Relativist & Absolutist Emerson R. Marks, 1975

Sociable Criticism in England, 1625-1725 Paul Trolander, Zeynep Tenger, 2007 *Sociable Criticism in England* explores how from 1625 to 1725 cultural practices and discourses of sociability rules for small group discussion friendship discourse and patron client relationships determined the venues within which critical judgments were rendered disseminated and received It establishes how individuals operating in small groups were authorized to circulate critical judgments and commentary why certain modes of critical exchange were treated as beyond the ken of good social manners and how such expectations were subverted or manipulated to avoid the imputation that individuals had violated the standards for offering public criticism Philips George Villiers John Dryden Lady Margaret Cavendish John Dennis and Joseph Addison this study argues that seventeenth and early eighteenth century criticism could circulate either orally in manuscript or in print so long as it appeared to originate in interpersonal encounters considered appropriate to critical discussion *The Making of the English Literary Canon* Trevor Thornton Ross, 1998 It is widely accepted among literary scholars that canon formation began in the eighteenth century when scholarly editions and critical treatments of older works designed to educate readers about the national literary heritage appeared for the first time In *The Making of the English Literary Canon* Trevor Ross challenges this assumption arguing that canon formation was going on well before the eighteenth century but was based on a very different set of literary and cultural values Covering a period that extends from the Middle Ages to the institutionalisation of literature in the eighteenth century Ross's comprehensive history traces the evolution of cultural attitudes toward literature in English society highlighting the diverse interests and assumptions that defined and shaped the literary canon An indigenous canon of letters Ross argues had been both the hope and aim of English authors since the Middle Ages Early authors believed that promoting the idea of a national literature would help publicise their work and favour literary production in the vernacular Ross places these early gestures toward canon making in the context of the highly rhetorical habits of thought that dominated medieval and Renaissance culture habits that were gradually displaced by an emergent rationalist understanding of literary value He shows that beginning in the late seventeenth century canon makers became less concerned with how English literature was produced than with how it was read and received By showing that canon formation has served different functions in the past *The Making of the English Literary Canon* is relevant not only to current debates over the canon but also as an important corrective to prevailing views of early modern English literature and of how it was first evaluated promoted and preserved It is widely accepted among literary scholars that canon formation began in the eighteenth century when scholarly editions and critical treatments of older works designed to educate readers about the national literary heritage appeared for the first time In *The Making of the English Literary Canon* Trevor Ross challenges this assumption arguing that canon formation was going on well before the eighteenth century but was based on a very different

set of literary and cultural values Covering a period that extends from the Middle Ages to the institutionalisation of literature in the eighteenth century Ross's comprehensive history traces the evolution of cultural attitudes toward literature in English society highlighting the diverse interests and assumptions that defined and shaped the literary canon An indigenous canon of letters Ross argues had been both the hope and aim of English authors since the Middle Ages Early authors believed that promoting the idea of a national literature would help publicise their work and favour literary production in the vernacular Ross places these early gestures toward canon making in the context of the highly rhetorical habits of thought that dominated medieval and Renaissance culture habits that were gradually displaced by an emergent rationalist understanding of literary value He shows that beginning in the late seventeenth century canon makers became less concerned with how English literature was produced than with how it was read and received By showing that canon formation has served different functions in the past *The Making of the English Literary Canon* is relevant not only to current debates over the canon but also as an important corrective to prevailing views of early modern English literature and of how it was first evaluated promoted and preserved Convention, 1500-1750 Lawrence Manley, 1980 A major reinterpretation of the development of European literary theory this wide ranging study offers a new approach to ways of thinking about man's work in general This book is a history of the idea of convention the roles it played in the formative stages of English and Continental literary theory and in the development of modern thought The Literary History of England Donald F. Bond, G. Sherburn, 2003-09-02 English historians in the Middle Ages is an overview of the history of English historians and their works in the Middle Ages English historians helped lay the groundwork for modern historical methodology provided vital accounts of the early history of England its culture and revelations about the historians themselves The most remarkable period of historical writing was during the High Middle Ages in the 12th and 13th centuries when English chronicles produced works with a variety of interest wealth of information and amplitude of range However one might choose to view the reliability

The Intellectual Revolution of the Seventeenth Century (Routledge Revivals) Charles Webster, 2012-10-12

Intellectual history and early modern history have always occupied an important place in Past and Present First published in 1974 this volume is a collection of original articles and debates published in the journal between 1953 and May 1973 dealing with many aspects of the intellectual history of the seventeenth century Several of the contributions have been extremely influential and the debates represent major standpoints in controversies over genesis of modern ideas Although England is the focus of attention for most of the contributors their themes have wider significance Among the topics covered in the collection are the political thought of the Levellers and of James Harrington radical social movements of the Puritan Revolution the ideological context of physiological theories associated with William Harvey the relationship between science and religion and the social relations of science and the function of millenarianism and eschatology in the seventeenth century The editor's Introduction indicates the context in which the articles were composed and provides valuable bibliographical

information about the subjects discussed **John Dryden** David J. Latt, Samuel Holt Monk, 1976-04-12 John Dryden was first published in 1976 Minnesota Archive Editions uses digital technology to make long unavailable books once again accessible and are published unaltered from the original University of Minnesota Press editions This annotated bibliography represents a comprehensive updating of Samuel Holt Monk's earlier work also published by the University of Minnesota Press John Dryden A List of Critical Studies Published from 1895 to 1948 out of print Since the publication of that earlier bibliography the number of studies devoted to Dryden has more than tripled and thus this new bibliography is essential for scholars of Dryden or related aspects of seventeenth and eighteenth century English literature This volume contains four times as many entries as the earlier volume and there is an extensive introduction by Professor Latt which surveys the historical shifts in critical opinion of Dryden The new volume incorporates all of the listings contained in the first one The entries include works that focus directly on Dryden those that discuss Dryden's works in the context of other writers and those that investigate material of general importance to Dryden studies Dissertations from American German English and French universities are included Complete bibliographic information is provided for virtually every entry The listings are grouped in nine categories and there is an additional section which covers festschriften and other collections of essays Works of exceptional value and those which develop new points of view are so designated The publishing history of each item is included along with the standard bibliographic information The index includes topical as well as author entries **Dryden's Classical Theory of Literature** Edward Pechter, 1975-03-20 Professor Pechter's book attempts to describe the consistent structure of both style and method within which Dryden examines orders and evaluates literary experience This mode permits Dryden to recognise the real differences between French and English drama Virgilian and Ovidian style judgement and fancy to take some of the more familiar from among Dryden's typical conjunctive pairs without either merging their differences into some grand synthesis or transforming them into mutually exclusive antitheses Dryden's is above all a comprehensive theory of literature which aims at responding to a broad range of various literary styles genres faculties and effects Dryden's balance is classical the poise of the golden mean and Professor Pechter endeavours to give fresh life to classical as an epithet often previously applied to Dryden Ranging among writers in ancient Greece and Rome and among Dryden's contemporaries in England and France the author outlines a rich literary tradition within which Dryden's criticism is more easily appreciated and better understood *The Just and the Lively* Michael Werth Gelber, 2002 Recognition is often considered a means to de-escalate conflicts and promote peaceful social interactions This volume explores the forms that social recognition and its withholding may take in asymmetric armed conflicts examining the risks and opportunities that arise when local state and transnational actors recognise misrecognise or deny recognition of armed non state actors By studying key asymmetric conflicts through the prism of recognition it offers an innovative perspective on the interactions between armed non state actors and state actors In what contexts does granting recognition to armed non state actors foster conflict transformation What happens

when governments withhold recognition or label armed non state actors in ways they perceive as misrecognition The authors examine the ambivalence of recognition processes in violent conflicts and their sometimes unintended consequences The volume shows that while non recognition prevents conflict transformation the recognition of armed non state actors may produce counterproductive precedents and new modes of exclusion in intra state and transnational politics **Rhetorical**

Renaissance Kathy Eden,2023-01-06 Kathy Eden reveals the unexplored classical rhetorical theory at the heart of iconic Renaissance literary works Kathy Eden explores the intersection of early modern literary theory and practice She considers the rebirth of the rhetorical art resulting from the rediscovery of complete manuscripts of high profile ancient texts about rhetoric by Plato Aristotle Cicero Quintilian and Tacitus all unavailable before the early fifteenth century and the impact of this art on early modern European literary production This profound influence of key principles and practices on the most widely taught early modern literary texts remains largely and surprisingly unexplored Devoting four chapters to these practices on status refutation similitude and style Eden connects the architecture of the most widely read classical rhetorical manuals to the structures of such major Renaissance works as Petrarch's Secret Castiglione's Book of the Courtier Erasmus's Antibarbarians and Ciceronianus and Montaigne's Essays Eden concludes by showing how these rhetorical practices were understood to work together to form a literary masterwork with important implications for how we read these texts today
