the wrong level among health plans networks and hospitals rather than where it matters most in the diagnosis treatment and prevention of specific health conditions Participants in the system accumulate bargaining power and shift costs in a zero sum competition rather than creating value for patients Based on an exhaustive study of the U S health care system Redefining Health Care lays out a breakthrough framework for redefining the way competition in health care delivery takes place and unleashing stunning improvements in quality and efficiency With specific recommendations for hospitals doctors health plans employers and policy makers this book shows how to move health care toward positive sum competition that delivers lasting benefits for all Women Redefining the Experience of Food Insecurity Janet Page-Reeves,2014-07-03 Women Redefining the Experience of Food Insecurity Life Off the Edge of the Table is about understanding the relationship between food insecurity and women s agency The contributors explore both the structural constraints that limit what and how much people

eat and the myriad ways that women creatively and strategically re structure their own fields of action in relation to food demonstrating that the nature of food insecurity is multi dimensional The chapters portray how women develop strategies to make it possible to have food in the cupboard and on the table to be able to feed their families Exploring these themes this book offers a lens for thinking about the food system that incorporates women as agentive actors and links women s everyday food related activities with ideas about food justice food sovereignty and food citizenship Taken together the chapters provide a unique perspective on how we can think broadly about the issue of food insecurity in relation to gender culture inequality poverty and health disparity By problematizing the mundane world of how women procure and prepare food in a context of scarcity this book reveals dynamics relationships and experiences that would otherwise go unremarked Normally under the radar these processes are embedded in power relations that demand analysis and demonstrate strategic individual action that requires recognition All of the chapters provide a counter to caricatured notions that the choices women make are irresponsible or ignorant or that the lives of women from low income low wealth communities are predicated on impotence and weakness Yet the authors do not romanticize women as uniformly resilient or consistently heroic Instead they explore the contradictions inherent in the ways that marginalized seemingly powerless women ignore resist embrace and challenge hegemonic patriarchal systems through their relationship with food Redefining the Modern Military Nathan K.

Finney,Tyrell Mayfield,2018-10-15 This edited collection will expand upon and refine the ideas on the role of ethics and the profession in the 21st Century The authors delve into whether Samuel Huntington and Morris Janowitz still ring true in the 21st century whether training and continuing education play a role in defining a profession and if there is a universal code of ethics required for the military as a profession Redefining the Modern Military is unique in how it treats the subject of ethics and the military profession as well as the types of writers it brings on board to address this topic The book puts a significant emphasis on individual agency for military professionalism as opposed to broad organizational or cultural change Such a review of these topics is necessary because the process of serious intellectual self reflection is a requirement especially in a profession that involves life and death of people and nations **Redefining Virtual Teaching Learning Pedagogy** Rohit

**Multi-Omics for Diagnosis, Treatments, and Drug Discovery of Aging-Related Neuronal Diseases** Min Tang,Tao Huang,Jialiang Yang,Cheng Guo,2022-11-23 As the cost of high throughput sequencing goes down huge volumes of biological and medical data have been produced from various sequencing platforms at multiple molecular levels including genome transcriptome proteome epigenome metabolome and so on For a long time data analysis on single molecular levels has paved the way to answer many important research questions However many Aging Related Neuronal Diseases ARNDs and Central Nervous System CNS aging involve interactions of molecules from multiple molecular levels in which conclusions based on single molecular levels are usually incomplete and sometimes misleading In these scenarios multi omics data analysis has unprecedentedly helped capture much more useful information for the diagnosis treatment prognosis and drug discovery of ARNDs The first step towards a multi omics analysis is to establish reliable and robust multi omics datasets In the past years a few important ARNDs associated multi omics databases like Allen Brain have been constructed which raised immediate needs like data curation normalization interpretation and visualization for integrative multi omics explorations Though there have been several well established multi omics databases for ARNDs like Alzheimer s disease similar databases for other ARNDs are still in urgent need After the databases establish many computational tools and experiential strategies should be developed specifically for them First the multi omics data are usually extremely noisy complex heterogeneous and in high dimension which presents the need for appropriate denoising and dimension reduction methods Second since the multi omics and non omics data like pathological and clinical data are usually in different data spaces a useful algorithm to mapping them into the same data space and integrate them is nontrivial In the multi omics era there are numerous data centric tools for the integration of multi omics datasets which could be generally divided into three categories unsupervised supervised and semi supervised methods Commonly used algorithms include but not limited to Bayesian based methods Network based methods multi step analysis methods and multiple kernel learning methods Third methods are needed in studying and verifying the association between two or more levels of multi omics data and non omics data For example expression quantitative trait loci eQTL analysis is widely used to infer the association between a single nucleotide polymorphism SNP and the expression of a gene Recently the association between omics data and more complex data like pathological and clinical imaging data has

been a hot research topic The outcomes may reveal the underlying molecular mechanism and promote de novo drug design as well as drug repurposing for ARNDs Here we welcome investigators to share their Original Research Review Mini Review Hypothesis and Theory Perspective Conceptual Analysis Data Report Brief Research Report Code related to multi omics studies of ARNDs which can be applied for better diagnosis treatment prognosis and drug discovery of human diseases in the future era of precision medicine Potential contents include but are not limited to the following Methods for integrating interpreting or visualizing two or more omics data Methods for identifying interactions between different data modalities Methods for disease subtyping biomarker prediction Machine learning or deep learning methods on dimensional reduction and feature selection for big noisy data Methods for studying the association among different omics data or between omics and non omics data like clinical pathological and imaging data Review of multi omics resource about ARNDs and or CNS aging Experimental validation of biomarkers identified from multi omics data analysis Disease diagnosis and prognosis prediction from imaging and non imaging data analysis or both Clinical applications or validations of findings from multi omics data analysis
