Coomaraswamy, 1956-01-01 The late Ananda K Coomaraswamy curator of Indian art at the Boston Museum of Fine Arts uniquely combined art historian philosopher orientalist linguist and expositor in his person His knowledge of the arts and handcrafts of the Orient was unexcelled and his numerous monographs on Oriental art either established or revolutionized entire fields He was also a great Orientalist with an almost unmatched understanding of traditional culture He covered the philosophic and religious experience of the entire premodern world east and west and for him primitive medieval European and classical Indian experiences of truth and art were only different dialects in a common language Finally Coomaraswamy was a provocative writer whose erudition was expressed in a delightful aphoristic style The nine essays in this book are among his most stimulating They discuss such matters as the true function of aesthetics in art

the importance of symbolism and the importance of intellectual and philosophical background to the artists they demonstrate that abstract art and primitive art despite superficial resemblances are completely divergent and they deal with the common philosophy which pervades all great art the nature of medieval art folklore and modern art the beauty inherent in mathematics and the union of traditional symbolism and individual portraiture in premodern cultures

**Entertaining Mathematical Puzzles** Martin Gardner, 1986-10 Playing with mathematical riddles can be an intriguing and fun filled pastime as popular science writer Martin Gardner proves in this entertaining collection Puzzlists need only an elementary knowledge of math and a will to resist looking up the answer before trying to solve a problem Written in a light and witty style Entertaining Mathematical Puzzles is a mixture of old and new riddles grouped into sections that cover a variety of mathematical topics money speed plane and solid geometry probability topology tricky puzzles and more The probability section for example points out that everything we do everything that happens around us obeys the laws of probability geometry puzzles test our ability to think pictorially and often in more than one dimension while topology among the youngest and rowdiest branches of modern geometry offers a glimpse into a strange dimension where properties remain unchanged no matter how a figure is twisted stretched or compressed Clear and concise comments at the beginning of each section explain the nature and importance of the math needed to solve each puzzle A carefully explained solution follows each problem In many cases all that is needed to solve a puzzle is the ability to think logically and clearly to be on the alert for surprising off beat angles that strange hidden factor that everyone else had overlooked Fully illustrated this engaging collection will appeal to parents and children amateur mathematicians scientists and students alike and may as the author writes make the reader want to study the subject in earnest and explains some of the inviting paths that wind away from the problems into lush areas of the mathematical jungle 65 black and white illustrations
